### YOU SHOULD HAVE A FLOWER GARDEN

A Townsman Who Knows What He Is Talking About Tells  
Why Flowers Should Be More Generally Grown

Installation No. 49

Some of us will soon be thinking of suitable shrubs for groups, hedges, filling empty corners, or as single specimens.

In this article, I want to call attention to the fact that there are some desirable shrubs other than Hydrangea paniculata, Forsythia, and the common Lilies. There are many which serve the double purpose, in that their beautiful flowers are followed by equally attractive fruit. Of the latter the Cotoneasters are an extensive class of fruiting shrubs, some of which attain a height of ten feet, while others are nearly prostrate.

One of the prostrate forms, growing about two feet high, is Cotoneaster horizontalis, a regular gem it is, bearing its small shiny dark green leaves, and in fall covered with bright red fruit. It is a fine thing on the rockery, planted against or above a low wall or for feathering down groups of taller shrubs of its own family, laurel or other shrubs.

Cotoneaster dielsiana grows six feet high, has slender arching branches and pendulous coral red fruit. Other fine red-fruited varieties are C. songarica, large fruit, C. divaricata; and C. franchetii.

There are other varieties which bear black fruit, one of which, C.

acutifolia, Peking Cotoneaster, is a shrub twelve feet in height, is extremely hardy and makes a very fine hedge. In fact many of the Cotoneasters are very useful for hedge purposes, and should supersede Privet and Barberry to a large extent. When transplanting, they should be severely pruned, not forgetting, as with all shrubs and trees, to thoroughly firm the earth around the roots. The feet are some of the very best implements for this purpose.

As large specimen shrubs or small trees, few are longer-lived or more beautiful than the flowering Crabs. They are often so smothered with their wealth of flowers that they are best planted where they may be seen against other trees, and especially evergreens. Well-flowered groups of these trees furnish a sight never to be forgotten. One of the most beautiful is the carmine Crab, Malus atrosanguinea, Malus arnoldiana, originated in the Arnold Arboretum, has very large rose colored flowers. Malus halliana parkmannii has bright rose red, double flowers on long slender stems. Then there are Malus sargentii, Malus schodeckeri, Malus spectabilis and others.

Do not forget the Crabs or the Cotoneasters, when making out shrub orders.

Harold L. Brown

### THE REPORTER'S LEGISLATIVE LETTER

Our Readers will Doubtless be Interested and Enjoy Reading  
Weekly Reviews of the Doings at Concord

Ex-Governor Morrow of Kentucky, and our own Secretary of State, Hobart Pillsbury, were a grand pair at entertaining when the Republican Women gave their fourth annual luncheon last week. Mr. Pillsbury "waxed eloquent" in telling of some things the legislature is doing, but was most interesting when telling what the legislature has been and now is. Yet, after all is said and done, it is the universal opinion that state legislators in general are much the same; they are honest in their efforts and are endeavoring to benefit humanity.

The last of the bills affecting the pocketbook of the automobile owner has been disposed of, and additional sums are likely to be donated by him, even if somewhat reluctantly. This of course is in the event the Senate passes the three-cent road toll bill, and if it does the new rate will become effective May 1.

Tuesday of this week was a big day at the State House. The Senate debated the Primary Bill while the House listened to the oratorical efforts of those who favor and oppose the measure tightening up the liquor laws.

There are those who really would like to know just why certain ones favor a change in the Primary law. It is well to speak no ill of a bridge that carries you safely over.

There was virtue in the bill for an appropriation for the treatment of persons afflicted with cancer, but the House killed the bill.

The small automobile liability insurance bill is being considered and what may come from it no one at this writing can tell; yet it is hoped that if anything is done it will be something worthwhile.

The House passed the bill to permit auto registration plates to be used the last five days in December when purchased for the next year. The independence of the members of the House had evidently "got on the nerves" of floor leader Cheney, and came near upsetting the boat, but by careful navigation and with the assistance of experienced pilots the boat outdied the storm and the ship of state is again sailing on calm and tranquil seas.

Speeding up has been mentioned and very likely something of this nature will soon be accomplished; it surely will have to mean something if anything like an early adjournment is realized.

It is proposed to have Australian ballot for school meetings in Concord, and why not in other places? Most any successful candidate for office had rather not know just how a man did vote, when he tells him how glad he is that he is elected. Under the present system it is not difficult, if one is so inclined to follow a voter to the polls and inadvertently see the ballot as it is dropped into the hat or box. This has been done and the veracity of a man may be a subject of deep thought, if nothing more.

That was not a bad section of a proposed new auto law which would not allow cars to be parked along sides of trunk line highways while they were having a picnic lunch in a nearby grove or on a fishing or springing trip.

Sunday sports bills are rightfully unpopular in the present Legislature. The House has killed one measure allowing Sabbath movies, and the upper branch is ready to defeat another which would throw Sunday wide open to all kinds of sports and entertainments, provided no fee is charged.

### A 150TH ANNIVERSARY SUGGESTION

**B**EFORE the rush of Spring and Summer activities comes to claim our attention, it will be well worth while, to read again, the story of Antrim's pioneers, which the late Dr. Cochrane so ably portrays in our Town history. These early settlers together with countless others laid the foundations for our present great and unparalleled country.

An historical pageant will bring back these interesting events, and it is hoped that we may have such a one as will always be remembered with pleasure by everyone who attends.

Mary M. Hurlin, Elizabeth M. Wilson, Myrtle K. Brooks,  
Carl H. Robinson, Hiram W. Johnson, Pageant Committee

## RCA RADIOLA!

I want to notify the public that I am an Authorized RCA Dealer and can serve you promptly and efficiently. Compare any competitor—at any price—and you will find none to surpass the Radiola 20 in Musical Reproduction. It is in a class by itself.

It is not only in musical reproduction and clear speaking voice that RADIOLA 20 excels. It is twenty times more selective than the ordinary radio set. It is more sensitive than larger sets using a greater number of tubes, and reaches out far, for distant stations. It is simple to operate—a single control brings in near stations, program after program—and small verniers give sharp accuracy on distant tuning. Radiola 20 is replacing thousands of antenna sets that have not been able to meet present day broadcast conditions. It has new principles—but is no experiment. It is tried, perfected, proved

Inquire about this machine.

Radiola 20 with five tubes, \$89.50, the former price was \$115.00.

## Cemetery Work

**D**ID you know that this dull season of the year is the very best time to order Marble and Granite Cemetery Work, to be gotten out ready to set in the more hurried season of spring, before Memorial Day? CALL NOW and see our finished stock on hand which is all ready to letter and have it ready to set in spring of 1927. See the monument ITSELF and not order from the less satisfactory designs on paper. Shop within eight rods of the railroad station.

We offer the lowest prices for the best of stock and workmanship and can do so because we have the minimum of overhead expenses, no agent's or salesman's commissions, and we are the nearest dealer to this section.

The DOOM TRAIL by ARTHUR D. HOWDEN SMITH

CHAPTER VI Into the Wilderness

Before I could say anything Ta-wan-ne-ars responded for himself. "I am Ta-wan-ne-ars, of the Clan of the Wolf, war chief of the Senecas, and nephew to Do-ne-ho-gah, the Guardian of the Western Door of the Long House..."

Marjory came forward, hands clasped in exostulation. "It isn't as if it can't be so! Tell him he lies, sir!" she pleaded with Murray.

"Gentlemen," I said, "I am satisfied—that Master Murray hath a stout case. There is no more need be said."

RADIO

To Master Volume of the Radio Set

Diverge Voltage Applied to Plates of Radio-Frequency Tubes.

By CHARLES GOLENPAUL American Mechanical Laboratories. Powerful signals from present-day broadcasting stations, together with the use of power tubes, radio-frequency amplification and high voltages at the receiving end, have made it necessary to provide some means of reducing the loud-speaker volume when desired.

