## RAILROAD WAGES

Shall they be determined by Industrial Warfare or Federal Inquiry?

To the American Public:

Do you believe in arbitration or industrial warfare?

The train employes on all the railroads are voting whether they will give their leaders authority to tie up the commerce of the country to enforce their demands for a 100 million dollar wage increase.

The railroads are in the public service—your service. This army of employes is in the public service—your service.

You pay for rail transportation 3 billion dollars a year, and 44 cents out of every dollar from you goes to the employes.

On all the Eastern Railroads in 1915, seventy-five per cent of the train employes earned these wages (lowest, highest, and average of all) as shown by the payrolls—

	Passenger		Freight		Yard	
	Range	Average	Range	Average	Range	Average
Engineers	\$1641 3224	\$1931	\$1585 2992	\$1783	\$1303 2178	\$1543
Conductors	1553 3004	1831	1552 2901	1642	1145 1991	1315
Firemen	951 1704	1128	933 1762	1109	752 1633	935
Brakemen	957 1707	1141	862 1521	973	834 1635	1085

The average yearly wage payments to all Eastern train employes (including those who worked only part of the year) as shown by the 1915 payrolls were—

	Passenger	Freights	Yard
Engineers	\$1796	\$1546	\$1384
Conductors	1724	1404	1238
Firemen	1033	903	844
Brakemen	1018	858	990

A 100 million dollar wage increase for men in freight and yard service (less than one-fifth of all employes) is equal to a 5 per cent advance in all freight rates.

The managers of the railroads, as trustees for the public, have no right to place this burden on the cost of transportation to you without a clear mandate from a public tribunal speaking for you.

The railroads have proposed the settlement of this controversy either under the existing national arbitration law, or by reference to the Interstate Commerce Commission. This offer has been refused by the employes' representatives.

Shall a nation-wide strike or an investigation under the Government determine this issue?

### National Conference Committee of the Railways

ELISHA LEE, Chairman.	A. S. GREGG, Asst. to President, St. Louis & San Francisco Railroad.

### Antrim Baptist Church

W. J. B. Cannell, Pastor

July 20, mid-week prayer meeting 7.30 p. m. Topic, "God's Providence." Exod. 34: 6, 7; 2 Pet. 3: 9.

July 23, Morning service 10.45 a. m. Sunday school 11.30 a. m. Evening service at 7.00.

July 25, Y. P. S. C. E. 7.30 p. m. Topic, "The Church is Blessing our Nation." Exod. 19: 41-48. Leader, Rev. W. J. B. Cannell.

It is expected that there will be a social picnic soon.

### Heath—Paige

Morris Christie Heath and Miss Ruth M. Paige were married last Wednesday evening by Rev. Stephen P. Brownell, pastor of the Presbyterian church, the ceremony being performed at the Presbyterian manse, and only the contracting parties being present. The wedding came as a surprise to many of the town's people as all arrangements had been kept secret as far as possible, and only the immediate members of the two families and a few friends knew when the event was scheduled to take place. Mr. Heath is the only child of Mr. and Mrs. Edward F. Heath. He at-

### A SPECTACULAR DRAMA

"Undine" is a Masterpiece of Motion Photoplays

Going to the famous French classic, "Undine," written by Fouquet, the promoters of Bluebird Photoplays have found the basis of one of the most beautiful features ever presented upon the screen.

While this is a most famous fairy tale, the producers have provided such marvellous beauties to impersonate Queen Unda and her under-sea Court; have found in the Catalina Islands, off the coast of California, such entrancing vistas of sea, forest and shore, that the picture is at once a scenic marvel and photographic delight.

"Undine" promises many revelations on the art of reproducing scenes of fairy revelry by night; the charm of Pacific sunsets, among the caves and grottoes of the Catalina Islands; in forest scenes and the rugged landscapes of the western coast. There was no need to go to the tropics for settings in which to frame the story of "Undine."

The story is in itself mortal, moral, and elevating in its purpose—for it points out the punishment that comes to fickle-hearted man, and shows how womankind can best apply the reproof for inconstancy to those who fall in their standards.

In this feature there are many scenes devoted to the realm of Unda, queen of the vasty deep. As nymphs and mermaids know absolutely nothing about high-heeled shoes, short skirts, flowing trains and evening gowns, the matter of costuming became at once a problem that was not. With the girls wrapped in seaweed, sheltered by the bright rays of the sun or hidden close to the surface by the clear waters of the Pacific, the camera-man took every possible advantage of his opportunity to picture the graceful lines and equally graceful contortions of the swimming, diving and playful nymphs.

Miss Ida Schnall, renowned for her perfection of figure and her prowess as an athlete, swimmer and high-diver, leads the delegation of beauties who perform many and various diverting evolutions, while the camera-man has pictured them. One of the greatest achievements in high-diving is shown in Miss Schnall's plunge into the Pacific from a height of 130 feet.

Scenes in the Enchanted Forest are proportionally beautiful. The science of motion picture illusion has developed some wondrously beautiful scenes; and with the backing of nature itself, to enhance the clever work of the producer, the outcome constitutes one of the most perfect examples of motion photography that has ever been shown upon the screen.

This dramatic spectacle will be shown at Town Hall, Antrim, on Saturday evening of this week, July 22. In excellence it compares most favorably with the biggest attractions which have been exhibited here, or in this vicinity, for a long time. Don't miss seeing this feature! Admission 20c and 10c.

No show To-Night, Wednesday, the 19th.

tended the Antrim schools, and for some time past has been employed in the grocery store of Walter H. Robinson, where he has made many friends throughout the town. He is a member of the Presbyterian church, and has served as janitor for the society for some months.

The bride is the elder daughter of Mr. and Mrs. Morton Paige, and graduated from the High school in the class of 1912. She has been employed in a millinery store at Peterboro until a few weeks ago when she was badly burned on the hands by electricity in the series of accidents which occurred at that time in Peterboro. Since then Mrs. Heath has been recovering from her injuries, and is now considerably improved in health. She is also a member of the Presbyterian church.

After the ceremony the newlyweds left town for a short auto ride, returning to the bridegroom's home for the night. Here they were serenaded by some of the young people. Mr. and Mrs. Heath will make their home in town. Congratulations and best wishes are extended.

Typewriter Ribbons, for sale at Reporter Office, or by mail. Price 50 cents each.

### IN 11 INNINGS

Henniker Wins from Antrim, 8 to 7

At Henniker last Saturday a queer exhibition of the national sport was given by the team of that town and the Antrims.

For eight innings Antrim kept well in the lead, but although a total of 14 hits were captured by our lads and only half as many by their opponents, the reason that the game went to the Hennikers is readily seen by looking at the total of errors by each: Antrim 10, Henniker 5!

An eighth inning rally and a little bad luck tied the score in the ninth and two extra innings were required to settle the matter, the winning run being made by Emerson on a poor throw to home plate.

Hillsboro plays here on Saturday afternoon, July 22.

The score:

	A	B	R	H	P	O	A	E
Antrim	7	1	2	4	0	0	0	0

### NEWS FROM THE CAMP

The Reporter's Correspondent

Camp Spaulding,  
Concord, N. H.,  
July 18, 1916.

Editor The Reporter,  
Antrim, N. H.

Dear Sir:—

Since the last writing there has been a great change on the field here in Concord with all the men from the 1st N. H. Infantry moved to the border. There are now about 250 men and officers left on the grounds.

Recruits are coming in slow and it is hoped that there will be enough men to fill up the Companies remaining with men from New Hampshire instead of picking up down on the border.

Orders have been received from Washington not to send any more men from mobilizing points until fully equipped for active service.

Monday night Troop A had 76 enlisted men and three officers. The Signal Corps and Field Hospital averaging about the same.

The boys have now become acclimated to the Camp grounds, and sickness has practically disappeared.

Awaiting more recruits,  
Yours truly,  
H. E. Paige.

### Efforts Appreciated

The Editor of The Antrim Reporter desires to thus publicly extend his thanks to the White Birch Point Association for the favor so generously bestowed upon him at its last regular meeting in voting him paid-up membership in the Association for 1916. This favor coming so unexpectedly and without any previous knowledge on our part that such action was being considered by its members makes the act much more pleasing and also makes us feel that our efforts along the lines of town improvement are appreciated.

### Act Quickly

Delay Has Been Dangerous in Antrim

Do the right thing at the right time.

Act quickly in time of danger. In time of kidney danger Doan's Kidney Pills are most effective.

Plenty of evidence of their worth.

James L. Hill, 59 Concord St., Peterboro, N. H., says: "Kidney trouble came on me gradually over a course of several years, until at last it became so severe that I realized that I would have to take something for it. My kidneys were very much disordered and acted so frequently that I was sometimes compelled to get up six or seven times during the night. My back became so lame and sore that it was difficult for me to arise from a chair or to straighten up after I had stooped. I used three boxes of Doan's Kidney Pills in all and they not only removed the pains from my back but also regulated the action of my kidneys."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Hill had. Foster-Milburn Co., Props., Buffalo, N. Y. adv.

### REPUBLICAN CANDIDATE

For Representative Will File the Necessary Papers

During the last week we have very naturally heard much concerning the man who is to represent Antrim in the next General Court, by consent of the voters. It is a laudable ambition to represent the town in the legislature, and Antrim has sent some very good men.

The writer has been approached by several men of late in an effort to have him enter the contest and allow his name to go upon the primary ballot as a candidate for Representative on the Republican ticket. Realizing as he does that this is one of his great privileges and also being made of the kind of Republicanism that has constantly stood by the principles of the party, he feels that he has an equal right with any man (if no more) to be a candidate at this time; and has consented to file the necessary papers to be voted for at the primary the fifth day of September.

There seems no need of saying that if nominated I shall do my utmost to be elected, and if elected shall give my best efforts to serve the town conscientiously; and in my position knowing Antrim's needs as very few other men do, it will be an advantage to the town to have her newspaper man in the legislative halls at Concord.

To every voter in the town who believes I will satisfactorily represent the town of Antrim, I am addressing this statement, and ask for your votes in the primary; and if nominated I shall be most happy to count you among the ones who will vote for me on election day. In return for your favors in this direction I shall give you the best service I know how to give, as I always have in the town offices I have held. In my twenty and more years' residence among you, it has always been my pleasant duty to work for the best interests of the town; my record has been such that I feel in asking for this additional favor I shall be able to give value received, and will thank you for your support.

HIRAM W. ELDRIDGE.

