Departure & Arrival of Mails

DEPARTURE.

6.25 A. M. For Boston, and intervening points, and all points South and West; via Elmwood. 7.43 A. M. For Boston, and intervening points and all points South and West; via Concord. 11.40 A. M. Rural carriers leave to serve routes.

2.08 P. M. For Boston, and intervening points, and all points South and West; via Elmwood 3.27 p. m. For Hillsboro and Concord, and points North and South of Concord.

4.33 p. m. For Bennington, Peterboro, Hancock, and Keene, and all points South and West.

ARRIVAL.

At 8.15, 10.25, 11.20 A. M.; 5.05 and 6.05 P. M.

Postoffice will open at 6.15 A. M., and close at 7.30 P. M., except Tuesday evening, when it will close at 7.00.

ALBERT CLEMENT,
Postmaster.

Church and Lodge Directory

Presbyterian Church. Sunday morning service at 10.45. Week-day meetings Tuesday and Thursday evenings.

Baptist Church. Sunday morning service at 10.45. Week-day meetings Tuesday and Thursday evenings.

Methodist Church. Sunday morning service at 10.45. Week-day meetings Tuesday and Thursday evenings.

Congregational Church, at Centre. Sunday morning service at 10.45. Week-day meetings Tuesday and Thursday evenings.

Sunday School at each of the above churches at 12 o'clock, noon.

Waverley Lodge, I.O.O.F., meets Saturday evenings in Odd Fellows block.

Hand in Hand Rebekah Lodge meets second and fourth Wednesday evenings of each month, in above hall.

Antrim Grange, P. of H., meets in their hall at the Centre, on the first and third Wednesday evenings in each month.

Young Men's Republican Club meets 2nd and 4th Monday evenings, at G. A. R., hall. Officers: Pres., Chas. F. Butterfield. Sec., C. W. Prentiss, Treas. Carl Robinson.

Ephraim Weston Post, No. 87, G. A. R., meet in their hall in Jameson Block, second and fourth Friday evenings of each month.

Women's relief Corps meets in G. A. R. hall first and third Friday evenings of each month.

George W. Chandler Camp, Sons of Veterans meet in G. A. R. hall, first and third Monday evenings of each month.

AGENCY.

Bundles for Henniker Steam Laundry may be left at Davis-Patterson's store up to Tuesday, and will be returned to the store Friday. All orders called for and delivered.

Commencing April 1, Family Rates for Ice will be 27c. per hundred pounds.

D. W. COOLEY,
Surgeon Dentist
Office at Residence,

ANNUAL ADDRESS OF GOVERNOR McLANE

Gentlemen of the Senate and House of Representatives:—

I appreciate to its full extent the high privileges which permits me at this time to welcome you to this Hall of Assembly, dedicated by our State for the use of its legislators in the discharge of the duties imposed upon them. You have been called by the people to perform important duties the faithful performance of which will require your most earnest and deliberate consideration.

GOVERNOR McLANE.

I am deeply impressed with the honor conferred upon me by the people of this State, and shall to the best of my ability discharge the duties of the high office to which I have been elected.

State Finance.

From the State Treasurer's report for the year ending May 31st, 1904, the following statement of our financial condition is taken.

Abstract of receipts and disbursements:

Receipts.

Cash and Cash items on hand June 1st, 1903, ...	$ 370,626.06
Total receipts during the year	1,327,439.61
	$1,698,065.67

Disbursements.

Total disbursements during the year	$1,452,843.73
Cash and Cash items on hand June 1st, 1904	245,221.94
	$1,698,065.67

Debt.

Liabilities June 1st, 1903..	$1,557,148.50
Assets June 1st, 1903	904,337.54
Net indebtedness June 1st, 1903	646,810.96
Liabilities June 1st, 1904 ..	$1,432,909.00
Assets June 1st, 1904....	$15,140.03
Net indebtedness June 1st, 1904	617,768.97
Reduction of debt during the year	29,041.99

It is manifest that the present revenue of the State is not sufficient to meet what are called the ordinary and extraordinary expenses, interest charges and bond payments. Ordinary expenses include salaries and expenses whose payment is authorized by general laws and which are of annual or biennial occurrence. Extraordinary expenses are those which are authorized by special act of the legislature.

The total ordinary expenses for the year ending May 31st, 1904, were $351,499.44.

The total extraordinary expenses for the year ending May 31st, 1904, were $224,962.86.

Having due regard for the orderly and efficient transaction of the public business of the State, if any, reduction in the ordinary expenses of the State can be expected. The pressure upon the legislature to increase rather than decrease the extraordinary expenses will be great. There will be many propositions brought to your attention calling for appropriations from the State Treasury. Each will doubtless have merit; some would be a public benefit, but all mean higher taxes for the people and should be scrutinized with the greatest care.

It appears that a State tax of $300,000 is not sufficient to meet the expenses. Consequently I recommend that the State tax for the next two years be $425,000. As the tax for the next year was fixed at $300,000 by the last legislature it will be necessary for you to give this matter your early attention if the proposition to increase the tax merits with your approval.

New Sources of Revenue.

Under our amended Constitution two new sources of revenue are available; Namely, a tax on Inheritances and a tax on franchises. It is not presumed that a tax on franchises would produce a very large amount of revenue in this State, but a tax on inheritances, would, in my opinion, produce considerable revenue without injustice to anyone.

There are few States that do not have some form of an Inheritance tax. I therefore recommend that a special joint committee of the Senate and the House be appointed at an early day, whose duty it will be to consider the question of an Inheritance Tax and a Franchise Tax, with instructions to report not later than Feb. 21st, 1905.

Savings Banks.

The Savings Banks of the State appear to be in excellent condition. There are at the present time under the supervision of the Bank Commissioners, sixty-nine Savings Banks, twelve Banking and Trust Companies, nine with savings bank departments and sixteen Building and Loan Associations.

The aggregate resources of the Savings Banks and savings departments of the banking and trust companies in active operation June 30th, 1904, were $75,695,321.34; an increase over the previous year of $2,131,610.07. The amount due depositors was $66,140,710.09; an increase of $2,221,526.99. The guarantee fund amounts to $3,698,333.38; an increase of $176,214.34, and now equals 5.6 percent of [illegible] as compared with 5.5 percent in 1903. The undivided earnings amount to $1,715,828.93, an increase of $54,917.86.

The number of depositors is 159,956; an increase of 4,647.

This very handsome increase in the amount of the deposits and number of depositors is a pleasant indication of the prosperity and thrift of our people.

The law creating a board of Bank Commissioners does not provide that one of them shall be chairman of the Board. Your attention is also called to the fact that under the law the Commissioners have no authority to engage assistance which is sometimes needed on account of sickness or emergencies which require prompt attention. I recommend that the law be amended so as to cover the two points indicated above.

State Hospital.

You will be called upon to consider the urgent need of additional buildings to properly care for the large and constantly increasing number of patients desiring admission to the State Hospital.

An Act of the Legislature approved March 7, 1903, provides that "The State from and after the first day of January, 1909, shall have the care, control and treatment of all insane persons who are now cared for by the various counties at the county almshouses. That from and after the passage of this Act the State Board of Lunacy may order the removal of all such dependent insane persons to the State Hospital for remedial treatment as in the judgment seems proper, and such persons shall be supported at the expense of the State." This Act further provides that "After January 1st, 1905, as rapidly as accommodations can be provided, the State Board of Lunacy shall begin making transfers from the various county almshouses to the State Hospital of such insane persons as in their judgment seem most suitable."

In furtherance of the purpose of this Act the legislature passed a joint resolution approved March 3d, 1903, making an appropriation of sixty thousand dollars for the construction of additions to the Hospital. These were completed about the first of last June and afford accommodation for one-hundred and fifty patients. The Hospital now has about 600 patients and is practically full. Further provisions for the additional patients provided for by the last legislature is now needed. Plans have been secured and the estimated cost is about $150,000.

If the proposition to provide additional buildings meets with your approval, I recommend that funds be secured for the purpose by the sale of short-time bonds.

State Board of Charities and Corrections.

The general trend of charity legislation in the United States is in the direction of a closer supervision or control of public charities. The movement to extend the scope and modify the terms of public relief giving continues to be noticeable.

There is no work of more vital importance to the State and to society than that which properly comes under the supervision of the State Board of Charities and Correction. They serve without pay; thier only reward must come from the consciousness of duty well performed.