In fact, the ideal state of radio affairs is when there is far more volume than is ordinarily required, together with a satisfying means of throttling down this volume to any desired degree from the full tone of an orchestra down to just a faint whisper that serves as a pleasing but nonconflicting background for the dinner conversation, bridge game or friendly visit.

Indeed, this seems about as good a time as any to say a few words regarding radio manners. Only too often radio entertainment has become radio nuisance by blasting away and making conversation most difficult, or, again, going to the other extreme, by being so weak as to cause conscious or subconscious straining of the hearing faculties to distinguish the voices or music issuing from the loud speaker.

After all, the radio entertainment should be of sufficient volume to form the main interest of the listeners, when those listeners are primarily anxious to enjoy radio, or of amply subdued volume, without distortion, so as to form just the desired degree of musical background or setting for conversational or other mental activities.

Radio, in the hands of the well-meaning but sadly misguided radio enthusiast, has done more to break up conversations, friendships, households and other things than almost any other force. Hence at this time we plead most earnestly for safe and sane radio as just discussed.

Now it is one thing to cut down the loud-speaker volume and quite another to do so without impairing the tone quality. There are correct ways and means of reducing volume, just as there are incorrect ways and means.

As a general rule, the sooner the volume is reduced in the process of reception the better the results. Thus, if the volume control is in the radio-frequency end, the results are bound to be better than if the volume control is placed in the audio-frequency end after the signals have been needlessly amplified and where any change may cause distortion or serious loss of quality.

Radio Makes Maps for Ships on Briny Deep

"SWB," familiar key letters to every radio operator on the high seas, indicating United States weather bulletins, may soon pass out of hearing. It is now possible for whole weather maps to be broadcast from Washington to ships at sea and be drawn accurately by a radio-mechanical apparatus on board each ship equipped to receive them.

A map to be broadcast is printed on an 8 by 10-inch sheet of photographic film. The negative is used for actual transmission. The map received on shipboard is of the same size. The transmission method is much the same as that now used to send pictures by radio.

The negative is wrapped around a glass cylinder which revolves at a uniform speed. A ray of light from within penetrates the film whenever it crosses one of the lines drawn on the map and actuates a sensitive photoelectric cell. Each momentary flicker of light decreases the resistance of the thallium sulphide coil and a slight surge of current passes through. These surges are amplified and broadcast on 5,330 meters as an irregular series of dots and dashes which have been confusing ship radio operators of late who have tried in vain to decode them, not understanding what they were.

The receiving apparatus operates as does the sending mechanism, but in reverse order, finally actuating a pen which inscribes the transmitted map on the sheet of paper wrapped around a revolving cylinder. Thus the whole job is done and each ship has its daily weather map—an 8 by 10 sheet of 10-calculable value to navigation.

Handy Parts That Will Save Work in Switches

Grid leaks and resistances are critical things at best, and if the best results are to be obtained from any hook-up, they must be the correct values for the occasion. Often it is difficult to pre-set in advance just what values those should be, since the set builder is apt to make some last-minute change in his circuit or the values of the units he uses. Should this be the case, it is necessary to make a quick change of grid leak or resistance, unless one is willing to spend a lot of extra time undoing much of his work.

To save at this point it is well to have spare leaks and resistances of different values on hand and to use handy leak and resistance sockets, so that the changes can be made with the simplicity of changing a tube.

Brackets Make Strong Set

In fastening a wood base-board to the bottom edge of a front bakelite or hard rubber panel, do not rely on a few wood screws alone to make a strong job. Use, in addition, a pair of the convenient brass, aluminum or hard rubber brackets made especially for the purpose and you will have a strong and rigid receiver.

Selectivity First in Mind of the Set Buyer

Tone quality, until recently considered the most important feature of a radio receiver in the mind of the prospective buyer, is now placed second in the minds of merchandising experts. The reason offered is the growing number of radio stations and the alleged chaotic condition which exists on broadcast wave lengths, causing interference.

Gas Bubbles Cause "Boiling"

During the last stages of the charging process the solution in storage battery cells starts to bubble violently, and a little may splash through the vent caps. Do not be alarmed by this, as the agitation is caused merely by the bursting of bubbles of hydrogen formed during the charging action, and is not boiling caused by heat.

If Kidneys Act Bad Take Salts

Says Backache Often Means You Have Not Been Drinking Enough Water

When you wake up with backache and dull misery in the kidney region it may mean that you have been eating foods which create acids, says a well-known authority. An excess of such acids overworks the kidneys in their effort to filter it from the blood and they become sort of paralyzed and clogged.

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys, also to neutralize acids in the system, so they no longer irritate, thus often relieving bladder weakness.

Letter Writing on Wood

Writing paper made from sheets of spruce veneer, so thin it takes a pile of eighty to make one inch, is used by the chamber of commerce of Hoquiam, Wash., to advertise the city as the world's leading lumber market. The veneer, which is produced by a box and basket manufacturer for use in his product, is flexible, folds easily and takes typewriter ink as well as any linen or wood-pulp paper. Popular Mechanics Magazine.

CASCARA QUININE advertisement with logo and text: 'Colds, Fever, Gripe. Go Stop them today. Stop them quickly—all their dangers and discomforts. End the fever and headache. Force the poisons out. Hills break colds in 24 hours. They tone the whole system. The prompt, reliable results have saved millions to employ them. Don't rely on lesser pills, don't delay. Be Sure It's HILL'S Price 30c.' 'CASCARA QUININE with portrait. Get Red Box BROADSIDE with portrait'

Artistic Errors advertisement: 'Oh, those artists again! They picture Cupid as bearing a weapon that wouldn't make an abrasion on a canary bird, even if he could hit one—which he couldn't—and everybody knows, who knows anything about love at all, that Cupid's weapon is a high velocity pump gun of outrageous caliber that scores 20 hits out of 30.—Buffalo Evening Times.'

SURE RELIEF advertisement with logo: 'BELLANS FOR INDIGESTION 25 CENTS. 6 BELLANS Hot water Sure Relief. BELLANS FOR INDIGESTION 25c and 75c Pkgs. Sold Everywhere'

MIGRATION OF GULLS advertisement: 'According to F. C. Lincoln of the United States biological survey, young herring gulls do not all migrate southward in the fall as most birds are generally supposed to do. It has been learned by putting bands on the young of the herring gulls that when fall comes the birds migrate toward every point of the compass. When it comes to avoiding capture, says the biologist, the gull is much shrewder than such birds as the crow.'

DANDELION BUTTER COLOR advertisement: 'A harmless vegetable butter color used by millions for 50 years. Drug stores and general stores sell bottles of "Dandelion" for 35 cents.—Adv.'

Death on Fakes advertisement: 'Anthony A. Jordan, dean of the appraisers' staff of the United States customs service in Philadelphia, is an authority on antique furniture. He can tell if a piece is genuine or not merely by the "feel" of it.'

LUDEEN'S advertisement: 'Your throat soothed, head cleared, cough relieved—by the exclusive menthol blend in LUDEEN'S MENTHOL COUGH DROPS'

Library's Great Value Not Fully Realized

Our libraries can be made one of the most potent instruments of a creative citizenship, which aims at humanizing that grim industrialism, the grip of which tightens every day. Our policy must be to teach the community to find in the library a central laboratory of sweetness and light—a radiating power house of the spiritual and intellectual antidotes to the mechanical materialism with which life today is saturated and by which it is degraded. We must insist that the library represents the literature of power, as distinct from the literature of knowledge and of information. Just as most men and women cannot understand maps without careful instruction, so most readers do not know really how to read. We have taught our people to decipher print;

Low Voltage Aids Stability

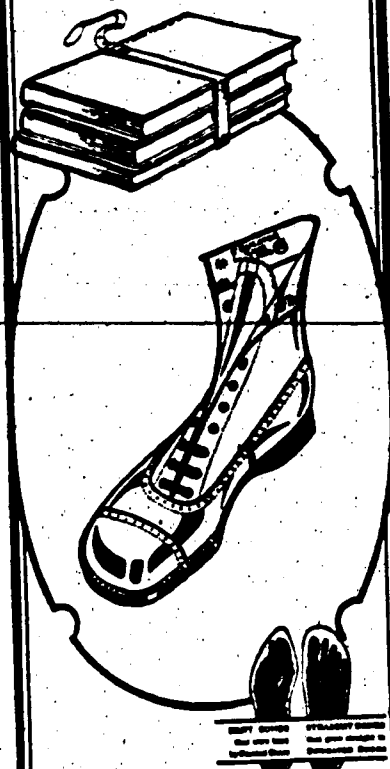

A tuned radio-frequency amplifier circuit usually is more stable when being fed 45 or 67 volts of "B" battery than when it is operating on 90 or 125.