### Resolutions

On the Death of Brother Earle James Thompson, by Waverley Lodge, No. 59, I. O. O. F.

Whereas, in His infinite wisdom, God has seen fit to remove from our membership one of our brothers, Earle James Thompson, therefore,

Resolved, that we bow in humble submission to the will of our Heavenly Father, in the loss of our departed brother; and further that we place on record our appreciation of his worth, and extend to the afflicted family our heartfelt sympathy.

Resolved, that copies of these resolutions be spread upon our records, be sent to the family, and published in The Antrim Reporter.

H. W. Eldredge,  
M. D. Cooper,  
Allan Gerrard,  
Committee.

NEWS OF THE GRANITE STATE

First Regiment N. H. I., Leaves For the Border COL. HEALEY IN COMMAND Three Troop Trains Required to Transport Men—Portsmouth May be Coal Port Again—Other Items of Interest.

Concord—The first Regiment New Hampshire Infantry, Col. Michael J. Healey, started Saturday afternoon for Laredo, Texas, via Chicago, Kansas City and San Antonio. The trip is made in three troop trains and the start was made from this city between four and five o'clock. The men in camp were paid off until July first in the morning, and at noon were reviewed by Governor Spaulding. When the regiment marched from the camp to the station it was met at Main street by an escort of veterans of the Civil and Spanish wars led by Gen. J. N. Patterson, who fought in both, and by Adj. Gen. Frank Battles of the G. A. R. Main street was ablaze with flags along the whole route, and was lined with thousands of cheering people. Gov. Spaulding, with several members of his council, again reviewed the troops from the balcony of the Eagle hotel. Camp Spaulding will not be closed with the departure of the infantry, as the battery, cavalry, signal corps and field hospital have as yet received no orders to go south. The infantry had in round numbers 1000 men when it left Concord. It is thought the departure might have been longer delayed but for the fact that the men were getting restless, and either wanted to go to the border or return to their homes.

Hoppers Are Gone. Franklin—For several seasons grasshoppers have committed such ravages on some of the farms in the vicinity of the Orphans' Home that crops have been utterly ruined. Last year a determined effort was made by the county agent, assisted by the state college and the Federal bureau of entomology, to wipe out the pests. Their efforts were so successful that this year there are very few grasshoppers, where in seasons past they have eaten nearly everything, and a good crop of hay is being harvested. It is thought that it will be several seasons before they will be back in force again.

Charged With Stealing His Pension. Portsmouth—Cora Starkey, aged 48, was arraigned in municipal court Friday, charged with the larceny of \$60 from O. B. Russ of this city. Russ is a veteran of the Civil War, who is laid up with a bad leg. The woman came to his house for the purpose of attending to his wants, and while she was there he gave her some money for the purpose of making purchases. After she went away he found that the whole of his pension money, which he had just received, was missing. She was held in \$400.

May Will be Burned. Dalton—Nearly 200 acres of the choicest hay lands in this town have been quarantined by Commissioner Andrew L. Felker of the state department of agriculture in his effort to stamp out the anthrax epidemic. In some cases entire fields have been quarantined and in others a dividing line has been drawn. The fields will be burned over later in the season, and it is hoped that after this year the danger of infection will have passed.

Had Been Printer, Editor and Postmaster.

Suncook—Ex-postmaster Eugene Lane died Saturday at his home in this village. He came here in 1881 and was printer and manager of the local paper. In 1888 he was appointed postmaster and held the office for 16 years. For 22 years he was a member of the Republican town committee, and had represented his town in the legislature. He was 60 years old and is survived by a wife and daughter.

Girl Camper is Drowned. Suncook—Dorothy Harwood, aged 13, one of a party of campers here, was drowned while bathing Friday afternoon in one of the inlets of the Suncook river. She stepped into a hole 15 feet in depth, and although she was taken from the water within five minutes, could not be resuscitated. She was the eldest daughter of Rev. T. W. Harwood, pastor of the Pembroke Congregational Church.

Man and Barrow Fall 30 Feet. Manchester—Thursday afternoon Sid Williams, a Syrian workman, was pushing a barrow load of bricks along a plank on top of a four-story building in process of construction in this city. The wheel ran off the narrow plank and man, barrow and bricks landed on the sidewalk 30 feet below. The barrow was smashed into splinters, but aside from severe cuts the man escaped serious injury and without broken bones. He was taken to a hospital, where his recovery is expected.

Little Girl Struck by Train. Henniker—Little Annabel Mathews, two and a half years old, wandered onto the railroad track Friday morning and was struck by a train. The track runs directly back of the house and she had been left alone for a few minutes. Her skull was fractured and she received many bruises. She was taken to a Concord hospital in an auto. She is the daughter of Mr. and Mrs. Harry Mathews.

Boy Drowns When Canoe Capsizes. Orford—William Hall, aged 14, son of Mr. and Mrs. W. B. Hall of this town, was drowned at Lake Morey Saturday evening. With a companion he started from the casino for a canoe trip, but had gone but a short distance when it capsized. Two men went out in a boat and rescued Hall's companion, but when the body of Hall was recovered all efforts at resuscitation were unavailing.

Portsmouth May be a Coal Port Again.

Portsmouth—The H. James Roughan estate of Charlestown, Mass., has sold the huge coal pockets in this city to the Boston & Maine railroad. The plant has been inactive since the opening of the European war. It is said the price paid was \$75,000, and it has been suggested that the Amoskeag company of Manchester might take a lease of the property.

Wanted for Dental Thefts. Manchester—Several dental offices in this city and Concord have been burglarized recently and gold to the value of \$400 stolen. A good description of the man wanted has been sent broadcast and Friday the police of Fitchburg, Mass., arrested a man in a dental office in that city who fully answers the description of burglar. He was brought to this city Friday evening.

President Nichols Leaves Hanover. Hanover—Dr. Ernest Fox Nichols, whose term as president of Dartmouth college expired June 30, left town Saturday for Battle Creek, Mich., where they will remain for a time for the benefit of Mrs. Nichols' health. Their goods have been shipped to New Haven where Dr. Nichols will take up his work in Yale University with the beginning of the next college year.

Work of the Concord S. P. C. A. Concord—The Concord Society for the Prevention of Cruelty to Animals attended to 191 cases during the six months ending June 30. Of the 114 horses looked after, 11 were killed, and of the 37 cats 33 were killed. Among the offenders one received a sentence of four months in jail and another was fined \$25.

Mrs. Keyes Undergoes an Operation. Woodsville—Mrs. Harry W. Keyes, who has been in impaired health for sometime, underwent an operation at a Boston hospital Friday. She stood the ordeal so well that Mr. Keyes went home that night in order to attend an important meeting here Saturday, after which he returned to Boston.

Found Parcel Post Package. Dover—One afternoon last week the American Express agent found a parcel post package in a pile of boxes in rear of the express office. It was a dress suit case addressed to Rochester parties and was insured. It had evidently been stolen from the baggage truck at the station here.

Arm Caught in Saw. Antrim—While at work in his saw mill Friday, Walter T. Poor had his arm caught in a saw. A deep gash was cut in the flesh and an artery and veins severed. A physician was promptly on the spot and after taking up the severed artery, took seven stitches to close the wound.

Will Have \$75,000 School House. Laconia—At a largely attended meeting of the Laconia school district, Friday evening, the report of a committee to consider the needs of a high school was presented and considered. It was voted to build a new high school building to cost \$75,000.

Legs Broken in Ball Game. Lebanon—While taking part in a game of ball one night last week Fred Clement, employed on the block signal system, had his leg broken. He was standing on the base when a player made a home run and struck him in the leg.

House, Barn and Money Gone. Wilton—Fire was discovered in the barn of Fred Duval about 1:15 Thursday morning and both barn and house were a total loss. The barn had just been filled with hay and it is thought the fire was caused by spontaneous combustion. In the barn two cows and a lot of hens were burned and nothing was saved from the house. There was said to have been about \$500 in money in the house and this went up in smoke. The total loss is nearly \$5000.

Our Diet. One fundamental principle is that the diet, considered for any reasonable length of time, must supply a great variety of chemical substances combined in different ways for the "structural" needs of the body, and also must supply it with energy-yielding substances with which it may perform internal and external work. It seems apparent that a varied diet, reasonably generous in amount, is more likely to meet the body needs than one restricted or unvarying in its make-up or scant in quantity.

SHARKS HAVE FOUGHT MEN IN WATERS OF NEW ENGLAND

Varieties Number About a Score—Some 20 Feet Long

Boston—The man-eating shark, the tiger of the seas, has once for all settled the question as to whether his species will voluntarily attack man in shallow waters of the temperate zone. The violent deaths of four bathers on the Atlantic coast last week have decided a controversy which for half century has divided the ranks of naturalists.

For years many students of natural history have steadfastly asserted that the shark in North American waters is harmless. We have been told that none of the species has ever been known to attack a man, stories to the contrary being newspaper "fakes" or mere old wives' tales, and that sharks feed exclusively upon smaller fish and have no taste for animal or human flesh.

Some 20 years ago Hermann Oelrichs, the head of the North German Lloyd, offered a reward of \$500 for proof that sharks were dangerous in temperate waters. The reward was never claimed. Mr. Oelrichs was sceptical as to whether there were man-eaters even in the tropics, for he considered sharks harmless scavengers even there.

Despite the statements of the naturalists, however, persons who have followed the water for many years have always said that they would rather be almost anywhere except in "temperate waters" where sharks had been seen. Stories of shark attacks have been frequent and, as a matter of fact, human beings have been chased or bitten by the great fish in many places along the New England coast. Fatalities have been almost unknown, however.

In September, 1915, Anna McDonald, of Lawrence, was chased to the shore at Salisbury Beach by a shark which, when killed later, proved to be eight feet long, with a weight of 200 pounds. In August, 1907, a shark attacked 20 young women who were bathing at Rock Beach near New Haven, Ct., causing a panic. The shark dashed into the group fiercely, snapping about on all sides and evidently anxious for a fight. A group of men nearby rushed to the rescue and the fish was finally subdued with a bathook. This species also was eight feet long.

In October, 1910, John Johnson and Herman Nelson were attacked by two large sharks while fishing for pollock in their dory off Cape Ann. One of the fish weighed 300 pounds and had been safely stowed away in the boat when his mate jumped from the water clean into the craft and put up a tremendous fight before it could be subdued.

NEW ENGLAND FERTILIZER MANUFACTURERS

Attend Annual Meeting Held at Hot Springs, Va., June 10 to 16.