The following amendments to Chapter 102, Laws of 1901, which they recommend should receive your careful consideration.

1. That Chaper 102, Laws of 1901, be amended so that the New Hampshire School for the Feeble-minded shall give custodial care to adult feeble-minded women as well as educational care to feeble-minded children.

2. That a separate building for epileptics be erected at the State School for the Feeble-minded.

3. That a separate building for girls be erected at the State Industrial school.

4. That a State Workhouse or Reformatory be established for the custody of prisoners committed for minor offenses.

5. That Juvenile Courts and a Probation system be established in the State of New Hampshire.

6. That Chapter 65, Laws of 1903, be amended by striking out the world "Indigent" before the words "deaf and dumb and blind" persons.

7. That Section, 1, Chapter 265, Public Statutes, be amended making it a penal offense for any man without good cause willfully to desert, neglect or refuse to support his wife or child or children fifteen years of age or under.

8. That Section 8, Chapter 91, Laws of 1897, be amended by striking out the phrase "Except the State prison and the asylum for the insane at Concord," so that the section shall read:

"Sect. 8. It shall be the duty of the Board to inspect all State and County charitable or correctional institutions and report to the Governor and Council and legislature biennially the result of their inspection, with a recommendation for such changes in existing laws as in their judgment the public good requires; and shall, on making such inspection, report and recommend to the county commissioners, or such other county or state officers as have the control and management of such institutions, the changes, if any, that said Board finds on such inspection should be made in said institutions."

School for Feeble-Minded Children.

The New Hampshire school for Feeble-minded children was opened February 1st, 1903, and was quickly filled with sixty-seven inmates, and there is a waiting-list of eighty. The need of such an institution is manifest.

In November the main dormitory was burned. Fortunately the fire occurred in the day-time and no lives were lost. You will be called upon to make an appropriation to rebuild, possibly on a larger scale so that the large number of unfortunates desiring may be admitted. A central heating plant is greatly desired, also better fire protection.

Industrial School.

This institution has been in existence since 1858, nearly half a century. It is in charge of a superintendent who manages it under the supervision of a board of seven trustees.

The number of children committed since it was first opened is 2190, being an average of [illegible] and a fraction each year.

The number of inmates on October 1st, 1902, was 147. The number on October 1st, 1904, was, girls 37, boys 140, in all, 177; an increase of 30.

In addition, there were four others awaiting trial, making 181 altogether.

For the accommodation of the inmates there is but one building. Under its roof are the school, schoolrooms, sick-rooms, sleeping dormitories, kitchen, dining-room, etc.

Including the superintendent, matron, teachers and female employees there are 190 persons who live and sleep in the building. From this it can be seen that the accommodations are entirely inadequate for the number of occupants, and unless there is a decrease in the number of children committed, which is not probable, measures must be taken in the near future for the enlargement of the main building, or what is still better, the construction of a new one.

The legislature of 1903 made an appropriation of $9,000, "For the purpose of building an isolation hospital, a wagon-shed and making permanent improvements and repairs on the existing buildings. Looking to the future, the trustees put the entire amount into the hospital and have had constructed a substantial structure of brick, resting on a solid granite foundation. It is on the right, and in line with the main building, and about six hundred feet distant. It is 35x40, and two stories high. It contains four wards, with the necessary closets, bath-rooms, attendants' rooms, etc.

It was built by contract. The entire cost was $8,967.07, or $32.93 less than the appropriation. This includes steam-heating fixtures, electric-lighting apparatus, etc.

The other improvements called for in the appropriation were made and paid for from the product of the farm, and at an expense of $2,889.29.

The hosiery plant occupies a wing one story high, in the rear of the main building, and connected with it. For the past ten years it has been operated by the Superintendent under the direction of the trustees.

In order to replace the machinery owned and operated by the former contractor, the trustees purchased machinery to the amount of $8,000 hiring the money to pay for it without soliciting aid from the State.

This debt is now nearly paid from the product of the plant. Under this new arrangement there are no persons between the Superintendent and the boys, but his own employes, which is far more desirable than that in vogue when the work was done by the con-

THE GRANGE

Conducted by
J. W. DARROW, Chatham, N. Y.,
Press Correspondent New York State Grange

MAINE STATE GRANGE.

Over $73,300 Invested In Grange Halls In the Pine Tree State.

The recent session of the Maine state grange was the largest in numbers ever held. Hon. Obadiah Gardner is master. His annual address was a careful resume of the work of the Order in the state during the past year. His arraignment of the game laws elicited applause. Another point he laid emphasis on is that no state master should ever accept political office of any kind while holding office in the grange. He said that seventeen new granges had been organized during the year and eleven reorganized, a gain in membership of 5,379. Eleven new grange halls have been dedicated during the past year, making $73,300 invested in grange halls in Maine. Relative to the road question he said, "The mud tax levied on our people by the miserable condition of the common roads is the highest we have to pay." He advocated government aid in road building and the bringing to bear the influence of the grange upon congress. He had an earnest word for the establishment of a parcels post. The secretary's report showed the total membership in the state to be 45,466 in 375 granges. Penobscot county has forty-four granges, with a total membership of 5,831, and has gained 780 the past year. There are two other counties in the state that have a membership exceeding 4,000. One grange—Houlton, No. 16—has 751 members, and five others have over 400.

New Hampshire State Grange.

At a recent meeting of the New Hampshire state grange the condition of the Order in that state was reported to be very gratifying. The total membership at the close of the fiscal year, Sept. 1, was 27,466, and in view of the fact that the population of New Hampshire is only 500,000 and that 27,500 are members of the Order the Granite State can rightfully claim to be the leader in grange membership, the total population being taken as a basis of comparison. The net gain during the year was 822. The total membership of the Pomona granges is 8,256, a gain of 258. The grange has to its credit in cash $224,463.78. The sixth degree was conferred on 318 candidates. The Oberon quartet of Laconia furnished music for the occasion.

Pomona Grange to Run County Fair.

Somerset county Pomona, Maine, has purchased the grounds of the Agricultural society of Skowhegan and will henceforth conduct the county fairs in Somerset. This will be a novelty that will be closely watched by the Patrons all over the state. The grange assumes the indebtedness of the Agricultural society, which is $1,100. The agreement further specifies that if at the end of twenty years the Pomona does not wish to renew the lease the property known as Fairview park is to lapse to the town or city of Skowhegan for a public park.

Salaries of National Officers.

The national grange committee on finances recommended the following salaries: Five hundred dollars per year and $3 per day and actual traveling expenses for the national master, $400 and $3 per diem for the worthy lecturer, $1,200 and traveling expenses for the worthy secretary, $400 and traveling expenses for the worthy treasurer and $3 per day and expenses for the members of the executive committee. It was also recommended that $7,000 be set aside as a lecture and extension fund.

Parcels Post.

Strong resolutions in favor of the parcels post were adopted by the national grange. The committee laid emphasis on the fact that the rural mail service now has the machinery for an efficient parcels post system, and, while it did not advocate a rate that would drive the express companies out of business, nevertheless they thought the people had a right to demand of congress an extension of the usefulness of this system.

Eligibility.

Any man or woman or child over fourteen years old if living on a farm or owning or managing a farm, whether living on it or not; any person whose interests are rural, like a minister in a country community, a county schoolteacher, etc., is eligible to membership.

A Good Idea.

The California state grange in recent session passed the following resolution: "Resolved, That in choosing our representatives to congress we will vote for those who will promise to legislate for the establishment of an adequate up to date parcels post."

The national grange wants Indian corn to be the national floral emblem.

WINTER CARE OF POULTRY.

Fowls Must Be Protected From Cold and Storm.

Now that the season of cold and storms has arrived it is necessary to keep the fowls and chicks from taking cold. If the roup should get in your flock it will mean a great loss, says Officer in Commercial Poultry. Nothing is more discouraging than to find half a dozen or more of your best chicks or fowls with symptoms of roup. It means if your flock has roup that every bird, no difference how valuable, must be killed and buried. Roup is a very bad disease, and any breeder that will keep roupy fowls and either breed or sell them is making a mistake. The fowls and chicks should be kept comfortable, and their roosting place should be proof against rain or rats and arranged to prevent drafts of air. If the chickens are roosting in coops, wooden bottoms should be placed under the coops, as the ground will get damp and cold. A little extra precaution may save you the loss of many chicks.

Cockerels should be penned to themselves.