Manila Harbor

Before the American occupation, large ships were forced to lie two or three miles off shore at Manila. An enclosed harbor has been built by constructing a long breakwater and dredging.

Hay for Sale. Inquire at Reporter office. Adv. 2t

House Wiring and Repairing done at low cost. Drop me a card. Howard Humphrey, Antrim. Adv. 2t

Miss Charlotte E. Balch is spending a few days this week with the family of Scott E. Williams, in Gardner, Mass.

Washington's birthday was not generally observed in town as a holiday; the postoffice was running on holiday schedule.

Tenement to Let—I have for rent a very nice tenement, with all modern improvements; just vacated. Apply to Fred L. Proctor, Antrim. Adv.

Mrs. Richard Hall and daughter, of Winchendon, Mass., spent the holiday with her parents, Mr. and Mrs. Wm. F. Clark.

Hay For Sale—I have a lot of good English and Stock Hay for sale. Any one desiring to buy call at once on Fred H. Colby, Antrim. Adv. 2t

A chimney fire at the residence of Fred H. Colby on Sunday afternoon and night created some excitement, but no great damage was done.

The next regular meeting of the ladies' aid society of the Methodist church will be held at their church on Wednesday afternoon, March 2; supper will be served at 5.30 o'clock.

On account of the High school seniors' special picture, the Baptist church social which was planned for Friday evening, has been postponed to Monday evening, Feb. 28, at 7.30 o'clock.

The Mission study class will meet at the home of Mrs. Mary B. Jamieson on Friday afternoon, Feb. 25. This is the annual meeting day for the election of officers for the coming year. Subject for the day is: The Korean Woman of Yesterday and Today; also the American Indian.

Antrim Grange, No. 98, on March 2, will open their meeting to the public at 8.15, at which time the State Forester will show pictures on the White Pine Blister Rust situation in N. H. There will also be the discussion of the Articles in the Town Warrant, with Charles F. Butterfield acting as Moderator. All who are interested are invited to attend. Don't forget the date: March 2, 1927, at 8.15 p.m.

At 3 o'clock, on Friday afternoon, Feb. 25, the Antrim Woman's Club will hold a food sale in the dining room of the Odd Fellows block. Orders for baked beans, brown bread and any other food may be left with Mrs. W. C. Hill, the Thursday evening before. As this is a worthy object, that of helping to put music in our school, it is earnestly desired that every one do what they can to help this cause along. Adv

### Everyone Can Help

The warrants for the annual meetings in town are published in this paper, on the eighth page. All will be interested in reading them.

See Cemetery Work advertisement of the old and reliable firm of Brennan's Peterborough Marble and Granite Works, on our front page.

There will be a special moving picture for the benefit of the senior class of the Antrim High school, at town hall, on Friday evening, February 25, entitled Brown and Harvard. Adv.

A Farmer's Institute will be held at Grange hall, Harcock, on Tuesday, March 1, from 10 to 3 o'clock, with N. H. State Dept. of Agriculture, H. Co. Farm Bureau and Hancock High school co-operating. A most interesting and instructive program will be given. At the Municipal hall, in Hillsboro, on Monday, February 26, the same program will be given.

### Good Work by Pupils of the Antrim High

The 15th annual prize speaking contest, under the auspices of the University of New Hampshire, held on Thursday evening at Durham, in the community church, had one entrant from Antrim, Miss Esther Perkins, A. H. S., who was awarded second honor, a silver medal.

It is also with pleasure that we announce that Forrest Tenney ranks third in the state in speaking excellence, as a result of the recent interscholastic debates. For a school that has done so little outside work of the two kinds herewith noted, it is considerable honor for the local High school, and shows good and faithful work on the parts of teachers and pupils.

### Resolutions of Respect

On Death of Harry Hall, adopted by Court Bennington, No. 35, P. of A.

Whereas, it has pleased the Grand Master of the Universe to take Bro. Hall from our membership on earth and connect him with the large number of members already in His jurisdiction in the Heavenly clime; and whereas, in this transfer we have lost one of our most active and valued members; and whereas, the loss is felt very keenly in our Court, therefore be it

Resolved, that in the very sudden departure from this life of our honored brother, we do bow in humble submission to the Divine will, and acknowledge our belief that what He does is for the best even if with our limited vision we are unable to know why

Resolved, that in the life of our departed brother we do imitate that quality which makes for the best in fraternity, knowing that he was a true and faithful Forester.

Resolved, that the sincerity, fidelity and usefulness of our departed brother may teach us all a most lasting lesson.

Resolved, that these resolutions be placed upon the records of the Court, that a copy be sent to the bereaved mother, sisters and brother, and that they be published in the Antrim Reporter.

Respectfully submitted,  
P. J. Burke  
P. J. Shea  
F. R. Wilson

Bible school at 12 o'clock.  
 Crusaders at 4.30 o'clock.  
 Y.P.S.C.E. at 6 o'clock.  
 Union service at seven o'clock. The pastor will speak on "Why Men of One Talent Fail."

Monday, Feb. 28. Church social at 7.30 p.m. for all members of the church and congregation.

**OCCASIONAL LETTER**  
**Is Written to Absent Friends by N. B. Correspondent**

Dear Friends of the North, South East and West:

As it has been several weeks since I have bothered our kind editor, I will send you a bit of Antrim news:

First off—I have received letters from several of you absent Antrim people and you all seem to be having troubles, with colds, etc., and you might just as well stayed at home, for misery does like company and we are all enjoying poor health.

Mumps seems to be very much in vogue at present Raymond Grant has been very ill with them, nearly having pneumonia, but is now better. Linwood Grant also has been very sick with them. The Muzzey children are entertaining the mumps now.

Jeanette Linton, who has been ill, is improving, so she is around again.

M. P. McElvin has been entertaining rheumatism, grip and a burned hand. It kept him very busy entertaining them all at once.

We have had a fine winter thus far; although if I remember right, last winter I boasted of the fine winter, and the weather man came on our map and we had some winter. Thus far autos have been able to go at all times.

Harold Cate has been to Lawrence, Mass., to visit his mother, who is slowly recovering from an attack of the grip. We also hear Mrs. R. F. Hunt, at Newton, Mass., and Mrs. G. J. Pope, at Atlanta, Georgia, are also recovering from a grip attack. We all seem to be well gripped.

Mr. and Mrs. Warren D. Wheeler are also on good terms with these colds.

Mr. and Mrs. Curtis Becker were in Nashua last week, reporting very good autoing.

Taylor and McElvin, and others at the Branch have been filling for houses the past week.

Hockey still is our sport at the Branch.

We were very much shocked to hear of the death of Fred Gibson at the Lower Village.

Sympathy is felt for Mrs. Gibson and family. Mr. Gibson had been in poor health for several years.

Surveyors are again on the landscape at the Branch.

Percy Peabody recently lost one of his team horses.

We hear there is soon to be a steam mill at the west part of the town, on the Henry Lawrence place.

Mrs. Ora Story is at North Carolina for the rest of the winter. Think I will close with the best of wishes to all absent friends.