Practically all of the New England Fertilizer Manufacturers attended the Twenty-third Annual Convention of the National Fertilizer Association which was held at Hot Springs, Va., July 10th to 16th.

Prof. G. I. Christie, Superintendent of the Department of Agricultural Extension, Purdue University, was the principal speaker at the convention. His subject was "The New Agriculture."

He spoke in part as follows: "The present high cost of living would indicate that the production of food products is not keeping pace with consumption. Today there is but little new agricultural territory to be developed in the United States and the increase in farm products for the future must come in a large measure, from land already under cultivation. "Agriculture is the great business and industry of the state and country, and the farms must be brought to a high state of productivity to meet the demands of the rapidly increasing population. It is a problem of industrial efficiency as well as that of social co-operation. Comfortable homes, the best of schools, community churches, community centers, good roads and a more permanent and satisfying social life must be provided for.

"The large and rapidly increasing population makes an unprecedented demand upon the farmers for food stuffs. A study of statistics shows that the population of the United States has practically doubled every twenty-five years. "The Average yield of wheat in the United States for the past ten years was 14.3 bushels per acre. A few years ago the yield of wheat in England and Germany was really lower than that found in the United States. Through fertilization and a better crop system, these countries have been able to gradually increase the average yield of the wheat crop until at this time it ranges about 26 bushels per acre."

Prof. Christie explained the importance and development of the county agent movement throughout the country at considerable length and pointed out how the county agent works in connection with other agencies to bring about better schools, better churches, better roads and recognition of the country's greatest business and industry—Agriculture.

Stage leaves Express Office 15 minutes earlier than departure of train. Stage will call for passengers if word is left at the Express Office in Jameson Block. Passengers for the early morning train should leave word at Express Office the night before.

# LOOPING THE LOOP OVER LONDON

NEW BRITISH WARPLANE—  
Seven thousand feet above Hyde Park, an American girl looked straight ahead and saw "the roof of the sky" from one of England's newest warplanes

**I**n a British military aeroplane, painted black, and especially designed for pursuing Zeppelins at night, I flew across London and, at a height of 7,000 feet, looped the loop over Hyde Park, and in the New York Tribune Jane Anderson goes on to describe her experience:

I was permitted to make this flight, to start from one of Britain's finest aerodromes and see, spread in a clear-colored panorama one mile and a half below me, the houses and the streets of the greatest city in the world.

In the great field from which I started the turf was broken by patches of black mud and the grass was beaten down by heavy rain of the morning.

But, on the wooden runway, with her wheels blocked and her black "planes silhouetted against the sky, a biplane was waiting. She was beautiful—this machine. There was power in the sweep of her wings; there was power in the shining blades of her propeller.

Her two Lewis guns, of blue steel, were mounted on galvanized brackets, they were particularly businesslike—those guns.

I climbed aboard and was strapped in. The observer's seat, where I sat, was a wide seat, and the fuselage formed my arm rest. There was plenty of foot space. Captain X, who was my pilot, got into his seat behind me. To my right and above me a death's head design had been painted in white on the wing.

We circled the field, headed into the wind and were off. I mean, we dived up into the sky.

When we left the ground we left it. It was good climbing. It was good and stiff. The black nose of the biplane pointed straight to the sun. I saw, swiftly, visions of a stalled motor, of a rapid backward slide.

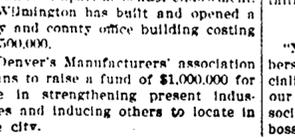

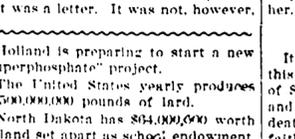

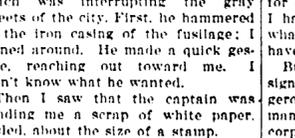

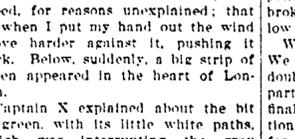

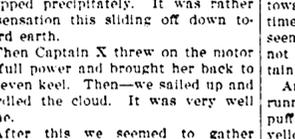

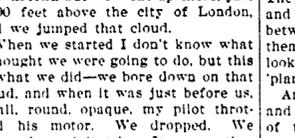

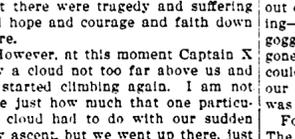

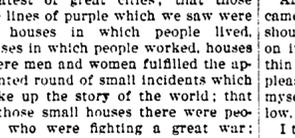

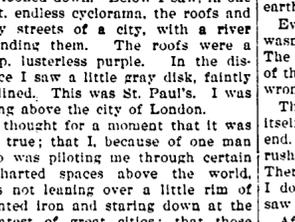

Below us the roofs of the hangars dropped away, and I saw, over the whirling propeller, the great curve of the Thames—the wide, splendid sweep of gray water, spanned by bridges.

Where two streets met there was a house with a red roof—a big house set a little apart from a long row of cottages. While I looked at this red roof the color of it changed; from a clear vermilion it became mauve—one small clear square of mauve.

I looked again at the big house with the red roof. But it had merged with the line of little cottages; it no longer stood apart with a strip of green separating it from its neighbors. I had come up 6,000 feet above a little village which is on the outskirts of London.

I saw, far below me, the white roads, crossing and recrossing, and the bright green of the fields. But there were no longer any people; there were no longer trams and buses and motors.

In this swift, upward climbing there was no sense of rising. Before me the blades of the propeller were flashing even in the gray light. I was filled with a sense of security.

of the windshield, a row of clear drops, like beads, forming and reforming. The white cloud was condensing to make bright crystals for us, little opalescent chains that broke, then fashioned themselves anew.

The mist in front of me cleared and the white vapor became transparent.

I looked down. Below I saw, in one vast, endless cyclorama, the roofs and gray streets of a city, with a river bounding them. The roofs were a deep, lustrous purple. In the distance I saw a little gray disk, faintly outlined. This was St. Paul's. I was flying above the city of London.

I thought for a moment that it was not true; that I, because of one man who was piloting me through certain uncharted spaces above the world, was not leaning over a little rim of painted iron and staring down at the greatest of great cities; that those fine lines of purple which we saw were not houses in which people lived, houses in which people worked, houses where men and women fulfilled the appointed round of small incidents which make up the story of the world; that in those small houses there were people who were fighting a great war; that there were tragedy and suffering and hope and courage and faith down there.

However, at this moment Captain X saw a cloud not too far above us and he started climbing again. I am not sure just how much that one particular cloud had to do with our sudden new ascent, but we went up there, just 7,000 feet above the city of London, and we jumped that cloud.

When we started I don't know what I thought we were going to do, but this is what we did—we bore down on that cloud, and when it was just before us, small, round, opaque, my pilot throttled his motor. We dropped. We dropped precipitately. It was rather a sensation this sliding off down toward earth.

Then Captain X threw on the motor to full power and brought her back to an even keel. Then—we sailed up and hurled the cloud. It was very well done.

After this we seemed to gather speed, for reasons unexplained; that is, when I put my hand out the wind drove harder against it, pushing it back. Below, suddenly, a big strip of green appeared in the heart of London.

Captain X explained about the bit of green, with its little white paths, which was interrupting the gray streets of the city. First, he hammered on the iron casing of the fuselage; I turned around. He made a quick gesture, reaching out toward me. I didn't know what he wanted.

Then I saw that the captain was handing me a scrap of white paper, folded, about the size of a stamp.

It was a letter. It was not, however, referring to the cow?

It is said that a gravestone bears this inscription: "Here lies the body of Samuel Holden, who died suddenly and unexpectedly by being kicked to death by a cow. Well done, good and faithful servant."

Her Particular Sphere.  
"Muh wife," boasted Brother Bombshay, "am de most prominent socialist in dis end o' town. Yeasah, our church never thinks o' givin' a social widout she's right dar to do de bossin'!"—Kansas City Star.

## Lost and Found

By VICTOR REDCLIFFE

(Copyright, 1918, by W. G. Chapman.)

It was his first ambitious venture in literature, and Adrian Moore had begun the reading of his little screed with fear and trembling. Then, as he got into the soul of his subject, he forgot self and was almost brilliant in his delivery.

All his former trepidation returned, however, as he came back to the harsh realities with the last sentence enunciated. It was a little skit of pathos, romance and description, the result of a two-weeks' vacation in "the cider country," downstate, just as antique and crude in the present as half a century before.

He faced his critics now—they were five. The "Chosen Six" comprised a club of newspaper writers who met and ate—and drank moderately—once a week in the rear room of a Greek restaurant. There, when they got warmed up, more than one of the group forgot stern unpractical routine stuff and for the first time a poem, a scenario, a magazine effort would see the light.

"It's just a dash-off," observed Moore almost apologetically as he sat down, and blunt Jerry Gowan, who wrote leaded editorials, in his usual unsympathetic way made the comment:

"Forget it." Clyde Winston, who was allowed to act as critic of second-rate books, simply yawned. There was Dan Cheever. "Great!" he declared, slapping Moore on the shoulder in his inevitable way. "Lengthen her out and give her a spin with the magazines."

"You've acquired some style," observed Jack Whisler. "It's refreshing, and tastes—fine local color, and all that—but more like a soda than a good bracing snifter."

All this was of no moment to Moore. He glanced anxiously at Rourke Vivian. He was the oldest of the party. He had done London, Paris, New York in a journalistic way, had written three books, spoke little, and then to a purpose. He sat now, his finely chiseled face half hidden by his hand, and said—nothing!

There was where the whip scoured, there lay the bitter sting for Moore! One word or look of approbation from Vivian would have been more to the aspiring young writer than all the others might put in volumes.

"Guess last night's extra has used me up," spoke Vivian at length, arising with a yawn. Then his lips set close, as though all this were a mask to conceal some unusual emotion. He rather evaded Moore, the latter thought. When Vivian was gone the group broke up. Moore was glad of it. His soul was bruised. He wished to be alone, to think.

"It fell flat," he soliloquized as he reached the outer air. "I won't try again." He thrust the manuscript into an inside coat pocket with a savage punch of his fist. Then he braced for a long walk. He was emptying out of his mind all the grand plans he had for a story, if his colleagues had given him the least encouragement—especially Vivian.

A favorite stroll of his was along the city edge, where a broken stretch had been developed into striking picturesque, and a number of fine residences had exclusive location. At one spot a pretty rustic bridge spanned a gully with a wayward stream trickling through. He paused there, leaning on the railing of the bridge.