Pullets do not have any peace when running in the same inclosure with cockerels. If you want your pullets to do well, do not keep them with the cockerels. When cockerels are put by themselves they will fight and spar around for awhile, but always quiet down in a short time and will be contented together.

Pine Tar In the Poultry House.

Poultry raisers seem to have failed to discover the value of pine tar. It is very useful and valuable in many ways, says Poultry World. Some breeders tar their poultry yard fences in preference to whitewashing them, though we do not like to see it done, for it gives the surroundings such a gloomy, forbidding look. It undoubtedly contributes largely to the durability of the wood, protecting it from the ravages of storm and time.

It is in the poultry house, however, that the value of tar is the greatest, for it conduces greatly toward healthfulness. When that scourge of the poultryman, cholera, makes its appearance, we would advise first a thorough cleaning of the house, next a generous application of Carolina tar on all the joints, cracks and crevices of the inside of the building and plenty of fresh whitewash properly applied. The tar absorbs or drives away the taint of disease and makes the premises wholesome. The smell is not offensive—in fact, many people like it—and it is directly opposite to unhealthy. To vermin, lice, etc., the smell of tar is very repulsive, and but few will remain after you have tarred the cracks, etc.

A friend of ours was once troubled with chicken cholera and by adopting the above in connection with removing affected fowls he soon put a stop to the ravages. A small lump of tar in the drinking water supplied to the fowl will be found beneficial, provided it is the Carolina tar, which is very different from the petroleum product.

Water For the Fowls.

If necessary food is not given to the hen in her own special place she will find enough to keep her busy, but she is not so successful in obtaining water to drink, says A. V. Meersch in Western Poultry Journal. The farmer or his wife will usually provide some feed, but "Biddy" many times takes her chance for water. Yet it is fully proved that 84 per cent of the egg is water. Drinking vessels should be thoroughly cleaned every day and if possible so made that the hens cannot stand in it. In winter time these drinking vessels should be emptied at night to prevent them from freezing, and it is advisable to give fowls a warm drink in the early morning in winter when they first come from the roosts, as at that time they usually drink freely. If this is practiced the hens will come for this water as quickly as they will come for food.

Separate the Sexes.

It is the height of foolishness to allow the male birds to run with the hens during the fall and winter months unless eggs are wanted for hatching, says Commercial Poultry. It should be remembered that an unfertilized egg is dead matter, while a fertilized one contains a life germ that is ready to take on animal existence as soon as the proper conditions are furnished. Even at the low temperature of 60 degrees a fertilized egg will begin to decay long before an unfertilized one would show the least change. Keep the males and females separate.

Crushed Shells For Poultry.

We advocate the feeding of crushed shells to poultry. Seashells, crushed oyster shells, etc. Shells are an absolute necessity to fowls confined, and at the price they can usually be obtained it will pay well to keep them before the fowls at all times. While they take the place of grit to some extent, yet grit should not be excluded. Shells contain lime in proportions that furnish health as well as eggshell material, and the fowls greatly relish them in small proportions.—Farmers' Advocate.

C. F. FOLEY'S KIDNEY CURE

Guaranteed for all Kidney and Bladder Diseases. Is Safe and Sure.

Foley's Kidney Cure cures the most obstinate cases of kidney and bladder diseases.

It supplies the kidneys with the substances they need to build up the worn out tissues.

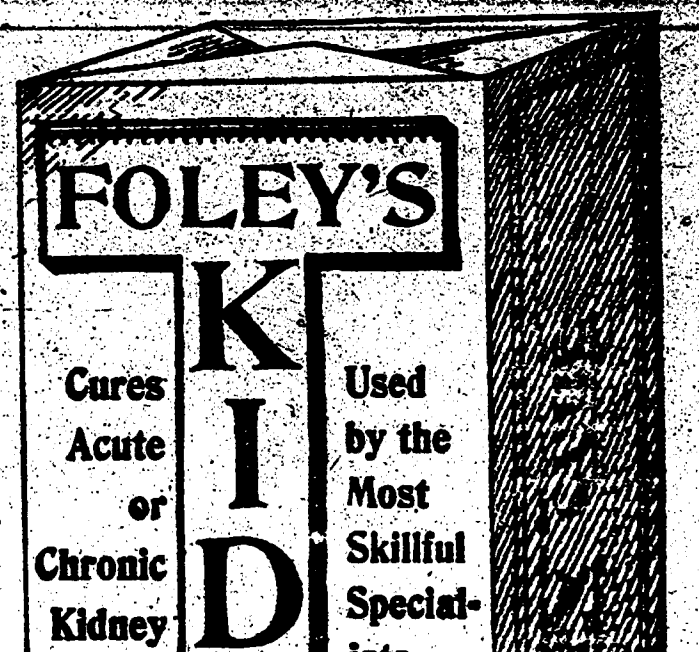
It will cure Bright's Disease and Diabetes if taken in time, and a slight disorder yields readily to the wonderful curative power of this great medicine.

It soothes and heals the urinary organs and invigorates the whole system. If your kidneys are deranged, commence taking **Foley's Kidney Cure** at once. *It will make you well.*

TWO SIZES 50c & $1.00

A Physician healed, now prescribes it daily.

Dr. Geo. Ewing, a practicing physician of Smith's Grove, Ky., for over thirty years, writes his personal experience with *Foley's Kidney Cure*: "For years I have been greatly bothered with kidney and bladder trouble and enlarged prostate gland. I used everything known to the profession without relief, until I commenced to use *Foley's Kidney Cure*. After taking three bottles I was entirely relieved and cured. I prescribe it now daily in my practice and heartily recommend its use to all physicians for such troubles, for I can honestly state I have prescribed it in hundreds of cases with perfect success."



Wm. F. Dickey, Town Hall Drug Store, Antrim, N.H

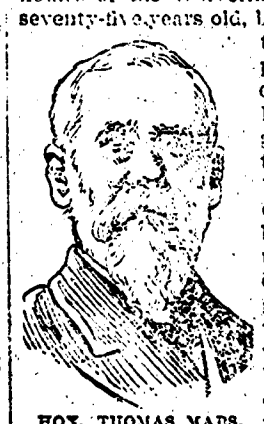
THE GRANGE

Conducted by
J. W. DARROW, Chatham, N. Y.,
Press Correspondent New York State Grange

HON. THOMAS MARS.

One of the Foremost Patrons of Michigan and Ex-State Senator.

A strong pillar in the grange of Michigan, a successful and prominent farmer, the name of Thomas Mars is well nigh a household word in the country homes of the Wolverine State. He is seventy-five years old, but vigorous, enthusiastic and a power in farmers' assemblages. He joined the grange over thirty years ago. In 1877 he was elected a member of the executive committee of the state grange and, with the exception of two years, has been a member of that committee until the present time and is now chairman thereof.



HON. THOMAS MARS.

From 1887 to 1892 he was master of the state grange. During this period he devoted nearly all his time in traveling over the state, visiting nearly every grange, and the success of the Order in Michigan is due in no small degree to Brother Mars' able efforts and energy. During these years he was a leader in the fight against the plaster combine and patent sharks.

Thomas Mars has a large and fine farm and a beautiful home near Berrien Center, Mich. He has been state senator, member of the board of control of the state public school, county agent of the state board of corrections and charities and has held many other offices of a minor or local nature.

MICHIGAN STATE GRANGE.

Eighty New Granges Organized the Past Year.

One of the live grange states is Michigan. The thirty-second annual session, held at Lansing, Mich., was a most important one. Worthy Master George B. Horton of Fruit Ridge reported good progress during the year. Eighty granges have been added to the list, and the total membership is well along toward 50,000. He reported that during the year $200,000 in sales had been made under grange contracts covering woven wire fencing, binder twine, fertilizer, etc. He stated that the saving will be $20,000 to the purchasers.

The report of the secretary of the Patrons' Mutual Fire Insurance company showed that it is carrying $4,290,261 in risks in 2,956 policies. The committee on co-operation recommended that the scope of the information bureau established in Lansing be extended to make it a commission house. Resolutions were adopted on the following topics: Providing for the public ownership of railroads, recommending the election of dairy and food commission, in favor of using the influence of the grange to prevent discriminations in freight rates in favor of large corporations, favoring a law that will provide for the nomination of governor, lieutenant governor and members of the state legislature by direct vote and the use of the same system in counties which ask for it by a majority vote.