Minnie McElvin,  
 Branch Reporter.

**W. R. C. Notes**

Ephraim Weston Relief Corps, No. 85, installed the following officers at its regular meeting on Feb. 16:

President—Carrie J. Clark  
 S. V. P.—Emma W. Nay  
 J. V. P.—Mary Warren  
 Treasurer—S. Viola Kidder  
 Chaplain—Ethel Whitney  
 Guard—Mable Parker  
 Conductor—Mina Faulkner  
 Asst. Conductor—Anna Edwards  
 Secretary—Julia Proctor  
 Asst. Guard—Lena Hansle  
 Pat. Instructor—Della Sides  
 Color Bearers—Mildred Whitney, Mattie Proctor, Lillian Cameron, Agnes Cutter

Installation had been postponed on account of sickness. Jennie L. Proctor was installing officer, and performed the work in a most pleasing manner. Mattie L. H. Proctor ably assisted at the piano.

Several of our ladies attended the Lincoln exercises held in the schools and were pleased with the efforts of pupils and teachers.

Carrie J. Clark, Pres

Winter sports have no lack this season for the necessary accompaniments of snow and ice.

**Ledge View Poultry Farm,**  
 Antrim, N. H.

**Single Comb White Leghorns**  
 Baby Chicks, Hatching Eggs, Young Stock. Half of breeders two year old hens mated with Hollywood cockerels from 250 to 260 egg hens. Vigorous, free from disease. Our hatchings 75%. Eggs, \$7.00 per hundred; chicks, \$18.00. Special pen, Hollywood pullets from 250 to 260 egg hens mated with Hanson's pedigree cockerels 260 to 280 egg hens. Price on request. Don't gamble with cheap stock. 2000 chicks due March 15th Order early.

ARTHUR L. POOR,  
 Antrim, N. H.

**Crabs as Prospectors**  
 Agile enough to climb coconut trees the land crabs infesting the little island of Ullia, off the coast of Honduras, were formerly looked upon as a nuisance. But recently the sixteen-year-old son of one of the inhabitants made a remarkable discovery by their aid.

Near one of the crabs notes, which they burrow in the ground like rabbits, he noticed some black, strong smelling mud excavated by the crabs. Experts examined this substance and pronounced it to be high-grade petroleum. It had long been suspected that oil existed on the island, but this was the first "strike."

**Opium Long in Use**  
 Opium is obtained from the juice of the white poppy. It was known to the ancients, for its cultivation is mentioned by the famous poet Homer, who wrote of the siege of Troy, and the medicinal use of the juice of this poppy is described by the ancient Greek writer, Hippocrates.

**Chinese Marriage Rule**  
 Persons bearing the same surname, although they may not be related in any way, are forbidden to marry in China.

**Antrim Locals**

Mrs. J. O. Watts is in Lynn, Mass., this week to visit relatives for a season.

Miss Mabelle Eldredge spent a few days the past week in the families of her brothers in Winchendon, Mass.

Mr. and Mrs. R. E. Tolman have been entertaining Mr. and Mrs. Howard Tenney and daughter, Gayle, of Newport.

Mrs. Winnie Willson Nagle and little son, have been recent guests of Lewis D. Hatch and Mr. and Mrs. Fred C. Raleigh.

The editor of the Reporter acknowledges with thanks an invitation to attend the reception and ball in honor of his excellency, Governor Huntly N. Spaulding, on Thursday, February 24, at Concord.

Mr. and Mrs. Henry A. Hurlin were recently informed of the illness of their granddaughter, Miss Mary Hurlin, at home with her parents, Dr. and Mrs. Ralph Hurlin, Long Island, N. Y.; a light case of scarlet fever is reported.

Mr. and Mrs. Alvah Shephardson are to remove their family and household goods to Feeding Hills, Mass., from Plattsburg, N. Y. Mrs. Shephardson and two children are spending a season with their parents Mr. and Mrs. Charles G. Wallace.

Dr. Warner, of Peterboro, was in town on Tuesday of this week.

Harold Proctor was home from New Hampshire State College for over the week-end.

Mr. and Mrs. S. S. Sawyer entertained a relative, Mrs. Munroe, from Boston, for the week end.

Fred L. Proctor was accidentally thrown from a sled one day recently, and received some bruises.

Mr. and Mrs. H. A. Warren have recently been entertaining his sister, from Woburn, Mass., for a few days.

A Washington birthday party was held at the home of Miss Wilma Allen on Monday evening. The entertainment consisted of games and music. Refreshments of ice cream and cake were served.

After the regular meeting last Saturday evening, Waverley Lodge of Odd Fellows enjoyed a social hour, and a part of the program consisted of musical selections arranged by certain members. It is planned to have something special in the way of entertainment each meeting night.

**REPORTER RAMBLINGS**  
**Touching the Topics That Are More or Less Timely**

Henry Ford could buy all the U. S. banks' gold and still have \$350,000,000 on hand, or he could easily buy the U. S. Steel Corporation, but neither purchase would give him so much pleasure as his present business.

George Palmer Putnam, New York publisher, declares that a sad commentary on the present day is the inability of children to observe and describe intelligently what is going on about them. He may be right, but it seems to us there is little that "gets by" the children.

Six weeks to two months' leave with pay will be given by the city of Chicago to 450 employes who are members of the American Legion, in order that they may attend the Legion convention in Paris this summer. It costs the city of Chicago about \$150,000 to do this. It's one city with love for her veterans.

A man steals \$14 in New York and is sentenced to a life term in jail. Sounds like a harsh sentence, but though it is his fourth offense. The thief would probably have taken \$11,000 if his victim had given him the opportunity. This statute has plenty of teeth and its enforcement is giving New York some protection from crooks.

Gen. Sir Ian Hamilton of London makes plenty of trouble when he declares in a speech called "Such is our Women" that assertion of taking the place of man "has been overcome altogether there's nothing to it." Continuing he says "Where hard, solid thinking is necessary for success" the men do it.

**HOW TO PREVENT CANCER**

"One thousand people in Massachusetts could be saved from cancer next year," reports Dr. Mary R. Lakeman of the new Cancer Control section of the State Department of Health.

"Each year between 500 and 600 people are being saved from cancer in Massachusetts. This number may be increased to 1500 if the citizens throughout the state will take advantage of advice offered at the State Cancer Clinics. These clinics are to be established in Springfield, Newton, Worcester, Lynn and Lawrence. They will be centers for information concerning the best treatment of cancer.

"Anyone with any of the following conditions should report them to their family physician or go to the nearest State Cancer Clinic:

1. Any lump in the skin, or any wart or mole that is subject to irritation or is showing signs of growth.
2. Any slow healing wound, especially on nose or mouth.
3. Any lump in the breast.
4. Any uncustomary discharge.

"These conditions are curable. Newer methods for handling these cases have been found. Among these methods are radium and X-ray. They have proved to be valuable aids to surgery, which is still the most effective means of curing this dread disease.

"X-ray is valuable in diagnosing cancer, as well as in giving relief to advance stages. Radium is used to cure early cases and to give relief in the latter stages. Surgery is still the best means of curing both the early and more advanced cases.

"The use of radium by unskilled persons may do great harm, but in the hands of the skilled and expert worker it has proved its power to swell the total number of cancer cases permanently cured."

**STATE OF NEW HAMPSHIRE**  
 HILLSBOROUGH, SS.  
 Court of Probate.

To the heirs at law of the estate of Ruby B. Cutter late of Antrim, in said County, deceased, testate, and to all others interested therein:

Whereas Ralph G. Smith, executor of the last will and testament of said deceased, has filed in the Probate Office for said County the final account of his administration of said estate:

You are hereby cited to appear at a Court of Probate to be holden at Manchester in said County, on the 19th day of April next, to show cause, if any you have, why the same should not be allowed.