The surroundings were magically entrancing in the clear white moonlight, and conducive to quiet thought, but Moore brooded. Something had gone out of his life. The first child of his brain had been ruthlessly banished.

"It's the humdrum dog trot and the bread and butter after this," he uttered, almost bitterly. "Good-by!" He jerked the roll of manuscript from his pocket in a resolute way and gave it a vehement fling far as he could beyond the bridge. A breeze was blowing, and the leaves separated. He watched them moodily skitter here and there and finally settle down

along the edge of the ravine. Then he turned his back upon it all. "Forget-it!" that was the admonition of practical Jerry Gowan. Yes, he would do that. The thing was done with, but there was an aching void at heart, not so much of disappointment as because the memory of the incidents he had grouped to form the screed were still cherished as lovely bits of naturalness and suggestion that he would have loved to exploit.

His rest was broken that night, and he overslept the next morning. Just as he arrived at his accustomed restaurant he found Rourke Vivian. The latter sat drumming his fingers on the table before him, as though he had been there for some time.

"Wanted to see you, Moore," with a casual manner obviously affected. "You stirred me—some." He laughed mirthlessly. "That screed of yours—I couldn't get it out of my mind all night."

"It didn't seem to impress you much when I read it!" observed Moore, quite spitefully. "I'm not given to wearing my heart on my sleeve, as you ought to know," retorted Vivian gravely. "It hit me hard. You know I came from 'the cider country,' and you've caught its spirit famously. Bring me those pages, will you? I can do something with them as a starter. In fact, you want to go on with them."

"You are in earnest!" challenged Moore, forgetting breakfast. "Very much so."

"I'll try to see you some time this afternoon," spoke Moore flusteringly, and bolted.

There was but one thought in his mind—to recover the abandoned manuscript. With eagerness and rapidity he reached the spot where he had scattered the leaves in desperation. He climbed down into the ravine. He searched in vain. Moore could not find a trace of the sheets. He climbed up an incline, the top of which was lined by a hedge, to rest and think.

He had kept no copy of the screed nor had he preserved the original notes. Could he reproduce it? Not in its original freshness, he discomsolately decided. He fell into a treamy maze.

What was that? Quite dazing, Moore started up. From the other side of the hedge a sweet, mellow voice was reading. He could scarce credit the evidence of his senses—the last sentences of his screed!

Moore peered through the hedge. An old gentleman and a lovely young girl occupied rustic chairs, and the girl held in her hands the lost sheets of his manuscript.

The old man was wiping his eyes. His voice was full of emotion as he spoke. "Read it all over again, Angela. It is exquisite!" and the girl did so. Moore thrilled to listen to that voice retraversing his poor composition.

"It is like a sweet breath from the past!" murmured the old man. "Who could have written it? How came it here?"

"It is like a letter from home, isn't it, dear?" smiled the girl. "I found two of the leaves littering the ravine walk; read them, was interested and gathered up the rest. Why, grandpa, whoever wrote it must have lived in and loved the dear old cider country!"

"It has taken me back to the old home," sighed the old man. "I wish I knew the writer."

Adrian Moore disclosed himself. He could not resist the impulse. Oh, what was the vague, casual opinion of his casual newspaper friends to the heartfelt appreciation of these new acquaintances!

Before he left these latter, the wealthy old man had his promise that he would at once go on with the story of the cherished "cider country."

Vivian listened to the exploits of Moore with an indulgent smile. "Found a patron and an heiress, eh?" he observed. "Well, accept the gifts of the gods gratefully!"

Which Adrian Moore did—with fame and the pure, sweet love of Angela Marston concurrent.

## Three Spheres of Believer's Life

By REV. B. B. SUTCLIFFE  
Extension Department Moody Bible Institute of Chicago

TEXT—Christ our life.—Col. 3:4.

If the three spheres in which the believer's life is said to be are kept distinct in the mind, much confusion of thought will be avoided.

"Your life is hid with Christ in God." Col. 3:3. This is the place of supreme satisfaction and absolute safety; the place of opened vision where the unseen things are seen—the unseen things which make the present afflictions, however severe, to be

light in comparison. It is the place of close fellowship with God and his son, Jesus Christ. The place of abiding, changeless joy, for in his presence there is fullness of joy and pleasures forevermore. Vision, fellowship and joy like that which Christ himself enjoys belong to the Christian whose life is hid with Christ in God. It is the place of absolute safety from all attacks of the evil one. None can reach Christ hidden in God and none can reach the Christian hidden with him. It is the place of safety from all the allurements of the world. The Christian walks through them unseeing, having his vision filled with the unseen. Standing in that place he endures as seeing him who is invisible. The safety of Christ is not more certain than the safety of one whose life is hidden with him in God. All the Christian has to do to enjoy the things that Christ enjoys, and to be satisfied with the satisfaction Christ has, is to open the eyes and look about in that wonderful place of satisfaction and safety which speaks of the Christian's standing. There is no struggle there, no discord, no fear, no fighting; but peace is there for heart and mind; harmony is there and rest and quiet that soothes and comforts as the believer rests in the God-given place.

"The life that I now live in the flesh." Gal. 2:20. This is the place of constant, never-ceasing struggle and strife, but in which may be constant success and victory. Self, (which is but another name for the flesh), and Christ, can no more be mixed than oil and water. "The flesh lusteth against the spirit and the spirit against the flesh, and these are contrary the one to the other." Gal. 5:17. As long as the Christian is in the flesh, so long will there be the struggle. Constantly will the flesh demand recognition and unless there be constant vigilance there will be making provision for the flesh and consequent defeat. The flesh cannot be changed by the coming of the Holy Spirit, however full the coming may be. Nor can the flesh be subdued by any set of rigid rules which might be adopted. It will remain wholly unchanged, the enemy of God and Christ, and will continue to war against the spirit. The only hope of success and victory is to do as the Lord directs, and reckon it to be dead.

And a dead thing is to be buried and put out of sight. In spite of its power and vitality the Christian may, if he will, have constant victory through Christ. Each believer may say and say truly, "I can do all things through Christ." It is when the Christian attempts to secure victory through Christ aided by self that failure comes. It is hard for the believer to allow Christ to do it all, but only as he is so allowed, will freedom and success for the life lived in the body be realized.

"I am no more in the world, but these are in the world." John 17:11. This is the place of service with him. His promise, "Lo, I am with you always," is given to the servants who go forth at his command. As long as the Christian is in the world he is in the place of service as Christ was. To render acceptable service, and service which will bring results in honoring the Lord, there must be a certain separation from the friendship and ways of the world. As the Christian takes the place of a stranger and foreigner to the world, there comes to him the experience the master had and he delights to do the will of God. He enters into the endeavor of Christ to show forth the Father and bear the ambassador's message to the world, and he enters into a close, warm fellowship with Christ in all his service for the world. The Christian's life in the world is one of constant service. Not the servant of the world but the servant of the Lord. Many seem to live and work as though they were servants of the world and therefore they appear to try to curry favor with it. But the believer must ever remember truly that "he who would be the friend of the world is the enemy of God." We are not to seek the friendship either of the good, moral and religious world, nor of the bad, immoral and irreligious world. All alike, until yielded to the demands of Christ, are the enemies of God. To serve acceptably there must be entire separation. Hidden in God the believer's life is in the place of constant safety, in the flesh is the place of constant struggle, and in the world is the place of constant service.

Very Much Restricted.  
Knicker—"Is Jones on a restricted diet?" Bocker—"Terribly; he is confined to what he can afford and his wife can cook."—Judge.

## CANADIAN CROPS EXCELLENT

Returning Tourists Speak Well of Their Treatment in Canada.

The Canadian Government, having made extensive preparations during the last few years to impart to the National Park system a degree of comfort and pleasure to the visitor, combining the best efforts of man with the very best gifts of creation, has now the satisfaction of seeing an appreciation of the efforts they have made. Tourists returning from a trip over the Canadian Pacific, the Grand Trunk Pacific and the Canadian Northern railways speak enthusiastically of the beauties that are revealed as these roads enter and pass through the mountains. The Government has spent enormous sums of money laying out roads, and developing easy means of access to glacier, hill, valley, lake and stream. For what purpose? That the wonders that Canada possesses in its national parks may become more easily accessible and afterward talked about that a tourist travel through Canada would result. Tourist travel means business, and it is business that Canada seeks. To make it even more easy for this travel, the Government has taken pains to make every step of the tourist's entry into Canada one that will give the very least degree of trouble. On crossing the border, there is only the ordinary examination of baggage, and the only precaution is that in the case of foreign aliens, and even in their case there is no difficulty when the officials are satisfied that they are not attempting entry as enemies.

Although officials of the Government have taken every means to bring to the attention of the tourist and others that no difficulty could be placed in the way of their admission, there still remained doubt in the minds of some. Only the other day the Government took action again, and authorized the statement that no measures taken for recruiting the forces either have been, or will be applied to any persons who are not ordinarily resident in the Dominion. Nor is it the intention to ask for volunteers except from among British subjects, resident in Canada. Moreover, the Military Service Act, under which conscription is applied in Great Britain, affects only persons ordinarily resident in Great Britain.

Americans and British subjects resident in the United States who desire to visit Canada will find no more trouble at the border than they have experienced in the past, and upon arriving they will be made as welcome as ever. War conditions of any kind will not inconvenience or interfere with them.

The immigration authorities suggest that, as a precaution against inconvenience, naturalized Americans whose country of origin was one of those at war with the British empire, should provide themselves with their certificates of naturalization.

Now that it is impossible to visit Europe, the planning of your vacation trip through Canada is one to give consideration to. The Government has taken an active interest in its National Parks in the heart of the Rocky mountains. These can be reached by any of the lines of railways, and the officials at these parks have been advised to render every attention to the visiting tourists, who in addition to seeing the most wonderful scenery in the world—nothing grander—nothing better—have excellent wagon and motor roads, taking them into the utter recesses of what was at one time considered practically inaccessible.

In addition to this the tourist will not be inactive to the practical possibilities that will be before him as he passes over the great plains of the Western Provinces. The immense wheat fields, bounded by the horizon, no matter how far you travel. The wide pasture lands, giving home and food to thousands of heads of horses and cattle. The future of a country that he before only heard of but knew so little about, will be revealed to him in the most wonderful panorama, and imprinted in the lens of his brain in such a way that he will bring back with him the story of the richness of Agricultural Western Canada. And he will also have had an enjoyable outing.—Advertisement.