Hon. George B. Horton was re-elected state master, as were also the efficient lecturer, Mrs. F. D. Saunders of Rockford, and Secretary Miss Jennie Buel of Ann Arbor. The place of the next meeting of the state grange is Grand Rapids.

Ex-United States Consul Judge Caples is an officer in the Evening Star grange, No. 27, of Oregon.

Governor C. J. Bell has been re-elected master of the Vermont state grange.

They All

"There are fads in medicine as well as in other things," said a busy druggist, "but the most remarkable thing about Hood's Sarsaparilla is that customers who try other remedies all come back to Hood's, and this is why the enormous sales of this medicine keep up while others

Come

and in a short time go out of sight entirely, to be heard from no more."

"Why is it?" "O, simply because Hood's Sarsaparilla has more real curative merit than any medicine I ever sold."

This is of daily occurrence in almost every drug store. Hood's Sarsaparilla is the standard remedy which has cured more sickness, relieved more distress and made more happiness by bringing people

Back to

health than any other medicine. Its wonderful cures of the worst cases of scrofula, running sores, ulcers, salt rheum, etc.; of dyspepsia and other troubles where a first class tonic and aid to digestion was needed; of catarrh, rheumatism, malaria and other troubles arising from or promoted by impure blood, have made

Hood's Sarsaparilla

The standard—the One True Blood Purifier.

Hood's Pills are the only pills to take with Hood's Sarsaparilla.

MERIT is what has given Hood's Sarsaparilla the largest sales in the world and enables it to accomplish thousands of wonderful **CURES.**

[illegible]

[illegible] Roost and Dropping Board [illegible]

A [illegible] device to economize space [illegible] is described by James Rady [illegible] in Reliable Poultry Journal. Mr. Rady says:

The roosts are ten feet long, three in number, and made of 2 by 3 inch [illegible] pine, with the corners rounded. They rest upon 2½ by 1½ inch strips three feet six inches long, the back ends of which are hinged to the wall of the house. These are supported in front by uprights of the same dimensions, also three feet six inches long, and are fastened to them with one bolt so as to make a swing joint.

The platform or droppings board is also ten feet long and two feet nine inches wide, set with a [illegible] edge nine inches from the wall and standing nine inches from the floor. The cleats upon the underside of the platform, which support and hold it together, are hinged at the rear to the side of

FOLDING ROOST AND PLATFORM.

the building in the same manner as the roost supports. At the front they are fastened to the uprights with the swing joint fastenings described above.

Two V shaped troughs, each five feet long, are placed on the floor against the wall under the rear of the droppings board.

To the middle of the roost farthest from the wall is attached a half inch rope, which is passed through a pulley on the wall above and furnished with a ring at its other end. By grasping this ring the roosts and platform are pulled up and folded back against the wall, where they are out of the way, and no birds can roost upon it in the daytime. The ring may be slipped over a hook screwed to the underside of the platform to hold the fixture in place.

The platform is sprinkled each evening with sawdust and slaked lime, so that when it is raised in the morning the droppings slide off into the troughs and are easily removed.

This fixture folded up leaves the entire door free from incumbrance for a scratching room. The cost of making is not heavy and the labor of cleaning is somewhat reduced.

Soft Feed For Hens.

Many breeders believe that soft food —that is, crushed grains or paste—is more easily and completely digested by the birds and that it produces more tender flesh, says American Agriculturist. In reviewing experiments in this line Helen W. Atwater in a farmers' bulletin of the United States department of agriculture says in experiments made at the New York state station chickens, laying hens and capons all produced better results with ground than with unground grain. According to a test at the Canada experimental farms, chickens fed a ground grain ration were when dressed [illegible] per cent heavier, were plumper, [illegible]ly yellower and of better appearance than chickens fed a similar ration [of] unground grains. When cooked the flesh of the birds fed the ground grain was regarded as juicier, owing evidently to a marked, though not excessive, disposition of fat in the tissues.

Care of Male Birds.

Your male bird should be at least two years old, and it would pay for the keep if your cocks had never seen a hen till you require them for breeding at two years, says H. Fuller in Western Joultry Journal. It pays every poultry breeder to build a small pen for his male birds and keep them separate—the fertility of your eggs will pay you 100 per cent. Male birds should be well fed and kept dry during molt. As soon as one has molted his spurs should be taken off, as a bird kept from hens develops a very long spur. Taking the spur off is easily done by roasting a potato and while hot pushing the potato on the spur up to the leg, holding it there for thirty or forty seconds; then the spur can be twisted off. You are not troubled with a spur again if he lives for ten years.

Fattening Ducks.

In beginning to fatten shut in an inclosure, says a Washington correspondent of American Agriculturist. Always have water and grit before them. Feed all they will eat clean of soaked corn and wheat, a stiff mush made of bran, shorts, cornmeal and a little salt; also green stuff from the garden. Keep them quiet and feed regular. Keep quarters clean and dry, and there will be no trouble in fattening fast. I have marketed over 1,000 in one season in Spokane, all hatched under hens. Now I use incubators, as I wish the hens to hatch the goslings.

The Poultry House.

When building poultry houses always so construct them that the work [of car]ing for the fowls can be done in [the le]ast time and with the least labor.

News From Our Neighbors.

FRANCESTOWN.

Miss Mary Fetter returned to her school in Milford, Monday.

Miss Bessie Hopkins has been sick with the measles for the past two weeks.

Mrs. M L Colburn and neice, Abby Dodge, visited recently in Peterboro.

Mr. G W Cummings died last Friday, at a sanitarium in Winchendon. He formerly lived here. Funeral services were held at Peterboro, his late home, on Friday.

Oak Hill Grange had its visitation of officers last Thursday evening. Mr. Stinston, past master, was installing officer. Dr. Stevens and Rodney Mills were assistants. The march was very pretty and the work nicely done. An oyster supper was furnished by the "gents," after which a short musical and literary program was given On account of the bad traveling there were less visitors than usual. A small party came over from Greenfield.

Miss Marion Kingsbury was ill and unable to attend school a part of las week.

Mr. Wm. Weston, of Greenfield, supplied the pulpit at the Congregational church last Sunday, in the absence of Rev. W L Noyes.

GENERAL PURPOSE FOWL.

Many Good Qualities Combine In the White Wyandotte.

If you want a combination of everything that is good in a farm fowl try the White Wyandottes, says a Kansas breeder in Farmers' Advocate. That which goes to make up a general purpose fowl in a complete sense in my opinion is found in the Wyandotte. The most perfect in shape, the most beautiful in richness of color, the most easily dressed and the best when prepared for the table are in my opinion qualities of the White Wyandottes. Not much bone and more meat to the size of the bird. In egg production they cannot be beaten outside of the nonsitting varieties.

What is said of the white variety might be said of all of the Wyandotte family, of the varieties well established. The Wyandottes have a comb that seldom is frozen even if exposed to very hard freezing, except the cocks, that are more subject to damage in this respect, but the hens are not checked in egg production in winter on account of frozen combs.

The White Wyandotte is the most easily bred to standard requirements of any of the Wyandottes, and a flock can be produced every year at the least possible expense in keeping up a fair standard quality. There are plenty of not well bred White Wyandottes, just as there are of any variety, but if you once get a start with good stock and acquaint yourself as to the requirements in standard breeding you will have but little trouble in keeping a flock of choice White Wyandottes.

Keep in view the Wyandotte shape in plumpness of body, rather short legs yellow in color, low smooth combs and if possible chalk white plumage. Brassiness in plumage, a yellow tinge on the surface of plumage, is a very frequent occurrence in White Wyandottes, and if you do not give this point strict attention you will have but few chalk white birds. This for the farm and not for the showroom does not make so much difference, but the proud possessor of the flock will not be satisfied if they are not about right in every way.

The Working Hen.

The prevailing idea in poultry feeding just now seems to center around the word "exercise." Feed with a view of making the fowls work for it. A writer in discussing when to feed mash keeps this idea in mind when he writes: "The idea that hens require a feed of soft mash early in the morning is a mistaken one and has often proved the first step toward failure with beginners. Hens need exercise first, and, though compulsion is necessary, we must see that they take it. If we satisfy their appetites they will certainly not work to find more food. Let the first feed be grain of some kind scattered in litter, and see that the hens begin to work as soon as it becomes light. See that they keep it up until near noon; then the mash, only about one-half what they would eat, should be given. Shortly afterward more grain should be scattered, so that the hens may work until dark. The hen that works most will be the most profitable one. When she ceases to work her usefulness will soon end."