Said executor is ordered to serve this citation by causing the same to be published once each week for three successive weeks in the Antrim Reporter, a newspaper printed at Antrim, in said County, the last publication to be at least seven days before said Court.

Given at Nashua, in said County, the 19th day of February, A. D. 1927.

By order of the Court,  
 L. B. COPP, Register.

**STRAW COMBINED WITH FELT; SOFT FABRIC FROCKS MODISH**

WHAT thrill of spring when the fair sex dons the little "first hats." Just the sight of a mere touch of straw after heavy furs and velvets breaks the spell of winter and even though snow and ice may not have yet said their adieu, the spring-time which reigns in our hearts.

So it is that the straw-touched fabric hat as the first harbinger of spring assumes an air of vast importance. As usual the smaller hat is the pre-

deftly draped little felts which are so numerous in the mode's first showing.

The concluding hat in this group bespeaks the approach of spring by binding with straw such of the fabric scallops which so prettily frames the face.

What pranks the stylist is playing with fabric this season—cutting it into pieces one minute, only to sew it together the next, with

SOME HATS FOR SPRING

ferred type for the beginning of the season, only this year it seems as if our chapeaux are more close-fitting than ever.

The exception to the rule of the snug-fitting shapes is the felt and straw trim which young girls are wearing similar to the model centered in this group.

Interesting, too, is the fact that some brims have taken to rolling away from the face. This tendency is emphasized throughout smart models just arriving, such as the saucy little felt shape shown to the lower left in this group. Note that its rolling brim is straw faced.

French milliners are showing in a very large way fabrics on the order

of the cleverest sort of seamings, tuckings, platings, inlays, insets and endless "tricky" ways which bespeak a beguiling modishness. And all the time Dame Fashion says bravo! bravo! and encourages for more.

Undoubtedly ingenious handling of materials is an outstanding feature of the mode. The unique side panel in the skirt of the frock in this picture is illustrative of the reigning vogue for intricate fabric manipulation. The fact that the crepe satin of which it is made has a dull and a luster side contributes to the charm of this daintily "different" cut-out effect.

The importance of wide self-fabric inset belts such as this model exploits cannot be overstated in connec-

SHOWS ULTRA FEMININE STYLING

of helms, silk, taffeta, felle and bengaline, either in entire hats of these materials or in combination with straw. Typical of the manner in which straw and fabric are being worked together is the practical-plus stylish chapeau shown first in the picture. Its crown is plaided with rows of tiny pedalline.

The bit of straw forming the narrow rim of the hat pictured in the upper right corner says, "Welcome, spring." Ornaments such as one seen on this model and the one pictured opposite it are much in evidence on not only fabric hats but also on many of

tion with the new spring styling. Then there is the skirt whose fullness is achieved with plaits. Most of the advance modes repeat plaits, plaits, plaits in bewildering array.

That "touch of embroidery" which fashion decrees for the informal afternoon frock of soft fabric takes form in a narrow banding in the instance of the dress in the picture, outlining very prettily both the cut-out skirt-panel and the plastron blouse-front. It also accents the new style item of a high-collar effect which ties in a bow at the back of the neck.

JULIA BOTTOMLEY.

**SCHOOL DAYS**

**SOMETHING TO THINK ABOUT**  
By F. A. WALKER

**TAKE THE SUNNY-SIDE**

AS YOU journey along the road of life, you may observe as you push your way in and out, elbowing the crowds and perhaps studying faces, that it is worth while to take the sunny-side.

There is at the best an odd, uncomfortable mixture of shades and shadows, which has a way of dampening ardor and giving you the "blues," when you are doing your utmost to be cheerful.

Hope, it is affirmed, deserts us at no period of our existence, but it coddles a little closer and smiles infinitely sweeter when we elect to choose the sunny-side and saunter along in step with it, under the spell of its cheery companionship.

On the sunny-side we find better health, good fortune, inspiration and innumerable uplifting thoughts which ennoble the soul.

And we get them in abundance, for they are always there, delectable and lovely as gardens of newborn roses.

The kindly face of the old lady you just brushed by in your eagerness to get ahead, bears testimony to the mystic magnetism of the sunny-side. And the fine old gentleman immediately ahead, attests by his erect carriage and beaming countenance that he has unflinchingly trod the sunny-side, since the day he resolved to leave the shadows in which he was withering and fading.

There is a lingering boyishness in his demeanor and in his vigorous step as he wends his way, lifts his hat and smiles with serene contentment.

For years, let us suppose, you were morose, moodish, sullen, ill-humored, churlish and sulky, then one day, an impulse seized you and led you to the sunny-side.

In a little while you were transformed, flushed with fervor, enthusiasm, tender passion and rapturous adoration.

You saw with new eyes, felt with new sensibility, heard with new delight. You were a changed being, due entirely to taking the sunny-side, where you could discern the bright and beautiful things in life which all the while had been close about you, but hidden in the dark.

**MOTHER'S COOK BOOK**

The world moves on, its progress brings Grand reforms, undreamed of things; But nothing modern can fill the place Of the dear old home and mother's face.  
—Mrs. C. Jewett.

**HOUSEKEEPING HINTS**

AS FOOD materials differ in price with the locality and the season, it is often impossible to strictly follow a recipe, as we find some ingredient either too expensive or difficult to obtain.

If the housewife understands the composition of foods she can substitute some other food material with good results.

For example, when butter is called for in a recipe, chicken fat, sour cream, clarified bacon fat, or some other butter substitute may be used, depending upon the food to be prepared.

Cream contains more water than butter, chicken fat less; so, in using such fats, their composition must be considered.

Chopped nuts are added to foods such as salads, mock meat loaves and other dishes, adding food value to the dish. All these things are invaluable to the housewife who is interested in feeding her family well and with economy.

The Department of Agriculture of each state and at Washington are publishing bulletins from time to time, many of them for the asking, of great assistance to the housekeeper.

The following data may be helpful in learning to compare values:

In one cupful of milk there is or should be two teaspoonfuls of fat.

In one cupful of cream, three tablespoonfuls of fat; double cream six tablespoonfuls of fat.

Butter, fourteen tablespoonfuls of fat; the two unaccounted for are salt and moisture.

One cupful of English walnuts, two-thirds of a cupful of fat.

One cupful of peanuts about one-third of fat.

Chocolate, one ounce, a scant tablespoonful of fat.

**Minute Soup.**

Take one cupful of bread crumbs, one tablespoonful of butter, one onion grated, salt, pepper and a little poultry dressing, one and one-half cupfuls of rich cream and three cupfuls of boiling water. Simmer one minute, serve with crackers.

**Would Have That Pleasure**

Horace—I'll see you again some time, eh, what?  
Phyllis—Yes, I often go to visit Uncle George.  
Horace—Your Uncle George?  
Phyllis—Yes, he's an insane asylum superintendent.

**THE YOUNG LADY ACROSS THE WAY**

**SAWS**  
By Viola Brothers Shore

**FOR THE GOOSE—**  
DON'T let your right-hand neighbor know what your left-hand neighbor is doing.

If your lawyer happens to be a member of your family, he generally advises a settlement.

You often go to bed cryin' the days you get up laughin'. But you seldom go to bed laughin' the days you get up cryin'.

**FOR THE GANDER—**  
People with strong appetites ain't much bothered about niceties of taste.

It's generally less dangerous to face a danger than to keep on bein' afraid to face it.

What if you do fight with her occasionally? Don't a man always enjoy a horse the best that takes the most breakin' in?

Compliments don't cost nothin', but they cost the giver.

(Copyright.)

The young lady across the way says no wonder lamb is so expensive when so many of the sheep are killed just for their wool.

**BUILD YOUR HOUSE**

By DOUGLAS MALLOCH

**MEN** hurry home before the approaching storm; When day turns dark, they think of hearths and fires. Some bed to lie in, and a house to warm—

When day turns dark these are the heart's desires. When that hour comes, when rolling clouds arise, When men go hurrying homeward ways, Home will not fall like manna from the skies— They must have built it in their better days.