Hailed the Change.  
"You look very smiling this morning, Toner," said Bailey. "I guess I ought to be. I went to a fortune teller last night and she prophesied immediate financial reverses," chorled Toner.

"I fall to see anything very joyous in that," said Bailey.  
"You would if you knew anything about my finances," said Toner. "I tell you right now that if they don't reverse pretty quick I'll be busted."

Willing to Oblige.  
"Have you found space for my poem yet?" asked the party with the unbarbered hair as he entered the editorial sanctum.  
"Not yet," replied the busy man behind the blue pencil, "but I expect to just as soon as the office boy finds time to empty the waste basket."

Science and Philanthropy.  
"Think of the lives science saves." "It all depends on whether your scientist is working with medicines or high explosives."

## TAKEN FROM EXCHANGES

As a preventive against fire Austrian laws require dwellings and business houses to be built throughout of solid materials.  
Several German chemists are endeavoring to find economical processes for the recovery of combustible material from coal ashes.

A survey of the world's foods shows that one-half of the rinds have a sweetish taste, one-third are salty and one-tenth sour or bitter.

Holland is preparing to start a new "superphosphate" project.  
The United States yearly produces 11,000,000,000 pounds of lard.  
North Dakota has \$34,000,000 worth of land set apart as school endowment.  
Washington has built and opened a city and county office building costing \$1,500,000.  
Denver's Manufacturers' association plans to raise a fund of \$1,000,000 for use in strengthening present industries and inducing others to locate in the city.

Referring to the Cow?  
It is said that a gravestone bears this inscription: "Here lies the body of Samuel Holden, who died suddenly and unexpectedly by being kicked to death by a cow. Well done, good and faithful servant."

Her Particular Sphere.

Mr. and Mrs. George R. Staples, of West Somerville, Mass., are visiting Mr. and Mrs. Eugene H. Woodward.

The ladies of the Baptist church will hold a food sale in the vestry, Friday, July 21st, at 8 p. m. adv.

Miss Helen Stowell has been entertaining her friend, Miss Towle, of Boston, at Alabama Farm, the past week.

Mrs. Sarah Darrah, of Manchester, is passing a season with her daughters, Mrs. Charles H. Bass and Mrs. I. Clement.

Mrs. E. A. Bigelow and son, Harry Bigelow, of Winchester, Mass., are at their summer home, Fairacres, for the season.

John R. Templeton and family, of Westfield, Mass., are spending a two weeks' vacation with his mother, Mrs. K. C. Templeton.

Miss Lillian Hansie and brother, Ernest, of Harrison, N. J., enjoyed a few days' visit with their aunt, Mrs. Lena Hansie, the past week.

Mr. and Mrs. Fred H. Colby have been entertaining Mrs. Colby's niece and husband, Mr. and Mrs. Nelson Brigham, of Holyoke, Mass.

Mrs. Lewis H. Carpenter and son, Master Warner, of Wakefield, Mass., former residents, have been visiting Mr. and Mrs. Carl H. Robinson.

One of the features of the entertainment at the apron sale of the Congregational church on Aug. 18 will be "Arabella's Poor Relations." adv.

Mrs. Fred W. Robinson and two sons, of New Rochelle, N. Y., are guests of Mrs. Robinson's parents, Dr. and Mrs. D. W. Cooley, and other relatives.

A notice is posted in the post office for bids to carry the mails from Antrim post office to the railroad station, the holder of the present contract having resigned.

"Daddy Long Legs," scheduled to be given at the town hall last Friday evening under the auspices of the Antrim Woman's Club was not presented. This was due to the sudden illness of the speaker, and not to any inclemency of the weather or lack of electric lights!

Mr. and Mrs. Ralph G. Hurlin, who were recently married at Providence, R. I., and who have been spending a portion of their honeymoon with Mr. Hurlin's parents, Mr. and Mrs. Henry A. Hurlin, have gone to Maine, where they will spend a few weeks with relatives.

About forty members of Waverley Lodge, I. O. O. F., were in Hillsboro Friday evening as guests of Valley Lodge, I. O. O. F., at their installation. Charles M. Taylor, D. D. G. M., of the local Lodge, was the installing officer, assisted by Past Grands of Waverley Lodge as Grand officers.

At the annual fair and entertainment of the Methodist church to be held Friday afternoon and evening at the town hall there will be the usual tables of fancy articles, ice cream, home made candy and food. The entertainment will be given by Mr. and Mrs. Bickford and Fred Lawton, readers. Watch for further particulars.

While at his work in a saw mill Thursday, Walter T. Poor had the misfortune to catch his arm on a rapidly moving saw, and cut a deep gash, severing an artery and veins. The services of a physician were required to stop the flow of blood and seven stitches were taken to close the wound. Mr. Poor will be unable to work for some time.

The following item is contributed by a subscriber who has recently been reading some of the first issues of The Reporter. It is taken from the issue of Sept. 18, 1889. "Mamma, I know who brings us our dinners," said a little four-year-old of our acquaintance as he was seated at the tea table last Saturday. On being asked "Who?" he replied, "The butcher and God and John Burnham."

### Berry Notice

All persons are forbidden picking berries in my pastures, as they are leased to another party.

Ira P. Hutchinson,  
Antrim, N. H.

## THE CHEERFUL CHERUB

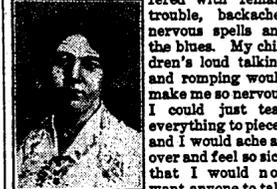

The chub ladies talk about Drama and Art. They rail at corruption and vice. They just get indignant at all of the world for not being cultured and nice.

## I OWE MY HEALTH

To Lydia E. Pinkham's Vegetable Compound.

Washington Park, Ill.—"I am the mother of four children and have suffered with female trouble, backache, nervous spells and the blues. My children's loud talking and romping would make me so nervous I could just tear everything to pieces and I would ache all over and feel so sick that I would not want anyone to talk to me at times. Lydia E. Pinkham's Vegetable Compound and Liver Pills restored me to health and I want to thank you for the good they have done me. I have had quite a bit of trouble and worry but it does not affect my youthful looks. My friends say, 'Why do you look so young and well?' I owe it all to the Lydia E. Pinkham remedies."

—Mrs. ROBT. STOPIEL, Moore Avenue, Washington Park, Illinois.

We wish every woman who suffers from female troubles, nervousness, backache or the blues could see the letters written by women made well by Lydia E. Pinkham's Vegetable Compound.

If you have any symptom about which you would like to know write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice given free of charge.

## Antrim Locals

William Larkin is entertaining his daughter, Miss Gertrude Larkin, of Enfield.

WANTED—Steady employment by a reliable man, married. Address Box 222, Antrim, N. H. adv.

Dr. and Mrs. W. R. Musson, and friends, have been camping at Deering reservoir, and report a fine time.

The village school house is being painted on the outside this week, and some interior work is also being done.

The fire department gave the engine a try out Monday evening, and carefully inspected it for any signs of wear.

Mrs. Florence Brown and daughter, Miss Minerva, of Cleveland, Ohio, are enjoying a vacation with Mrs. Brown's parents, Mr. and Mrs. Hiram B. Raleigh.

Miss Margaret Redmond, who has been nursing in Peterboro the past three months, has received an appointment as army nurse from Washington, D. C., and is to report there Aug. 7, at the Walter Reed general hospital.

### Pop Concert

The entertainment committee of the Antrim Woman's Club have in preparation a pop concert to be held in the Town hall on the evening of Aug. 4, 1916.

Having in mind the disappointment to the public of the non appearance, through illness, of Miss Clarke, who was to give "Daddy Long Legs," the committee have secured some of the very best of our local talent and are able to guarantee the performance as announced—unless, the electric lights should be out of commission or some unforeseen and dire disaster fall upon us all.

The list of artists to appear include Mrs. Marie Jameson, Miss Gertrude Jameson, Miss Mae Harris, and Messrs Ralph Winslow, Frank Boyd, Charles Prentiss, Harold Clough, Walter Robinson, the Mandolin Club, and others.

There are to be song sketches, quartets, solos, and a variety of such good things musically and otherwise as will delight the audience.

Be sure and secure your table as it is first come, first served. Cold drinks, ice cream, and home made candies will be served by so charming and obliging waitresses that it will be a pleasure to pay for their wares.

This is to be an occasion where, if you fail to attend, regret will be your portion for many weary days. A word to the wise is sufficient. adv.

**Help us to HOLD DOWN—  
Tire Prices**

**T**IRES, and GASOLINE, "make the Wheels go round!" A Car in the Garage COSTS as much as a Car-on-the-Road, but it pays no dividends, on the Investment, so long as it STAYS in the Garage.

THE VALUE of the Car,—to its Owner,—narrows down, in the ultimate, to the precise number of Hours he USES that Car, yearly.

If a \$2,000 Car be owned for, say, 4 years (then sold for \$600.) there has been \$1,400 of Car-Value absorbed by the Owner,—equal to, say, \$350. per year.

If then, that Car be USED 913 Hours in the year, it would cost him but 38 CENTS per Hour, for Car-Use.

But,—if he used it only HALF that number of Hours, yearly, the Car would cost him 100% MORE for every Hour he used it.

How MUCH he uses it will depend,—to a considerable extent,—upon the PRICE of TIRES and GASOLINE.

This was one of the reasons why we (Jan. 31st, 1915) inaugurated the Goodrich "FAIR-LIST" Propaganda against High-prices, and Padded-Price-Lists, on Tires.

It is a further reason why we NOW keep our own Goodrich Prices DOWN to the very moderate "Fair-List" figures here quoted.

**B**BETTER Fabric Tires are NOT made, and cannot be made,—at ANY price,—than are produced by The B. F. Goodrich Co.

A 15% to 50% higher price could well be justified for these same Tires, by fair comparison with other Tires sold at 15% to 50% higher prices.

Will you help your own interests (present and future), by further expanding the Sale of that Tire which demonstrates its intention, through LOWERING the Cost of its Tires to you, with every INCREASE in its Volume?

Will you thus endorse, and support, the Goodrich Policy which automatically PREVENTS OTHER Makers from forcing UP the Market on Tires?

Compare Goodrich Fair-List prices, here quoted.

Bear in mind that NO Fabric Tires,—at ANY price,—are "better,"—no House more Fair, and LIBERAL, on proper Adjustments.

THE B. F. GOODRICH CO., Akron, O.