Nothing has ever equalled it. Nothing can ever surpass it.

Dr. King's New Discovery

For Consumption, Coughs and Colds. Price 50c & $1.00

A Perfect Cure: For All Throat and Lung Troubles.

Money back if it fails. Trial Bottles free.

You cannot cure piles by external application. Any remedy to be effective must be applied inside, right at the seat of the trouble. ManZan is put up in a collapsible tube, with a nozzle, so that it reaches inside and applies the remedy where it is most needed. ManZan stiengthens the blood vessels and nerves so that piles are impossible. ManZan relieves the pain almost instantly, heals, soothes, cools and cures.

Sold by: W. F. Dickey, Antrim; Pollard & Freeman, Hancock; W. H. Whitney, Henniker.

Charles Richardson & Co., Boston, Mass.

The Cause of [illegible] Sudden [illegible]

There is a disease prevailing in this country most dangerous [illegible]

[illegible] many sudden deaths are caused by it — heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, causing catarrh of the bladder, or the kidneys themselves break down and waste away cell by cell.

Bladder troubles almost always result from a derangement of the kidneys and a cure is obtained quickest by a proper treatment of the kidneys. If you are feeling badly you can make no mistake by taking Dr. Kilmer's *Swamp-Root*, the great kidney, liver and bladder remedy.

It corrects inability to hold urine and scalding pain in passing it, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases.

Swamp-Root is pleasant to take and is sold by all druggists in fifty-cent and one-dollar size bottles. You may have a sample bottle of this wonderful new discovery and a book that tells all about it, both sent free by mail. Address, Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

Vaccinate your Land. An Interesting Article from O M Lord.

Mr. Editor:

I copy the following from an article by G H Grosvenor, in the October Century. "Did you vaccinate your land this year, I heard one farmer ask another the other day, 'Well I guess,' he replied. You remember that corner field which I gave up as hopeless last year? Well, when I heard about the yeast cakes the government was giving free with the promise that they would make clover or alfalfa where we farmers could't raise anything but weeds, and thin weeds at that, I thought that I'd send for several cakes. When the cakes came. I vaccinated the field according to instructions, planting it with alfalfa. I tell you, I've got off that formerly worthless field five times more than I've been getting from my best land, and I've got some pretty good land, too."

This articles attracted my attention and I thought that it might be for the ineterests of the farmers of Antrim for this fact, for it is a fact, to be made more widely known, so wrote to the Department of Agriculture at Washington and find that anyone who will apply, can have the formular for the asking. Space will not permit of an extended explanation of the subject, only to say that the inoculating material is designed for the growing of alfalfa, peas, beans, clovers, vetches, &c. and makes great improvement in the soil for succeeding crops. I copy the following from the article named "Enough germs are sent in each little package to inoculate seeds for from one to four acres. The package can be carried in your pocket and yet does more work than several cart-loads of fertilizer. It costs the government less than four cents a cake and saves the farmer thirty to forty dollars, which he would have to spend for an equal amount of fertilizer."

A perusal of the article named will be well worth the time of our farmers and I feel that much good will come, by a wise and faithful trial of the inoculating material.

I have a circular from the department how to apply for the germs, and there will also be in the near future bulletins from the department giving directions how to apply for the germs and there will also be in the near future bulletins from the department dealing with the subject that will be sent to any, free of expense. This bulletin is now in press, and I have promise of a copy when ready for distribution. I shall be glad to give information that I have on the subject, to anyone who cares to know of it.

Sudden Death of Albert Cram, a Grand Army Man.

The community was shocked on Thursday evening to learn of the sudden death of Albert Cram at his home in this village. Mrs Cram became anxious as to his absence and made known her trouble to Otis Reader, who lived in the other tenement of the house and he went to look for Mr Cram. Taking the lantern he went to the shed and discovered the body, lying on the floor. Medical aid was quickly summonsed but life was extinct.

Mr Cram was born in Dublin and was at the time of his death nearly 70 years of age. When the Civil War broke out he enlisted from Stoddard, and for three years served his country well, being honoraqly discharged from Co. I, 16th N H Vol. For the past 20 years he had resided in Antrim, he was a carpenter by trade.

Mr Cram is survived by a widow and five children: Oliver S. of Milford, Mrs Wallace Boutelle of Rochester, N Y. Albert W. of Nelson, Mrs Arthur Tarbox and Miss Bertha Cram.

The funeral services were held at his late home on Saturday afternoon, Rev W R Cochrane, D D officiating. The bearers were from Ephraim Weston Post, G A R, of which the deceased was a member. The remains were placed in the tomb, later they will be removed to Stoddard.

Chas. Stacy was over from Keene, last week.

Hattie Stewart, who formerly worked for C O Wood, has returned to occupy the same position.

Mrs. Wyeth has returned to her home in Townsend, Mass.

Rumor says that Frank Clark has sold his place—the Benton Tuttle farm.

J H Ford bought 9 head of Holstein cattle at the Hass auction.

D P Bryer has bought the blacksmith's tools of C O Wood, and taken them to South Antrim.

The Ladies' Circle, last week, at Aunt Achsah Preston's, was well attended, regardless of the blizzard. Thirty or more were present.

Enjoyable Party at Residence of Mr. and Mrs. Frank Clark.

One of the most enjoyable parties given in many years, in this part of the town, was tendered by Mr. and Mrs. Frank Clark, at their residence on the river road, in honor of Mrs. Clark's mother, Mrs. Barnard.

A part of the novel entertainment of the evening was progressive cards, different games being played at the tables. They also secured partners for the games in a way different from the one usually in vogue; this was something new, and afforded much pleasure to all present, being much more interesting than the old progressive whist.

A bountiful collation was served during the evening by the host and hostess. Guests were present from Milford, Hillsboro, Manchester and Boston. The party dispersed at a late hour, wishing Mrs. Barnard, and Mr. and Mrs. Clark, many happy New Years.

Officers Installed Last Saturday Evening. Collation Served.

On Saturday evening the officers of Waverley Lodge, I O O F were installed by D D G M Dustin. A large number were present. The following officers were installed:

Noble Grand—Fred W Odell
Vice Grand—Lewis D Hatch
Rec Sec—Frank P Ellinwood
Fin Sec—Morris E Nay
Treas—Fred I Burnham
R S N G—John R Putney
L S N G—Chas F Burnham
Warden—Alvin Smith
Con—J Frank Poor
R S S—Arthur N Harriman
L S S—Harry Nourse
O G—J Fred Roberts
I G—George Wilson
Chaplain—Chas H Kimball
R S V G—Kenneth McLoud
L S V G—Carles Fuggles
Trustees—F F Roach, Bert Paige, D W Cooley.

At the close of the above exercises a fine oyster supper was served in the banquet hall.

JUST AT the PRESENT TIME

You may want

Arctics, Rubbers, Felt Shoes, Gaiters, Leggins, Rubber Boots, Warm Slippers, Wool Boots, Felt Boots, "La France" Shoes, "All America" Shoes, Boy's Shoes, Girl's Shoes, Oranges, Bananas, Figs, Candy, Nuts, Lemons,

Edison Phonographs and Records.

E. V. GOODWIN, - Antrim, N. H.

Royal Hungarian Court Orchestra,

—At—

HILLSBORO BRIDGE,
Friday, January 27.

For the benefit of persons who wish to accept the only chance to hear this wonderful orchestra, a special train will be run at reduced rates, provided enough tickets are sold in advance to make up the guarantee. If not, the money will be returned.

Mr. William H. Munhall has the tickets for Antrim patrons, and Mr. Fred Mallett for those of Bennington.

Prices of return tickets, including admission to hall: Peterboro, $1.25; Bennington, 90c.: Antrim, 80 cents.

See small flyers for information.

Married

In Rumney, Dec. 24, by Rev. J L Caine, Chester Bickford and Miss Louise Howland, both of Dorchester. The bride was a resident of Bennington and graduated from the Antrim High School. Her many friends wish her a long and happy life.

Hutchinson—Sargent,

Married at the home of Rev. Wm. France, Hillsboro Centre, Frank L Hutchinson of Antrim and Miss Louise Sargent of Hillsboro. Both the bride and groom are well-known in their respective homes. They will soon take up their residence in Antrim, where Mr Hutchinson has employment. At Hillsboro Bridge, the home of the bride, the happy couple were given a pleasant reception on Saturday evening by some twenty in number.