No clap of hand will raise a fairy house, No shelter open by some magic deed; To have a roof when winter winds enrage A man must build in time of little need.

The fool will say, "I'll build a house in time, But now the summer blossoms everywhere," But who would have a house to which to climb Must build it in the days when days are fair.

No folly thinks of faith, When all is well Why heed the solemn summons of the church? "When I have sorrow, I have woe to tell, Then for her consolation I shall search."

But faith is builded as all shelters are, And who would pray must also learn to praise. A faith to hide us when the tempests roar We must have builded in our better days.

**CHILDREN CRY FOR "CASTORIA"**

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Fever, seas arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

The genuine bears signature of  
*Charles H. Fletcher*

**A QUICKER WAY TO END COLDS!**

To quickly break up a cough or cold, it is necessary to do two things: 1—Get rid of phlegm. 2—Heat irritation in lining of throat, chest and bronchial tubes.

Ayer's Cherry Pectoral accomplishes this by its powerful double action. It cuts away phlegm because its medication penetrates through and through the linings of throat, chest and bronchial tubes. You feel almost instant relief, all the way down. Then it is absorbed into the irritated membranes, just as ink soaks into a blotter. As its soothing, healing properties are absorbed by the membranes themselves, it stops the cough, breaks up the cold and brings prompt, lasting relief.

Ayer's Cherry Pectoral is hospital-proved. Prescribed by physicians. Pleasant to taste. 50c and, twice the quantity, \$1.00, at all druggists.

**THE WHY OF SUPERSTITIONS**

By H. IRVING KING

**VAMPIRES**

THIS is an ancient Slavic superstition which spread to many lands but flourished chiefly among peoples who buried their dead instead of cremating them. Though much less common than formerly the vampire superstition is by no means extinct. In 1870 and 1871 there were many trials of people accused of disturbing dead bodies in connection with vampirism in Germany—there seemed to be an epidemic of the superstition just then—and in comparatively recent years at least two cases have come to light in New England.

A vampire is supposed to be a dead person who comes forth from his grave to suck the blood of the living at night. The superstition is a bit hazy as to the form in which the vampire comes, whether as a ghost or in the actual, buried body. An examination of the oldest and best authorities would seem to indicate a sort of "astral body." Criminals and suicides turn into vampires but a rabbit running over, or a bird flying over the grave of an innocent person may change him into a vampire.

This superstition doubtless originated in the gloomy imagination of Slavs who saw their loved ones dying from some wasting disease for which they were unable to account. In a New England case of vampirism which the writer investigated about thirty years ago the family afflicted were found to be consumptive. Burning the body of the suspected vampire is the accepted remedy for the affliction.

**DEMAND "BAYER" ASPIRIN**

Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning: Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

**Would Be Glad to Have Her**  
Wife—John, I can read you like a book.  
Hub—I wish you would then, my dear. You skin what you don't like in a book, and linger over it in me.

**Keep Eliminate System Active**

**Good Health Requires Good Elimination.**

ONE can't feel well when there is a retention of poisonous waste in the blood. This is called a toxic condition, and is apt to make one tired, dull and languid. Other symptoms are sometimes toxic backaches and headaches. That the kidneys are not functioning properly is often shown by scanty or burning passage of secretions. Many people have learned the value of Doan's Pills, a stimulant diuretic, when the kidneys seem functionally inactive. Everywhere one finds enthusiastic Doan's users. Ask your neighbor!

**DOAN'S PILLS 80c**

**Special Offer to Victims of Indigestion**

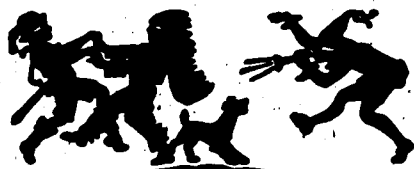

Your Druggist Says Pleasant to Take, Pepsin Most Help Poor Distressed Stomachs or Money Gladly Refunded.

You can be so distressed with gas and fullness from poor digestion or dyspepsia that you think your heart is going to stop beating. Your stomach may be so distended that your breathing is short and gaspy. You are dizzy and pray for quick relief—what's to be done.

Just one tablespoonful of Dare's Mentha Pepsin and speedily the gas disappears, the pressing on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all? Especially when any druggist anywhere guarantees Dare's Mentha Pepsin, a pleasant elixir, to help you or money, back.

The Monarchs All ready for the party—such excitement and joy. And of course the "eat" will be Monarch Cocos and Teenie Weenie Peanut Butter sandwiches. Provide plenty for they'll all want more.

THE good-looking but modest postman on Rural Route 21, District K, experienced a token of interest and a flutter of expectation as he neared the half-tubular zinc receptacle labeled "Adam Foster."

Beyond, at the end of a leafy-roofed arcade two hundred feet long, was the substantial, ivy-clinging old farmhouse. It held three daughters and two sons. In one of them young Worth Merrill was especially interested.

"Surely," assented Merrill eagerly. "I can't go there and I can't wait to have it mailed."

"As a private individual I am at your service," bowed Merrill. "Oh, thank you!" and Pearl Foster handed him a neat parcel, smiling bewitchingly and blitted away like a frightened fawn.

The Blake home was the last farmhouse on Merrill's route. He delivered the package to Miss Blake and went on his way, dreading fondly of the lovely girl who had broken the ice of a mutual acquaintance.

Merrill looked eagerly for his charming ideal the next day, but it was raining, so she did not come down to the mail box at the road. The next afternoon was fair, but the farm path leading up to the house was muddy.

Merrill saw that it exactly resembled the one he had delivered to Miss Blake two days previous. It felt soft and fluffy and he decided it was some article of feminine adornment, a lace collar, an embroidered handkerchief, or the like.

At the last delivery point Merrill had picked a spray of forget-me-nots. He released the tiny thing of beauty from his buttonhole and placed it between two letters directed to Pearl.

"Ah, another errand to Miss Blake?" soliloquized Merrill, taking up the pretty flowers. He raised them to inhale their delicate perfume.

Miss Blake stared strangely at Merrill as he handed her the bouquet. She looked at him as if misunderstanding. Then she smiled quietly, but she took the flowers and thanked him.

your jewelry, my pretty!" ordered the man, and then he went sprawling at a well-directed blow from the strong fist of Merrill and made off baffled, as Merrill caught the half-fainting girl in his arms.

"Then perhaps that fellow has started after her—began Merrill in an anxious tone. "Oh, she is surely home by this time," interrupted Miss Blake. Then she paused. There seemed to be something on her mind. She finally placed a pleading hand on his own.

"You have been so good to me," she spoke falteringly. "I think I should tell you something about—about Pearl." "Anything about Miss Foster will be of infinite importance to me," assured Merrill ardently.

"But—but it is a breach of confidence, perhaps," she hesitated. Then she burst out. "It was about those flowers." "Oh, the roses Miss Foster sent you?"

"She did not mean them for me." "Indeed?" questioned Merrill puzzled. "No. They were intended for—you." "For me? Oh, I understand now," cried Merrill in a quick, comprehensive gasp. "Why, I never dreamed of such a thing!"

"Your forget-me-nots—" "I fancied she would scarcely notice them." "Was it not a floral message?" intimated Miss Blake archly. "And the roses were—"

"A reply. In the language of flowers—you should feel honored." "And 'Stupid,' indeed, was I?" exclaimed Merrill, joyously. "Poor Pearl!" continued Miss Blake. "She had been searching the woods for some gruesome plant that would express her heartbreak."

"She need not, if the assurance that I read her good will afloat at last and an eager to tell her how happy she has made me!" cried Merrill in a riotous fervor of delight. "Suppose you come over to our house tonight?" gently suggested Miss Blake.