**Goodrich "Fair-List" Prices**

30x3	Ford Sizes (Safety-Treads)	\$10.40	34x4	(Safety-Treads)	\$22.40
30x3½		\$13.40	35x4½		\$31.20
32x3½		\$15.45	36x4½		\$31.60
33x4		\$22.00	37x5		\$37.35

NOTICE.—These Tires are as perfect as Fabric Tires can be made. But, should any dissatisfaction whatever arise, with any Goodrich Tire, its Owner is invited, and REQUESTED, to take the matter up promptly with us,—the Makers. He will find that Fair, Square, and LIBERAL treatment will always be extended, on all proper adjustments.

# ALFALFA FARMER CARRIES ON MANY INTERESTING EXPERIMENTS

Owner of Magnolia Crest Farm, in Scott County, Iowa, of Wide Diversity of Interests—Believes in Rotating Pastures Wherever Possible—Carefully Selects and Stores Seed Corn—Never Was Successful With Potatoes—Profit in Sheep.

(By G. H. ALFORD, State Demonstration Agent, Maryland.)

C. W. Lau, who lives on the Magnolia Crest farm, six miles from the city of Davenport, in Scott county, Iowa, is a man of such a diversity of interests and carries on so many interesting and valuable experiments that we can learn much by a study of his methods. Mr. Lau owns 160 acres of land. Of this 120 is tillable, while 40 is left in permanent pasture and carries about one head of cattle per acre. This ground is low and has a very troublesome ditch running its entire length, making it difficult to maintain fences and impracticable to cultivate. He believes that he can double the carrying capacity of this pasture by diking in the ground occasionally and sowing in a mixture of grasses. He will try a mixture of timothy, blue grass, white clover and sweet clover seeded in a two-year-old alfalfa field to produce a pasture of this sort next season. Mr. Lau believes in rotating pastures wherever this is possible.

**First Success With Alfalfa.**  
Mr. Lau maintains a rotation of two years of corn, one year of barley in which alfalfa is sown, followed by two years of alfalfa. He can rightly claim the distinction of having first gained an unqualified success in the growing of alfalfa in Scott county. He now has on the place some 30 acres devoted to this crop. So firm is his faith in the alfalfa plant that he has discarded red clover entirely and expects to follow a rotation in which alfalfa has a prominent part. He also has placed his seal of condemnation on timothy.

Charles Lau says that one year's seeding is five years' weeding. To prevent this he clips his stubbles with the mower before the weed seed ripens. This is better than plowing early and exposing the land to parching suns and leaching rains.

From 40 to 60 acres of corn are grown and the average production is about 55 bushels per acre. The seed is gathered early and the ears placed in ricks in the open doorway of his barn loft. In this way it is located in

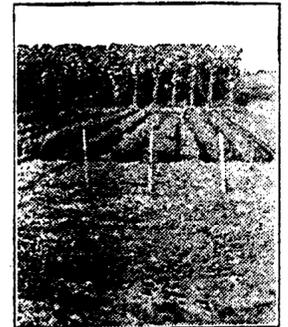

Concreting the Barnyard of C. W. Lau Farm.

a draft where it dries out very quickly. It is left until quite thoroughly dried out and then taken to the basement under the house where the furnace completes the task of drying. He tests for germination in the spring. Mr. Lau's corn tested in the county experimental plots at the orphan's home yielded at the rate of 85 bushels per acre.

From 25 to 30 acres of barley are produced. Last year he threshed 750 bushels, or 36 bushels per acre, which he sold at 75 cents. For two years he treated the seed with formaldehyde and had no smut in the crop. No oats are grown and only one acre of potatoes. Mr. Lau has never been very successful with potatoes, but his son, Carl, raises from one-half to one acre of popcorn and has gotten very satisfactory returns from it.

**Careful of Manure.**  
The production on the rolling farm which Mr. Lau owns is maintained by about 200 loads of manure annually.

Experimental Alfalfa Plots.

spread at the rate of six loads per acre on the corn ground. The hills are given an extra dressing of manure every two years. Mr. Lau is very careful to conserve all his manure. He has built a concrete cistern to receive all the liquid drainage from the cow barns. When the manure is to be hauled out, it is heaped up in the yard and then this liquid is pumped over these manure heaps and hauled into the fields in that way.

Mr. Lau has 14 Red Polled cows of high grade which produce from 2,500 to 3,000 pounds of butter annually, which he sells on contract delivered at 35 cents the year round. In 1914 the production was 2,550 pounds. Each cow returned him \$73.85 last season as follows: 170 pounds butter, \$60; 4,000 pounds skim milk at 15 cents per hundred, \$60; calf, \$5; and 15 pints of cream used in household, \$2.85. They are fed silage and alfalfa as the basis, with a small quantity of corn grit consisting of corn and cob ground together. These cows constitute the largest factor in his total income every year. He regards silage and alfalfa as the very best feed.

He owns one of the oldest silos in Scott county, having had it for 21 years. It holds 85 tons, has dimensions of 14 by 25 feet and requires from 7 to 8 acres to fill. It is constructed of wood staves and is built inside the barn and has proved practically permanent there. The cost was \$150. Mr. Lau estimates the annual cost of filling at \$50. He always adds water to his ensilage in filling and finds that he can get a good grade of feed by putting it in when just beginning to dent. To prevent spoiling on top it is thoroughly sprinkled with water and tamped down three different times. He had never had any trouble from feeding and values ensilage highly for both cattle and sheep. In his opinion every farmer should have a silo.

**Cows and Steers.**  
He keeps, in addition to his cows, 25 head of young cattle. The steers he sells as butcher stock. Purebred Red Polled sires have been used in his herd for 20 years, but the start was made with common cows of different breeds. Now their owner regrets that he didn't use purebred dams as the foundation.

Seven horses are kept to do the work on Mr. Lau's farm. They are fed alfalfa as roughage almost exclusively. They are also given some silage and oats and corn. Care is taken that the alfalfa and ensilage be bright and wholesome. No colts are produced. Mr. Lau has found sheep very profit-

able, as they cost very little, clean up the weeds and transform much roughage into money through the sale of wool and mutton. He now has 17 ewes and gets about ten pounds of wool at the average clipping. Before he kept sheep, he had a great deal of rag weed in his pasture, but now a rag weed is a scarce article on his farm.

**Experience With Hogs.**  
Mr. Lau has had many and varied experiences with hogs. He raises from 70 to 90 head of Poland China per year. In the 24 years he has farmed, he had cholera three times. In 1912 it broke out and from some 50 or 60 head he saved about 25. They were not treated, as Mr. Lau had no faith in serum at that time, having made a test the preceding year with some so-called serum which was being used in the county. He treated with this two of his hogs and put them in a neighboring herd where cholera prevailed. In a short time they contracted the disease and died and Mr. Lau was convinced that the serum treatment for hogs was a failure.

However, the success of the treatment at the Iowa farms near Davenport soon set him to thinking again and he secured three pigs in the fall of 1912 from the Iowa farms which had been given the simultaneous treatment and placed them in three infected herds in his neighborhood. All three pigs weathered the storm successfully, although nearly all the hogs in the three herds died. That put a new aspect to the subject and in the summer of 1913 Mr. Lau gave all his pigs the serum-simultaneous treatment without any loss, although cholera prevailed in the neighborhood. He now gives his hogs the serum-simultaneous treatment every year.

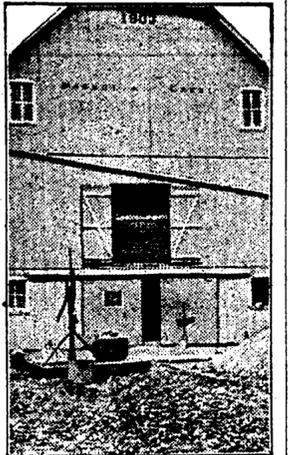

Mr. Lau raises about 100 head of chickens each year, planning to sell off the cockerels and old hens each winter and keeps the pullets. He sells them dressed at 20 cents per pound in Davenport. He has had considerable trouble with chicken cholera and with blackhead in turkey, being compelled to cease raising the latter fowl on that account.

**Gross Returns.**  
There are few farms in Scott county which give higher gross returns per acre than that operated by Mr. Lau. His gross returns for 1914 from his

various sales are given herewith: De-

Deducting four acres for roads his gross receipts for 1914 were \$29,25 per acre.
Record of Sales.

It is interesting to note that Mr. Lau realized \$1,050 in cash from his 1914 crop of alfalfa. There was no better field of alfalfa in Scott county last year. He put up over five tons per acre from these cuttings. In 1913 he cut five tons per acre and was offered \$20 per ton for all of it. He estimates that it costs \$1.50 per ton to put it up. The first cutting in 1914 he kept for feed and it carried 40 head of cattle, 10 sheep and 6 horses through the winter, while the second, third and fourth cuttings returned him

Method of Drying Seed Corn.

\$1,050 in cash. He harvested 130 loads from 26 acres in three cuttings and 7 acres out the fourth time. He baled and sold at \$16 to \$17 at home, or \$18 to \$19 delivered. Mr. Lau tried alfalfa repeatedly for 25 years but had no success until he applied some lime eight years ago. Since then he has found alfalfa a very profitable crop. In 1914 a strip a rod wide through his field left unlimed produced practically nothing.

**Iron and Concrete.**  
Mr. Lau declares that this is an age of steel, iron and concrete, and, wherever possible, these should be substituted for wood in farm construction. He has concreted his entire barnyard this year and will keep straw in the cow yard to catch all the liquid manure as well as the solids. The cost was 7-13 cents per square foot.

Mr. Lau's barn is 40 by 80 by 24 feet and contains 80 tons of hay and straw for bedding. He has an elevated tank supplying 10 hydrants, including 3 faucets in the house. He has shelter for 40 head of cattle and 7 horses. His hoghouse is provided with self-waterers and self-feeders, the latter for hogs on full feed. Thus the hogs eat and drink at leisure, there is no sudden exposure and no wrangling, no rubbish to clean off but clean cobs for the tank heater or kitchen stove.

**Item of Chores.**  
In doing the work on the farm where there is lots of stock, the chores become a considerable item. Mr. Lau has a two-horsepower gasoline engine mounted on a truck sufficiently light for one man to easily pull around and he makes this the chore boy for a multitude of jobs. He regards gasoline as cheaper than hired help. He is careful that no feed shall be hauled or carried in baskets to live stock and puts the hay in a place overhead with the feed bunks below for the cattle and has a feeding place for hogs adjoining the corn crib. Water is also piped to the slop barrel and the table is set before the hogs are invited to their dinner. In this way no feed is dragged through the snow or mud but the animals come to their dinner themselves.