Card of Thanks.

We wish to thank all the kind friends and neighbors for their many acts of kindness during our late bereavement, and specially to the G A R and W R C. To one and all we are truly grateful.

MRS MARY A CRAM,
OLIVER S CRAM AND WIFE,
ALBERT W CRAM AND WIFE.

Bee's Honey and Tar is different from all other remedies offered for the relief of cough, lung and bronchial troubles. It contains Antiseptic properties that destroy the germs, and solvent properties that cut the phlegm, allowing it to be brown off, moves the bowels gently. Cures Croup, Whooping Cough and Colds in one night.

BENNINGTON

James S May and wife of Andover are guests of relatives here.

Remember the Concert and Ball on Thursday evening, to be given by our Firemen.

Harry Hibbard was in town the first of the week.

Geo Woodbridge is confined to his home by illness.

Miss Blanche Perkins of Mt Sunapee is employed at the rail-road station.

Albert Diemond of Bay State is visiting in town with relatives and friends.

Mrs M W Work has been confined to the house of late with a severe cold.

Ernest Lyford is a guest in town.

Joe North of Turner's Falls is a guest at August Lockman's.

Henry Robinson, who for the past two years has had charge of the electric plant here, has severed his connection with the Goodell Company; his place is taken by a Mr Libby of Boston.

Fred Bartlett is on the sick list.

The officers of Bennington Grange are to be installed on the last meeting in January.

Mrs Amanda S Newton has been granted a widow's pension.

Owing to the storm of last Wednesday evening, the installation of the Ladies' Aid Society was postponed until next week Wednesday evening.

NARRAGANSETT TURKEYS.

Points In Which This Breed Differs From the Bronze.

From a recent bulletin issued by the United States department of agriculture the following information regarding the Narragansett turkey is gleaned:

The turkeys of this variety are next in size to the Bronze. They are of black ground color, each feather ending with a band of steel gray edged with black. This imparts a grayish cast to the entire surface plumage. Mixed with this is the finish of metallic black and bronze luster. They are beautiful in form and feather and breed true to shape and color. The female has a lighter shade of gray in her markings than the male. Her entire color throughout is of lighter shading.

The standard weights of this variety are for males from twenty to thirty pounds, according to age; for

NARRAGANSETT TURKEY COCK.

females, twelve to eighteen pounds. Some old males of both this and the Bronze variety weigh over forty pounds. These weights are excessive and of but little advantage in breeding. Medium sized males and females are more valuable for producing stock.

None of the several varieties of turkeys of this breed are so fine in form of breast and body nor so long in the leg as the Bronze, and they are of a rather more contented nature. They do not average so large in size as the Bronze, but where grown they are highly valued. Some declare that the Narragansetts will reach market size and condition in less time than the Bronze turkeys, but the writer has not been able to ascertain the truth of this statement.

Balanced Ration For Fowls.

You cannot well overestimate the value of cut clover hay for fowls, says a Kansas correspondent of Farmers' Advocate. As a balanced ration good, well cured clover hay will come as near balancing an exclusive grain ration as anything I know of. If eastern poultrymen could only see our prepared alfalfa clover hay as we raise it in the west and see how greedily our fowls eat it up and relish it they would put out a good acreage of alfalfa. Alfalfa is much ahead of all other clovers, and fowls like it much better than the common red clover. When well prepared, with the leaves on, which is easily done if the clover is cut before it comes into bloom, this hay in connection with green cut bone and the ordinary grain ration will give results in winter egg production. A fine quality of hay may be used without cutting to good advantage, but a clover hay cutter is certainly to be recommended.

The World's Largest Egg Farm.

What is said to be the largest egg farm in the world is owned and managed by C. E. L. Hayward at Hancock, N. H. It has now over 8,000 hens, kept in 660 small houses, fourteen in each.

The hens are never allowed outside their little eight foot square coops and are never fed green food, contrary to the teachings of all other poultry keepers. Each hen gets about a quarter of a pound per day of beef scraps, gluten hominy feed, wheat, etc., with a little salt, ground shells, grit and charcoal and plenty of clean water. They average 100 eggs each during the year, for which the high average of 26 cents a dozen is received, or a total of $2.17. It costs about $1.17 each for feed, so that the profit on each hen is about $1. Only young hens are kept. The second year they are sold, and pullets are bought for the next year's egg crop.

Raising Ducks on the Farm.

The farmer with his acres of range and feed grown at lower cost can produce ducks at much less expense than the exclusive duck raiser, says H. A. Nourse in Reliable Poultry Journal. That the latter finds the work profitable his continuance in the work year after year, with constantly increasing business and no other source of revenue, amply testifies. Then if the farmer can produce the same quality at less cost and sell it for the same price, and he certainly can if he earnestly tries, the difference in cost represents pretty closely the increased profit within the farmer's reach to be secured by no more application than he yearly devotes to other branches of farm industry which offer less reward.

THE GRANGE

Conducted by
J. W. DARROW, Chatham, N. Y.,
Press Correspondent New York State Grange

AN IMPORTANT SUBJECT.

The Grange and the Press Discussed by Miss Clara McDermid.

[Special Correspondence.]

It has long been my conviction that the grange does not half appreciate the value of bright, judicious and persistent newspaper reporting. In my very limited experience I have been much impressed with the large returns for the labor expended. I have many times been surprised at the number of people outside the Order who tell me that they regularly read the grange reports and at the interest displayed in quarters where I least expected it. In interesting people in the grange or in anything else we have at heart the personal touch is indispensable, but it alone is too slow and laborious to accomplish all that we need to accomplish. We need the publicity which only the newspaper can give us, and this, supplemented by the warm human touch, will awaken a friendly interest which will, I believe, in time draw to us the men and women whom we need and who need our Order.

But in emphasizing the value of press work I must insist on the high quality of that work. Nothing should be reported which is not interesting to the public and creditable to the grange. The reports must not be commonplace either in style or in subject matter. They must be clear, concise and bright. Some one says that selection is one of the highest mental qualities. Certainly it is one which is peculiarly necessary to the grange reporter. The ability to seize the salient points and state them clearly and forcibly, ignoring those of less importance, is a prime requisite. If addresses or discussions are to be reported it is imperative that the speaker be not misquoted nor his views misrepresented. If the subject is an achievement of the grange, exaggerated statements or any attempt at fine writing is to be studiously avoided. Overstatement and bombast will bring the grange into ridicule and disrepute.

Systematic press work on a large scale is a recent development and a promising one. Very efficient work is being done in New York, whose state grange maintains a press correspondent who sends out a monthly bulletin of grange news to 400 newspapers of that state. Without doubt this widespread advertising contributes much to the success of this leading grange state. The correspondent also furnishes to the American Press Association a grange page, which is used by about 150 papers in various parts of the United States. The same correspondent supplies grange matter to a syndicate of some fifty daily papers carrying a daily agricultural department and having a combined circulation of about 1,500,000, as stated in the report of the correspondent to the national grange. Grange leaders everywhere recognize the great value to the Order of this service, and it seems only a question of time when it will become even more far reaching and valuable in the extension of the Order. But while this systematic work covers the field more easily and completely than any other agency can it will always need to be supplemented by the bright, prompt, clearly expressed local correspondence.

Perhaps some mention should be made of the grange departments of various farm papers. Many of these are of little interest to the general public or indeed to the grange, because they are so evidently conducted in a perfunctory manner and are so painfully lacking in originality or force. There are some notable exceptions, however, which are helping to make the Order widely and favorably known. The contrast serves to illustrate the point I have tried to make—that presswork badly done is a byword and a reproach to the cause it serves. Skillfully and conscientiously done it is a most effective agency for strengthening and extending the work and influence of the grange.

CLARA M'DERMID.

Battle Creek, Mich.

New Jersey State Grange.

The thirty-second annual session of the New Jersey state grange was held at Trenton. The secretary's report showed the membership to be 7,000 in that state. The deputies' reports showed increased interest in the Order throughout the state and especially commended the field meetings in the summer as a means of increasing the membership. Resolutions were adopted favoring a direct vote for United States senators, advocating stricter regulations for automobilists, favoring the parcels post law, opposing the repeal of the oleo law and favoring antitrust laws. G. W. F. Gaunt was re-elected master of the state grange.

Nails

Had Turned Blue—Limbs Bloated.

Lay in a Stupor From Heart Disease.

Dr. Miles' Heart Cure Cured Me.