"Suppose I do?" submitted Merrill hopefully. "Pearl will be there. You can tell her all about your modest mistake." Which Merrill did, in a quiet corner of the pretty garden, amid sleeping roses, and the chiming crickets, and the sweet white moonlight and—love!

Much Material Today for Interesting Diary

It is a thousand pities that the very fact of her more crowded and more interesting existence makes very difficult for the modern woman the keeping of an old-fashioned diary in a new-fashioned manner.

The modern woman would fill her diary with records that would build up the gradual mosaic of her changed domestic designs and portray the quickening spirit of change in the household regime that has given her a larger liberty; with records of the innumerable ways in which she has used that new freedom to express her inner self.

Community Building

Better Homes Mean Better-Ordered Life

Comfort and beauty in homes are believed by Secretary of Agriculture Jardine to be among the most significant indications of progress in rural life.

The secretary is a member of the advisory council of Better Homes in America of which President Coolidge is honorary chairman. His statement, which follows, was contained in a letter to Dr. James Ford, executive director of that organization, which has just launched its sixth nationwide better homes campaign.

"Comfort and beauty in homes are among the most significant indications of progress in civilization. To me, concerned as I am with rural life, the increasing interest in the improvement of the farm home is most gratifying. A comfortable, attractive, well-ordered home on the farm makes for happier life, develops young people with a sounder outlook, and helps to insure appreciation of the essential values of rural life. Farming, probably more than any other occupation, is not only a business but a life, and in it the home must play an important part."

Wastefulness Laid to Wrong Building Codes

The campaign to beautify American cities and to adapt urban buildings to the demands of modern life is hampered by wasteful and unsystematized building requirements incorporated in the building codes of numerous cities, according to a report of the building code committee of the Department of Commerce.

Reform of antiquated building codes is necessary before American cities can conform to the highest standards of beauty and utility, it is declared. At present, the committee noted, there is no uniformity in building codes. As a result, construction in some localities is much more expensive than in others.

The building code committee, appointed five years ago by Herbert Hoover, secretary of commerce, to make a study of the building codes employed in various sections of the United States, has published six reports containing recommendations which have been adopted in many municipal building codes.

Contractor Is Important

After you have selected a house plan that suits you and arranged to finance your home building you still have to select the man who will do the actual work of erecting your house. The man who assembles the various materials and equipment is the contractor, and he employs workmen belonging to the different trades to perform their several tasks, finally delivering to you a house built according to your plans and specifications.

The role of the contractor is an important one. Obviously he cannot be chosen in a hurry. A prospective home owner should consider carefully some of the things one ought to think about when awarding the contract to build his house. Since the contractor uses only those materials and kinds of equipment which are called for in the specifications, some study should be made as to the materials one may use to build a house.

Property Preservation

Genuine BAYER Aspirin

SAY "BAYER ASPIRIN" and INSIST!

Proved safe by millions and prescribed by physicians for Colds, Headache, Neuritis, Lumbago, Pain, Neuralgia, Toothache, Rheumatism

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions.

"Friends Did Not Know Me" Says Mrs. Souliere

After 11 years' illness, Burlington lady worn to shadow, weighed but 98 lbs. Now in excellent health, weighs 142. Strong, alert, nerves steady, she praises Tanlac

Mrs. Mary L. Souliere is the wife of Joseph Souliere, a carpenter and builder of 135 North Bend Street, Burlington, Vt. For 11 years she endured the pangs of indigestion. "There wasn't a worse case in the country," she said. "I used to have fainting spells and was often confined to bed for ten days at a time. I was pale, anemic and short of breath. Finally I grew so thin and weak my own sisters did not recognize me. No one expected me to live."

"As a final resort my husband brought home some Tanlac, because it had helped him so once before. The very first bottle helped me. As I continued to use it and grow stronger, I outgrew all my clothes. My weight went from 98 to 142 lbs., a gain of 44 lbs. My recovery was the talk of the country," she said. "I used to have fainting spells and was often confined to bed for ten days at a time. I was pale, anemic and short of breath. Finally I grew so thin and weak my own sisters did not recognize me. No one expected me to live."

with this natural tonic, made from herbs, roots and barks. Benefit from the experience of many thousands. Over a hundred thousand letters are on file from grateful folks whom Tanlac helped to ruggist health and strength. Your druggist has Tanlac; get a trial bottle today. Over 52,000,000 bottles sold.

Quality That Assures Success

# Warrants for Annual Town, School and Precinct Meetings

All Reporter Readers Will be Interested in the Articles of Business to Come Before the Town for Discussion and Disposition. Matters are All of More or Less Importance to Our People

## TOWN MEETING WARRANT

You are hereby notified to meet at the Town Hall, in said Town, on the EIGHTH DAY OF MARCH, 1927, at 10 o'clock in the forenoon, to act on the following subjects:—

- 1—To choose all necessary Town Officers, Agents and Trustees for the ensuing year.
- 2—To hear the report of the Auditors on the Town Officers' accounts and act thereon.
- 3—To see how much money the Town will vote to appropriate for the support of the James A. Tuttle Library.
- 4—To see how much money the Town will vote to appropriate to assist the William M. Myers Post, No. 50, American Legion, and Ephraim Weston Post, No. 87, G.A.R., in properly observing Memorial Day.
- 5—To see if the Town will vote to have the Invoice and Taxes printed for the ensuing year, with the value of each lot of real estate printed separately, and appropriate a sum of money therefor, or take any action thereon.
- 6—To see how much money the Town will appropriate for the repair of roads and bridges for the ensuing year.
- 7—To see if the Town will appropriate the sum of \$2350.00 for Trunk Line Maintenance and \$1000.00 for State Aid Maintenance for the year ensuing, or take any action thereon.
- 8—To see if the Town will appropriate the amount of money necessary to secure State Aid for Trunk Line construction, or take any action thereon.
- 9—To see if the Town will vote to accept the provisions of Chapter 87, Section 1, of Revised Statutes, on a section of the Cheshire Road, so-called, and appropriate, or set aside from the amount raised for highway work the sum of \$1265.00 for this purpose.
- 10—To see how much money the Town will appropriate for Street Lighting for the ensuing year, or take any action thereon.
- 11—To see if the Town will vote to discontinue the road from the Ricker Farm to Joseph V. Stone's, or take any other action in relation thereto.
- 12—To see if the Town will appropriate money for the observance of the Sesqui-Centennial Celebration.
- 13—To see if the Town will appropriate the sum of \$400.00 for the purpose of continuing the control of White Pine Blister Rust, or take any action thereon.
- 14—To see how much money the Town will appropriate to repair the scenery in Town Hall, or take any action thereon.
- 15—To see how much money the Town will appropriate for the repair of sidewalks the year ensuing, or take any action thereon.
- 16—To see if the Town will vote to do away with that part of the old Keene Road which extends from the so-called Wilkins Road Westward to where the new road now joins the original Keene Road, a distance of 425 ft.
- 17—To see if the Town will vote to appropriate a sum sufficient to provide for the suitable care and maintenance of Public Cemeteries within its confines, which are not otherwise provided for, as required by Chapter 55, Section 4 of the Public Statutes.
- 18—To see if the Town will vote to illuminate the front dial of the Town Clock and appropriate a sum of money, not to exceed \$100.00, for the purchase and installation of a system.
- 19—To see if the Town will vote to wind and care for the Town Clock for twelve months and appropriate a sum of money, not to exceed \$50.00 for the same.
- 20—To see if the Town will vote to rebuild and construct a Concrete Bridge upon the site of a bridge located at the lower end of Elm Street over a brook running through Contocook Manor, formerly known as Miller Farm; and to take any other action in relation thereto.
- 21—To see if the Town will vote to discontinue the Branch Libraries at Clinton Village and North Branch, as they are unnecessary.
- 22—To see if the Town will vote to erect a suitable and safe Railing on Keene Road, at the dangerous spot known as Cunningham's Corner and have warning signs put near the corner.
- 23—To see if the Town will vote to accept the offer made by Richard C. Goodell to present the Town, as a Sesqui-Centennial Gift, the Robert L. Shea Athletic Field and the William E. Cram Grove, upon the conditions imposed namely: that the names shall be perpetuated and that the Town shall keep the properties perpetually for free public use for Recreational and Educational purposes.
- 24—In view of the sharp curves and extreme narrowness of the Road as it passes between high banks at the first sharp

curve each side of the home of Warren Wheeler, in the North part of the town, and the consequent danger to the Public from such condition, it is earnestly requested that, at these two places, the Town widen the Road for the few feet necessary to enable two cars to pass each other in safety, and that there be appropriated at this meeting a sum of money sufficient for the purpose.