Another important point in the management of this farm is the dividing and subdividing of the place with fences which are hog and cattle tight. In this way many weeds, volunteer grains and shattered kernels of corn, oats and barley which otherwise would be wasted, can be utilized in producing mutton, pork and beef. In his experience a thrifty lot of hogs with such a range will return from 50 to 80 cents per bushel for corn when fattened.

**Vineyard and Orchard.**  
This discussion would not be complete without a statement in regard to Mr. Lau's fruit. He has a vineyard, excelled by that of very few farmers. It contains many choice varieties of grapes. He has apples, pears, plums, cherries and plenty of small fruit as well as a good garden. The orchard of one-half acre has been sprayed each year for four or five seasons and has always produced fruit since the spraying was started. In 1913 he sold \$247 worth of fruit.

Mr. Lau has raised a family of five boys and one girl. He thinks the farmer has an opportunity of having something more than a farm. He can have an attractive home and it should be the ambition of every farmer to make his homestead beautiful as well as his farm profitable. To render farm life more attractive he has installed a carbide plant outside the house to light all his buildings, has transformed an old well into a cold storage place for cream and victuals.

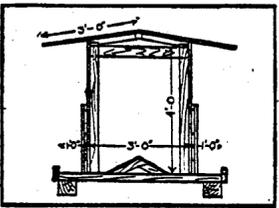

## FEEDER EASILY MADE

Will Hold Approximately Twenty Bushels of Ear Corn.

So Arranged That Hogs Can Get at Trough, But Not into Interior—May Be Hauled Around Farm to Any Desired Location.

A self-feeder for hogs, which will hold approximately 20 bushels of ear-corn, is easily made. The crib has a base 8 by 4 feet, and is 4 feet high. It is built on a solid frame of 2-inch lumber and covered with 6-inch crib siding for the walls, and ship-lap for the roof. The siding should be spaced 1 inch apart for ventilation. Surrounding the base is a trough 1 inch wide with a fender on its outer edge made of lumber 2 by 4 inches.

The corn is deflected into the trough by a pyramidal arrangement in the crib, as shown in the cut. Its flow is further regulated by an adjustable slide held in place by bolts with winged nuts. The trough is sheltered somewhat by the overhanging roof, made from boards 8 feet long. One section of the roof should be hinged for filling. The feeder should be built on skids or runners so that it may be hauled about the lots to any desired

Self-Feeder for Hogs.

location. It may be painted and set in a high, well-drained spot or on a concrete platform. The lumber list follows:

- 2 pieces 4 by 4 inches by 7 feet runners.
- 6 pieces 2 by 10 inches by 5 feet floors.
- 2 pieces 2 by 4 inches by 6 feet trough-fender, sides.
- 2 pieces 2 by 4 inches by 5 feet trough-fender, ends.
- 6 pieces 2 by 4 inches by 4 feet studding.
- 4 pieces 2 by 4 inches by 6 feet planks.

Trough Easy to Get At.

- 50 feet ship-lap for cover, 3-foot lengths.
- 50 feet (lin.) 1-by-4-inch cleats.
- 80 feet 1-by-6-inch crib siding.
- 30 feet 1-by-12-inch slide.
- 2 12-inch strap-hinges.
- 10 bolts, with winged nuts.—Popular Science Monthly.

## ASSIST HOGS IN DIGESTION

Animal Doesn't Root Out of Mischief, but is Looking for Worms, Roots and Earthy Salts.

A great many think a hog roots just for mischief. That is not the case. The animal roots for worms, roots, and earthy salts, which it finds in the soil and which aid him in digestion. Nature helps him out in this way when man is foolish enough to neglect him.

In the amount of carbonaceous feed that we give the hogs there is too little phosphate for them. Lime, bones or oyster shells should be provided growing and fattening pigs.

## HEAVIEST CROPS OF BERRIES

Most Small Fruits Bear Next Year After Planting—Strawberries Good for Three Years.

Blackberries, currants, gooseberries, dewberries and raspberries begin to bear the next year after planting, and produce their best crops usually during their second and third seasons. Grapes bear their first good crops about the fourth year after setting. Strawberries bear the next year after setting, and produce their heaviest crop the second year, although they are profitable for three years or more, depending upon soil and cultivation.

## YIELDS FROM SMALL FRUITS

Hundred Bushels to Acre Secured From Gooseberry—Much Depends on Weather Conditions.

Gooseberries sometimes yield as much as one hundred bushels to the acre, grapes from three to five tons, raspberries from 50 to 100 bushels, and strawberries from 75 to 300 bushels. These yields vary from year to year, depending upon weather and climatic conditions, methods of cultivation, varieties, etc.

## USE CARE WITH STRAWBERRY

Easy Matter to Grow Crop, but Another Thing to Sell—Pack in Attractive Manner.

It is an easy matter to grow a crop of strawberries, but quite another thing to sell them profitably. Strawberries to sell must be packed carefully in boxes and placed on the market soon thereafter.

Few towns are well supplied with strawberries during the strawberry season. Any individual who will plant one to five acres will find a ready market for all his product at home. For home market strawberries should be very nearly ripe when picked; but for shipping they should be picked a little greener.

It is an easy matter to pick a small area, but when several acres have to be picked over every day, it is not so easy. Shortage of help is the main trouble.

When picking for shipping a field should be picked every day, if possible, but for home market to pick over the same ground every other day is often enough. It is well to see that the boxes are well filled.

## LICE KILLER IS INEXPENSIVE

Rope Saturated With Kerosene and Fastened Around Post Will Prove Quite Effective.

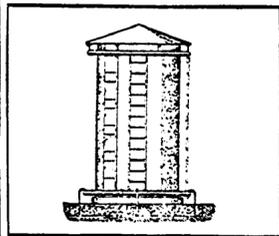

A Washington farmer has found the following a good scheme for killing lice on hogs. Set a round post in the ground and leave it three feet above the ground. Fasten a tin can on top. Fasten a large rope in the can and let it run over the top down the post and run it round and round the post at the right height for the hogs to rub. Fill the can with kerosene. Soak the rope first with kerosene. The kerosene will follow the rope out over the can, and the hogs will do the rest.

A good plan is to make a large shade near the outhouse. This should be large enough so that the sun will not shine on much of the ground and high enough so that a man can walk under. It can be made cheaply by setting posts in the ground and covering them with brush and old hay or straw. You won't need any "hog wallow" with this arrangement.

## LADDER BUILT AROUND SILO

Arrangement Will Be Appreciated by Farmer Who Wishes to Get into Various Doors at Top.

Silo owners often want to paint their silos; at least they should do so to get the most years of service out of them. Earl H. Clark of Iowa has patented this silo ladder for that purpose. It will also be appreciated by the owner who wants to feed from one silo to two or more buildings, or lots. He may have doors put in at the proper point so as to run the feed carrier in that direction. Instead of having a stationary ladder at each door, one ladder of this type may be used. Those who have been in shoe stores where the rolling ladder is used to aid the salesman in getting wares quickly will understand the principle at a glance

Silo Ladder.

at the picture. Rollers and a round track at the top and bottom of the silo permit the ladder to be slid around the silo.—Farming Business.

## GENERAL FARM NOTES

A well-grown tree lasts a lifetime.

A change of food is better than mixing it.

There is no color of horse so insensible to heat as the sorrel.

Manage the sheep and the pastures so the flock can have a fresh, short bite.

Don't let your supply of insect powder run short. Use it regularly and liberally.

When cream is not ripened evenly, the full amount of butter is not recovered from it.

If a separator is used, do not let the cream stand around just anywhere to absorb all sorts of odors.

If more than one ram is kept they may run in a pasture by themselves. Never let them run with the flock.

Ducklings and goslings should not be allowed to swim, for they will do better if they have no water except to drink.

Plan a systematic crop rotation, and be sure that some legume is a part of it. Business farming requires that a good crop rotation be practiced.

## Wrong List Was Printed.

A corps leader being informed that certain recommendations would be allotted to his command started his staff to compile a list of recommendations, which they dispatched, says a correspondent. When the Gazette appeared it contained none of the names sent in, but a selection of unknown heres. Inquiry disclosed that a roll of conscientious objectors to inoculation had got into the wrong envelope.—London Globe.

**Dean's Rheumatic Pills**  
For Rheumatism & Neuralgia. Entirely vegetable. Safe.—Adv.

The more praise a man bestows on himself the wiser he is not.

**IF YOU OR ANY FRIEND**  
Suffer with Rheumatism or Neuralgia, write for my FREE BOOK on Rheumatism—Its Causes and Cure. Most wonderful book ever written. It's absolutely FREE. Jesse A. Case, Dept. C. W., Brockton, Mass.—Adv.

**So He Did.**  
"This is a muddy spot," said the girl. "In such a case Sir Walter Raleigh spread out his cloak for Queen Elizabeth to walk on."

"It would be more sensible for me to carry you over," responded the young man, "and a heap more fun."—Louisville Courier-Journal.

**Big Status.**  
"There is one author I know who hasn't bought himself an automobile." "Perhaps it is because he is a hack writer."

## Save the Babies.

**INFANT MORTALITY** is something frightful. We can hardly realize that of all the children born in civilized countries, twenty-two per cent., or nearly one-quarter, die before they reach one year; thirty-seven per cent., or more than one-third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save a majority of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium or morphine. They are, in considerable quantities, deadly poisons. In any quantity, they stopper, retard circulation and lead to congestions, sickness, death. Castoria operates exactly the reverse, but you must see that it bears the signature of Chas. H. Fletcher. Castoria causes the blood to circulate properly, opens the pores of the skin and allays fever. Genuine Castoria always bears the signature of *Chas. H. Fletcher*

**Invaluable Treasures Hidden.**  
It is reported now that valuable Belgian paintings have been rolled in cloth, inclosed in water-tight metal tubes and sunk in the Scheidt river. The Venus de Milo was hidden in a cellar in 1870 when the Germans entered Paris.

**General Utility.**  
The Business Man (to applicant for a situation)—Yes; we're short handed, but what use do you think you'd be in an office?

The Applicant—Well, gov'nor; I'm not wot yer might call an orl-round useful sort o' man—light a match for yer; 'old a door open; ring their bell for their lift; look an' see if it's left off rainin'; and tell people yer out when yer ain't.—London Sketch.