The nails turning blue is a sign of defective circulation as is the bloating of the arms and legs. Other common symptoms of heart disease are shortness of breath from slight exertion, pain in or near heart, smothering spells, palpitation or fluttering, weak, tired and hungry spells, dreaming and nightmare, sudden starting in sleep. In severe cases the brain, stomach, lungs, etc., may become so disordered as to mislead the physicians as to the nature of the disease. If you suffer from any or all of these symptoms your heart is diseased and treatment should not be postponed a single day. Dr. Miles' Heart Cure is guaranteed to help you as it has helped thousands of others.

"I owe my life to Dr. Miles' Heart Cure. After four doctors met in consultation on my case, their verdict was that I had suffered from heart disease so long that they could do nothing for me and I would surely die. My brother said, 'While there is life there is hope, we will try Dr. Miles' New Heart Cure.' When I began taking it my nails had turned blue and my arms and legs were bloated to twice their natural size, and I lay in a stupor most of the time. After the first few doses the dizziness went away and after three bottles I was able to go around the house and do my work. Both my family and my nurse think I would have been in my grave had it not been for Dr. Miles' Heart Cure."—MRS. ROBERT MORRIS, Sackets Harbor, N. Y.

All druggists sell and guarantee first bottle Dr. Miles' Remedies. Send for free book on Nervous and Heart Diseases. Address Dr. Miles Medical Co., Elkhart, Ind.

GOOD NEWS comes from those who take Hood's Sarsaparilla for scrofula, dyspepsia and rheumatism. Reports agree that HOOD'S CURES

tractor. It goes without saying that the Industrial School is doing good work, and is deserving of the encouragement and sympathy of the people of New Hampshire.

Soldiers' Home.

The New Hampshire Soldiers' Home has been in operation now about fifteen years, and has gained a deserved repute as one of the most beneficent institutions of the State.

No body of men better deserve the care and liberal support of the State than the veteran soldiers who have served her faithfully, carried her flag on many battle-fields and brought it home unsullied. More than five hundred needy veterans have already been cared for at the Home, of whom 150 have died there, and had their last days made comfortable.

We have every reason to commend the management of this institution as from the beginning wise, kind and economical.

It is worthy of a continuance of public favor and should be supported by an appropriation liberal enough to insure its continued usefulness.

National Guard.

The National Guard is organized as a compact and efficient brigade of two twelve company regiments of infantry, one light battery, a troop of cavalry, a signal corps and hospital corps, with a total strength of 112 officers and 1266 enlisted men.

The troops are well uniformed, and, except in the matter of rifles, are well equipped, there being on hand a complete field equipment for one thousand men, so that a full regiment could be put into active service at once.

The rifles, with the exception of eight in each company, are old and obsolete. An effort has been made, and will be repeated to secure for the State the latest and best rifle, the standard arm of the United States Army, as provided by Act of Congress.

The drill and discipline of the force is good and improvement is constantly being made from year to year. The interest in rifle and revolver practice is growing stronger and stronger each season and a large percent of the men have qualified as "Marksmen," "Sharpshooters" and "Experts."

Taking into consideration the many difficulties with which officers have to contend, in the way of lack of proper armories, the National Guard of New Hampshire will compare favorably with that of any State.

Some slight changes in the present State Militia Law may be necessary in order to conform to the requirements of the Militia Law of the United Sattes, under which the State is enabled to draw uniforms and equipments from the general government.

Forestry.

This important department of our public work has been prudently managed by the forestry commission to whom credit must be given for the chief advance made by us along the lines of rational forestry. The department as at present organized seems to me to be adequate for the work which the State might properly be called upon to undertake under the existing conditions, and I refer you to the commissioners' report for detailed information of the things accomplished and hoped for.

Education.

Unquestionably the most vital interest of the State at the present time is the education of her future citizens and workers. The very life of the commonwealth as a free and self-governing community depends upon the rearing of an honest and intelligent citizenship. The commercial and industrial prosperity of the State depends upon our ability to produce in each generation an ever increasing mass of intelligent, capable, efficient working and business men.

The State is directly interested in the work of our public school system, in the work of the Normal School at Plymouth, and in the work of the New Hampshire College at Durham. These are all essentially public institutions. I believe the character of the work being done in all is such that our citizens may well take pride in these institutions of the people. They bear a peculiar relation to the State, inasmuch as through them chiefly the State endeavors to open the door of opportunity to boys and girls of small means.

None the less is the State interested in our private schools, the academies and Dartmouth College. Their contribution to the public good is not different in kind from that of the public schools as they now are, as they always have been, of vast importance in the working out of our plan of education. The academies, under the recent high school law, are becoming more and more the public high schools of the town round about them and the opportunity thus opened to the children of these towns must be of incalculable benefit to them and to the State.

Recent school legislation has placed upon the statute books four laws of peculiarly beneficient import, the laws for the equilization of school privileges, the high school law, the attendance and employment law, and the law for the encouragement of supervisory districts. Upon the first two the State reaffirms the cardinal American principle—that all should have an equal chance in life. Children of the poorer and remoter towns cannot have the same educational chance as those in the wealthier and more populous centers unless the State comes forward with financial support. Under the last of the four laws, the State gives substantial form to its belief in the principle that schools will not ordinarily be efficient unless they are conducted on systematic and progressive lines, and under sound business management.

The fixed appropriations at the bases of these laws should be readjusted at this session. Experience has shown that a surplus tends to accumulate under the supervisory law and a deficit under the high school law. I recommend the passage of an act which will make the application of these annual appropriations more elastic and so better adapted to the end in view. The accumulation referred to should at once be made available for other school purposes.

In the end we cannot have good schools unless we have good teachers. I therefore recommend to your consideration all measures which tend to raise the standard of our teaching force. The profession of teaching should be surrounded with such conditions of compensation and security as to make it attractive to the strongest of our young men and young women. The State should in every way encourage such young persons thoroughly to prepare themselves for the teachers' career. To this end we should in the near future make more adequate provision for the normal training of the graduates of our high schools and academies. The experience of other States leaves little room for doubt that we might have several times as many young women preparing themselves for the office of teacher, as we now have, if there were more and larger normal school facilities within reach of the hundreds of high school graduates of high character and mental power, but of limited means.

Dartmouth College.

Dartmouth College under its great president confers a distinguished honor upon the State. For a century and a quarter the College has served the State by affording our youth the highest liberal education obtainable. A service which many of our sister States obtain only by the erection and maintenance of State Universities.

The ground on which the College asks the State for aid is that it costs the College to educate New Hampshire men in attendance a very considerable amount over and above the amount received in return by way of tuition or from the income of scholarships given for New Hampshire students.

The present catalogue shows eight hundred and fifty-seven men in the Academic department of the College, of which number two-hundred and seventeen are from New Hampshire, the proportion from New Hampshire being a little over one-fourth. The Treasurer's report shows that the total expenses of the college academic department were a few hundred under $200,000. The proportionate expense for New Hampshire men would be about $50,000. The amount received in tuition from New Hampshire men is about $18,000. To this add the amount received as income from the Second College Grant the past year, $2,783.83, and from the State Fund of 1883, $250.

The expense of educating New Hampshire students at Dartmouth is very much reduced below what it would cost if the State undertook to carry on a college or univershity of the grade of Dartmouth for the two hundred or more New Hampshire students.

It is, of course, very much more to the advantage of students to be associated with six hundred men from other States than it would be to be educated alone, as well as to have the benefit of instruction and equipment which the larger number demands.

It having became the definitely established policy of the State to make substantial appropriation for the benefit of Dartmouth College I most earnestly hope that the debt we owe to this splendid New Hampshire institution which has been frankly recognized by successive General Courts will receive your careful and generous consideration.

Agricultural College.

The New Hampshire College of Agricultural and the Mechanic Arts is a part of the public school system of the State.

It stands in its agricultural, mechanical, engineering, electrical-engineering, technical chemistry and general scientific courses in the same relation to the high schools that the high schools stand to the grammar schools, and that these in turn stand to the elementary schools. It is a continuation of the grades of the public school system of the State with special reference to the in[illegible] It aims to give a pra[illegible] that shall fit the stude[illegible] with the problems of life.

The college receives from the National Government about $45,000 annually and will receive from the Thompson Trust Fund about $32,000 yearly after 1910.

For the next five years it will be necessary for the State to make such appropriations as you deem wise for current expenses.

The College is required by act of Congress to give instruction in military science and military drill; to assist the college in this work the Government loans guns, sabers, swords and other army accoutrement. At the present time there is no suitable room in which to store this material. There is no hall large enough for indoor drill during the winter months, nor class room or office for the Professor of Military Science, who is detailed from the United States Army without cost to the College. This utter lack of facilities for instruction in military science has been the cause of frequent sharp criticism from the War Department.

The College is also badly in need of a gymnasium where students may be required to take physical training.

On Sept. 20th, 1903, the President's residence was destroyed by fire. Not having college funds available for rebuilding the trustees accepted the offer of Hon. Walter M. Parker, of Manchester, to build such a house as the Board of Trustees directed, at his own private expense, with the agreement that the College should have the privilege of buying it at the actual cost at any time it desired to do so by paying 4 percent interest on the money invested, and keeping up the insurance and repairs. The cost of the building was, I understand, about $5,500.

You will be requested to make appropriation for these several buildings. If with due regard for the taxpayers of the State, in your judgment it can be done, they will meet with my approval.

Agriculture.

The farmers of New Hampshire share in the prosperity which prevails throughout the Country and in our State in particular the State Board of Agriculture has done, and is doing, a very important work in promoting the best interests of farmers. Agricultural College, Farmers' Institutes and Experiment Stations are directly traceable to the influence of State Boards of Agriculture.

The National Government now makes an annual appropriation of $15,000 per year for experiment stations and a bill now pending before Congress proposes to increase the appropriation to $30,000.

When we consider the size and importance of the farming industry we are impressed with the fact that New Hampshire has done little in the way of legislation, or appropriation for the great agricultural interests. Of course, the reason why so little has been done is that farmers as a class are the most intelligent, independent and self-reliant class of our citizens and yet because they have not been clamorous for favors in the past is no reason why we should not be liberal in our treatment of their demands now. The Horticultural Society and Dairymans' Association have received very meagre State aid. They are both doing a splendid service to the State and should be treated with the consideration that their great impoltance demands.

Manufactures.

The manufacturing industries of our State are in a very prosperous condition. 1454 establishments reporting to the Bureau of Labor for the year 1903 show an increase of production over the previous year amounting in value to $15,312,402, an increase in the number of wage earners of 1256, and an increase in the total amount of wages paid of $2,601,287.

The manufacture of cotton cloth continues to be the leading manufacturing industry.

Twenty-three cotton mills with a capital of $23,436,200 produced last year $34,288,527 worth of cotton cloth, showing the remarkable increase of $5,595,527 over 1902.

The Boot and Shoe industry ranks next to cotton in importance. Sixty-one establishments with a capital of $5,797,786, employing 12,370 hands, produced last year $23,870,231 worth of boots and shoes.

There has been a very gratifying increase the past year in nearly all the manufacturing industries of the State, notably in the Granite, Lumber, Machinery, Paper and Woolen business.

The splendid progress made in all our manufacturing industries could not have been achieved were it not for the amicable relations which exist between capital and labor. There is probably no manufacturing State in the Union where there have been so few strikes, lockouts and shut-downs. It would not seem that laws under which these conditions have existed for so long need radical amendment.

Liquor Laws.

The law entitled, "An Act to regulate the traffic in intoxicating liquors," approved March 27th, 1903, created a new condition in this State as regards the sale of intoxicating liquors. For nearly 50 years we had on our statute books very stringent prohibitory laws, the practical workings of which had been very unsatisfactory. To the friends of temperance and to those people who believe that under certain conditions and restrictions it should be lawful to sell liquor. The present law has been in operation since April 1st, 1903, and while it is probable that it is not perfect in all its details I am convinced that there are very few who would advocate a return to the conditions that existed prior to the passage of the present law. From the report of the State Board of License Commissioners I quote the following statistics:

"In 1903 there were 57 towns and 11 cities which voted for license. In 1904 there were 47 towns which voted for license, no cities voting. The number of licenses issued in 1903 was 1,085, of which 234 were to druggists. The number of licenses issued in 1904 was 1,017, of which 216 were to druggists. The amount received from licenses in 1903 was $340,505.29. The amount received from licenses in 1904 (up to Dec. 17th) was $345,752.21. Total amount received from licenses from April 1st, 1903, to Dec. 17th, 1904, $[illegible]26,846.55.

Fish and Game Laws.

The wisdom of our Game Laws is becoming more evident each year. Deer are more numerous than they have been for a hundred years. Fish are abundant in lakes and streams, furnishing sport to our own citizens and the thousands of visitors who yearly visit our State in search of health and recreation. Some of the lakes have been screened to prevent the escape of salmon to other waters. There seems to be some question how far we should go in the matter of screening lakes and ponds. I advise conservative action in this direction.

Bureau of Labor.

The Bureau of Labor which was created for the purpose of obtaining the industrial statistics of the State has been a very important factor in producing the excellent understanding which exists between capital and labor.

You may find it necessary to make some slight changes in the law to enable the Bureau of Labor to co-operate with the United States Census Bureau in obtaining the industrial statistics of New Hampshire.

Preservation of the Town Records.

While this State has not been derelict in recent years in the adoption of effective measures for preservation of its archives and the publication of such parts of them as the obligations of the State in this behalf has made advisable, it may be a question whether sufficient attention has been bestowed upon the subject of the due preservation of town records, especially those that cover the early years of the corporated existences of the municipality, and the devising of plans for rendering the contents of these records more available for reference as well as more secure from loss by fire, mutilation, unreasonable wear and tear, obliteration of the text by the natural effects of time, not to mention the more gross forms of scandalism to which all records not properly cared for are constantly exposed. Many complete and many partial sets of town records have been totally consumed by fire; others have been lost by the indifference of the lawful custodians; and still others have been purposely destroyed. The consideration of this subject is respectfully suggested as the same results that have followed from conditions existing in the past must be expected to recur in the future unless an effective remedial policy can be discovered and adopted.

Roads.

No more important question will come before the General Court this session than that of Good Roads.

For many years it has been the policy of the State to make special appropriation for the improvement of highways in certain sections of the State. The result is that in those counties where most of the money has been used the roads are much better than elsewhere.

I am of the opinion that the time has come when we should adopt a comprehensive plan which shall be general in its application for the purpose of giving State aid for the improvement of Public Highways.

Under the authority of a law passed by the last General Court a State Engineer was appointed who has made very complete maps of our roads. His report, together with the report and recommendations of the Governor and Council, will soon be laid before you, and I have no doubt they will contain valuable information for your guidance.

Automobiles.

There should be a law regulating the use of Automobiles. It should provide that operators be licensed and machines be registered. A reasonable speed limit should be established.

State House Improvements.

The proposed improvements in the State House meets with my unqualified approval. The exhaustive report of Governor Bachelder and his Council, which will soon be in your hands, states the reasons and arguments why this work should be done at once, in a way convincing and unanswerable.

If after due consideration you conclude the interests of the State require these improvements to be made, I would recommend that long-time bonds be issued for the purpose of procuring the necessary funds.

Conclusion.

In conclusion, I have given you such information concerning the affairs of the State as reasonable limits of time and space will permit.

I trust we are all impressed with the honorable and responsible duties we owe to the people of New Hampshire. From us they will expect, and have a right to expect, a high standard of capacity and integrity. Let us so discharge our duties as to set an example of integrity, of purpose and fidelity in action which will bring lasting benefits to the people and be a source of just pride to ourselves.

Conscious of her splendid past and buoyant with hope for her future, let us all work for the honor and glory of the good old State of New Hampshire.

Poultry Notes.

It isn't a bad idea by any means to put a little pine tar in the drinking vessels at this time of the year. It will help to ward off disease and keep the fowls healthy.

Provide plenty of dust in the poultry house and runs for the winter.

Too much salt in the food produces too great thirst, often resulting in ruptured crop. Season same as for your own eating.

The object in caponizing is to improve the quality and increase the quantity of the flesh in fowls and hence receive better prices.

If the most prolific hens were retained and the most worthless ones marketed, a great improvement would result. It is the keeping of drones that makes the expenses large and the receipts small.

Filth and Disease.

Filthy houses and yards invite disease, and only failure can result where filth is allowed to accumulate.

BUY THE NEW HOME SEWING MACHINE

Do not be deceived by those who advertise a $60.00 Sewing Machine for $20.00. This kind of a machine can be bought from us or any of our dealers from $15.00 to $18.00.