**Old Wine in New Bottles.**

What happens when the accepted tune of a national anthem is changed even with considerable care is revealed by this from Tom Daly's column in the Philadelphia Evening Ledger: "As the opener of the exercises at the convention of the National Association of Credit Men in Pittsburgh the words of 'America' were sung to the new music arranged for them. When the applause had dwindled away, the president arose and said: 'I feel that our convention is never properly begun unless we sing the national anthem, so let us all arise now and sing: "America.'" (Prolonged applause.)"

## FOR BABY RASHES

Cuticura Soap is Best Because So Soothing and Cooling. Trial Free.

If baby is troubled with rashes, eczemas, itchings, chafings or hot, irritated skin follow Cuticura Soap bath with light application of Cuticura Ointment to the affected part. Nothing so soothing, cooling and refreshing when he is fretful and sleepless.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

## Conversationalist.

"That man prides himself on being a conversationalist."  
"Yes," replied Miss Cayenne. "He's never so happy as when he makes a string of people miss their trains while he monopolizes the bureau of information."

## Sure Sign.

"Did you say that Juggers was bent on this scheme?"  
"Yes, sir."  
"Then, I know it is something crooked."

Many a matrimonial failure is due to the mistaken idea that two can live as cheaply as one.

A stupid man may harvest a bumper crop; it takes a clever man to enjoy it.

## Scarcity.

"Is help scarce around here?"  
"Yes," replied Farmer Cornstossel. "I can secure for a consideration any amount of advice and supervisory assistance. But plain ordinary help is getting scarcer every year."

# SANFORDS

# GINGER

Don't risk baseball without Sanfords. It's so good for sudden cramps, pains and chills. Put a little in all water drunk during play.

A delicate combination of ginger, aromatic and French brandy for the relief of cramps, pains, colds, chills, weakness, nervousness and insomnia. Look for the Owl Trade Mark on the wrapper, but you get a cheap, worthless or dangerous substitute. Forty years the standard of purity, flavor and strength. Sold by all druggists and grocers.

## Three Hundred Million Bushel Crop in 1915

Farmers pay for their land with one year's crop and prosperity was never so great.

Regarding Western Canada as a grain producer, a prominent business man says: "Canada's position today is sounder than ever. There is more wheat, more oats, more grain for feed, 20% more cattle than last year and more hogs. The war market in Europe needs our surplus. As for the wheat crop, it is marvelous and a monument of strength for business confidence to build upon, exceeding the most optimistic predictions."

**Wheat averaged in 1915 over 25 bushels per acre**  
**Oats averaged in 1915 over 45 bushels per acre**  
**Barley averaged in 1915 over 40 bushels per acre**

Prices are high, markets convenient, excellent land, low in price either improved or otherwise, ranging from \$12 to \$30 per acre. Free homestead lands are plentiful and not far from railway lines and convenient to good schools and churches. The climate is healthful.

There is no war tax on land, nor is there any conscription. For complete information as to best locations for settlement, reduced railroad rates and descriptive illustrated pamphlet, address Superintendent Immigration, Ottawa, or  
MAJ. A. BOWLEY, 71 Tremont Street, Boston, Mass.; J. E. LA FORCE, 29 Wyrosset Street, Providence, R. I.; L. R. ASSELIN, Biddulph, Ontario; J. A. LAFERRIERE, 1159 Elm Street, Manchester, N. H. Canadian Government Agents

## GREGG LAKE

### NOTES

Miss Marion A. Brooks left Monday after a few days' visit at Beechurst.

Miss Julia Wood and sister, Miss Eugenia Wood, are at North Star Camp with friends, Mrs. John Hamilton, Miss Gladys Hamilton, Miss Blanche Cole, from Framingham, Mass.

There was a dance at McCleary's on Saturday evening at which the Pointers and a few of the town's people were present.

Mrs. E. M. Clarke and two sons, Walter and Alvah, and daughter, Miss Katherine, of Melrose, Mass., are occupying Lakehaven, at Gregg Lake, for four weeks.

Mrs. Hollis and friends, Miss Burrell and Miss Cameron, have left after a week's stay at Fairmont.

W. W. VanNess and family and Mr. and Mrs. Hale are at Spruce Lodge for a week.

Mrs. R. H. McCleary is at The Maples for the summer.

Miss Helen Stanley and Miss Elizabeth Widdfield spent Sunday and Monday in Bedford.

Mr. Tougas was with his family at The Cabin over Sunday.

R. H. McCleary spent Sunday with his family here.

Mrs. Dickey is visiting Mrs. Killkelly at Woodlocken for a few weeks.

Mrs. E. D. Putnam and children are at their cottage for a season.

There will be a meeting of the White Birch Point association Saturday evening at 8 o'clock at The Maples.

Patronize our advertisers; they are reliable.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

## BENNINGTON

A Weekly News Letter of Interest

Mr. and Mrs. E. G. Timme, two children and Mrs. Timme's mother, Mrs. Forsythe, are at Old Orchard, Me., for a vacation trip.

Henry W. Wilson was in Manchester Tuesday attending the session of the Probate court.

Mt. Crooked camp fire girls hiked to Lake George Monday evening, returning home by moonlight.

Fred Starrett was in Newport Monday and Tuesday on a business trip.

Irving Willett of Troop A, cavalry, spent Sunday at home on a brief leave of absence.

William Knowles of the Signal Corps, visited here yesterday.

Mrs. Nellie Cheney and two sons, Leroy and Howard, of Springfield, Mass., are visiting her parents, Mr. and Mrs. J. J. Sawyer.

Charles Sawyer, of Concord, was in town first of the week.

Ansel C. Smart has purchased a new 1916 "Universal" car with all the modern improvements including a self starter. License number is 15,385.

Mrs. Walter Burnham and daughters, Katherine and Pearl, have been enjoying a two weeks' outing at Mrs. Burnham's former home in Revere, Mass.

There will be a social dance at the town hall on Friday evening. Read posters for particulars.

Miss Miriam Gow, dramatic reader from Boston, is to be here Monday evening, July 31, and give an entertainment. Watch for particulars.

### No One Hurt

Some excitement was caused yesterday when Mrs. Henry George's horse ran away on Main street. Mrs. George had just entered Cram's store when the weight of a lot of shovels in the storeroom broke the string by which they were held and smashed through a window near the scales, frightening the horse. The animal ran down the street and turned off on Aiken street near O. H. Robb's where he was caught. The wagon was somewhat damaged but fortunately no one was injured.

## When You Know What Is Best, Ask for it by Name

By J. R. HAMILTON  
Former Advertising Manager of Wanamaker's, Philadelphia

If a man has anything he is proud of, he gives it a name whether it be a baby or a pair of boots. And the more he is proud of it, the more he talks about it.

Nameless things are seldom good and never reliable. If you want to cut down your cost of living the very best way to do it is to learn to ask only for standard articles.

When you know the name of a good maker of shirts or shoes, of furniture or pianos, of hardware or underwear, fix that name definitely in your mind and remember it when you come to buy.

Do not allow strange things to come into your home any more than you would allow strange people.

The brand and the trade-mark and the copyright are the letters of introduction from the maker to you. In this way he vouches for their respectability and guarantees their good behavior in your home.

There is a name for every good product that is made. And most of these names are known to every man and woman in America. Manufacturers have spent hundreds of millions of dollars to standardize these names in your mind. From the lining of a dress to a laundry soap; from a cleanser to a baking powder; from a suit of clothes to a kit of tools; you could call every standard article on the market by name if you would only remember to do so when you come to buy.

It is through your carelessness that lies and adulterations creep in. The standard is set by good men, but the standard is only maintained by you.

It is time for you to forget the generic name of every article, and remember only the standard name of its quality.

In the advertising news of this paper today you will find many of these standard names and brands of quality. This article is written for the sole purpose of reminding you to use those names. It is only fair that you should do as much for these good manufacturers as they are doing for you. It is only right that you should help in this great standardization of good products that is going on throughout America.

Begin now to ask by name for everything you buy. And you will find your satisfaction growing greater day by day and your optimism extending even down to your pocketbook.

(Copyrighted.)

Constable Ralph Messer motored to Nashua, Pepperell, and vicinity Tuesday on official duties.

Mr. and Mrs. Charles F. Burnham have returned to their home in Walden, N. Y., after a pleasant vacation spent with friends here.

Mrs. Thomas Wilson has returned from a visit spent with her son, Robert, in New York city, and her daughter, Mrs. F. L. Keeser, in Walden, N. Y.

Mr. and Mrs. Ralph Gill have returned to their home in Somerville, Mass., also Mr. and Mrs. Wm. Talmadge to their home in Swampscott, Mass., after a camping excursion here.

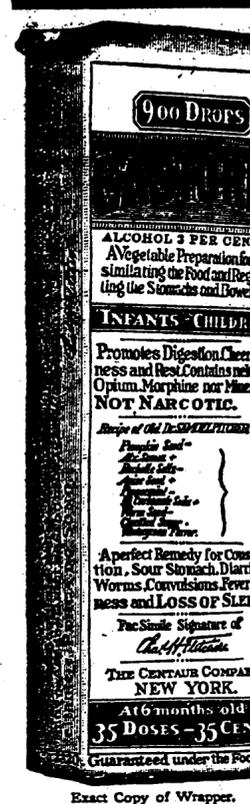

### MIDDLE WEST FARMERS DON'T KNOW NEW ENGLAND.

They imagine Land Too Poor to Raise Crops of Any Sort.

The real truth about the "worn out" farms of New England is generally unknown to the farmers of the corn belt. They have been led to believe that their farms are rich and that the farms through the east and New England are "depleted" of their fertility. If the average corn belt farmer were to take a trip through Massachusetts, Connecticut, Rhode Island, Vermont or Maine he would be so surprised that it is questionable whether he would believe his own eyes.

Farmers in New England who are "good" farmers are better than the average farmer or even the "good" farmer of the middle west, and those who are "poor" farmers are worse than the "poor" farmers of the corn belt. With the nearness to markets the eastern farmers could and in many cases do have a great advantage over the middle western farmers. All that is needed is to proceed intelligently to build up the soil, by better farming methods, a greater diversification of crops and the supplying of available plant food to enrich the soils and make large yields of high quality possible.

When drainage is needed (1) air cannot enter the soil to help make the inert plant food available, (2) friendly bacteria cannot work, (3) plant roots will not penetrate into the stagnant soil and (4) planting and cultivating are delayed and hindered. The soil is water sealed when it should be open and active. Wet land is hopeless. Drainage is the solution.