- 25—To hear reports of Committees, and act thereon.
- 26—To see how much money the Town will raise for statutory requirements and to carry the above Articles and the Appropriations of the School Meeting into effect.
- 27—To transact any other business that may legally come before this meeting.

Given under our hands this nineteenth day of February, 1927.

JOHN THORNTON  
HENRY B. PRATT  
ARCHIE M. SWETT  
Selectmen of Antrim

## SCHOOL WARRANT

You are hereby notified to meet in the Town Hall, in said District, on the SEVENTH DAY OF MARCH, 1927, at 7.30 o'clock in the evening, to act on the following subjects:—

- 1—To choose a Moderator for the ensuing year.
- 2—To choose a Clerk for the ensuing year.
- 3—To choose a Treasurer for the ensuing year.
- 4—To choose a Member of the School Board for three years.
- 5—To choose all other necessary Officers, Agents, etc., for the ensuing year.
- 6—To hear reports of Auditors, Agents, Committees or Clubs heretofore chosen, and pass any vote relating thereto.
- 7—To see how much money the District will vote to raise and appropriate for compensation for services of School Board, Truant Officers, and other District Officers.
- 8—To see how much money the District will vote to raise and appropriate for the support of Schools, to repair Buildings, and extra compensation of Superintendent.
- 9—To act upon any other business which may legally come before this meeting.

Given under our hands in said Antrim, this eighteenth day of February, 1927.

BYRON G. BUTTERFIELD  
EMMA S. GOODELL  
ROSS H. ROBERTS  
School Board of Antrim

## PRECINCT WARRANT

You are hereby notified to meet in Engine House Hall, in said Precinct, on MARCH NINE, 1927, at 7.30 o'clock in the evening, to act upon the following subjects:—

- 1—To choose a Moderator for the year ensuing.
- 2—To choose all necessary Officers and Agents for the year ensuing.
- 3—To hear the report of the Auditors on the Treasurer's account, and act thereon.
- 4—To hear the reports of the Commissioners, Fire Wards, and Agents, and act thereon.
- 5—To see what sum the Precinct will vote to pay the members of the Fire Department for their services for the year ensuing, and appropriate a sum of money therefor.
- 6—To see what sum the Precinct will vote to pay the Commissioners for their services for the year ensuing, and appropriate a sum of money therefor.
- 7—To see if the Precinct will vote to adopt the provisions of Chapter 57 of the Public Statutes, relating to Village Districts.
- 8—To see if the Precinct will instruct its Commissioners to purchase lands adjoining Campbell Pond, as surveyed December 23d, 1926, by Caughey & Pratt, Engineers, and raise and appropriate the amount of money necessary to carry this Article into effect, or take any vote relating thereto.
- 9—To see what per cent. of the water rates the Precinct will vote to collect for the year ensuing.
- 10—To see how much money the Precinct will vote to raise to defray expenses and pay existing debts for year ensuing.
- 11—To do any other business that may legally come before said meeting.

Given under our hands in said Antrim, this nineteenth day of February, 1927.

HIRAM W. JOHNSON  
LEANDER PATTERSON  
FRED C. CUTTER  
Precinct Commissioners

## SERVICE

Among the delights of summer auto touring not the least—to the woman, at any rate, is noting the unusual signs which one sees along the roadside, especially if the ride gets away from the beaten path.

On a recent trip to central Vermont the two signs that amused the woman most were the following:

"Fresh eggs laid while you wait."

"This road leads to Lake Arlington—drive 'in.'—New York Sun.

## Sentimental Convenience

"If I ever fall in love again," said Miss Cayenne, "I'll fasten my affections to a motion-picture star."

"How extraordinary!"

"Not at all. It enables you for a small fee to observe the features of the beloved one at your convenience, without being bored by his conversation."—Washington Star.

## Facing Opposition

"A statesman must always be prepared for opposition."

"Of course," answered Senator Sorghum. "When I hint that I may retire from office, I am invariably prepared to be contradicted."—Washington Star.

## Emphasis on "Had To"

"If you had it to do over again, would you marry me, dear?" asked Mrs. Brown.

"Of course," answered her brute of a husband.—"If I had to do it over again."

## The Difference

"Ernie, dear! Don't go too far in the water!"

"But, look, daddy's out a long way."

"I know, dear, but your father's insured."—Humorist.

## Lazy Luke

"I'd like to go fishing, but my wife doesn't care about it."

"Go alone."

"Oh, I don't like to row."

## CHECK-BOOK RESTRAINT

Mr. Nyvorleh—Charles is more of a spendthrift than ever! How can I restrain him?

Mrs. Nyvorleh (and ignorant)—Why not try giving him a check book, my dear?

## Hello Hetties

The girls up at Central  
Keep busy all day,  
Whenever I see them  
They're plugging away.

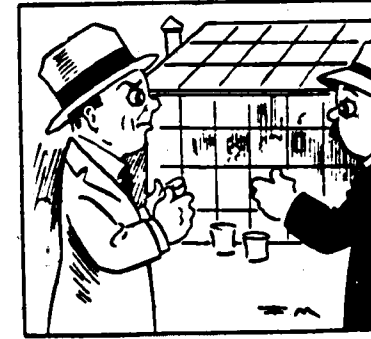

## Slow for Nell

"Have you heard about Nell's eloping with her father's handsome French chauffeur?"

"Morey, No!"

"Neither have I. I wonder what's delaying her."

## LIVED IN A GLASSHOUSE

The Florist—You're a liar, girl! What have you to say to that?

Other Man—Only this—people who live in glass houses shouldn't throw stones.

## Pitiable

For sheer hard luck  
This cops the wreath—  
Corn on the cob  
And no front teeth.

## His Affliction

Hostess—You can't imagine how bad my husband's eyesight is getting. Only today he mistook me for the nursemaid.

Friend—And she's such a pretty girl, too.

## Seniors

"I'm going to work as a salesman."

"Well, you'd make good at it if you sell gum or cough drops."

"Why?"

"You always take one's breath away."

## Modern

Bilks—So your daughter has taken up futurist painting?

Jones—Yes, this morning she came downstairs with one blue cheek, one pink cheek, a rouged upper lip, inverted eyebrows and a green ear.

## Some Lad!

Clara—So George is in love with you? The poor fish!

Mac—Well, I wish he was a devil-fish, so he'd have six more arms, that's all!

## WHY

### Yawn Is Contagious Explained by Physicians

People have a natural tendency to yawn, to cleanse waste products from the blood with a gulp of oxygen, strongest when tired, but always present. The sight of another yawning in the luxury of a yawn is all that is needed to stimulate this unconscious yawning.

It is not only the power of suggestion, that turns this latent desire into an irresistible impulse, but even more the element of mimicry. Man, like the monkey and all other animals, has a tendency to imitate the actions of another, especially if such actions appeal to any subconscious desire on his part.

Such is the explanation of the trait offered in the physiological laboratory of the Middlesex College of Medicine and Surgery by Dr. Francesco Maffiello, assistant to the head of the department, and Dr. A. Edward Balboni, professor of neurology at Middlesex, after Dr. Walter B. Cannon, of Harvard, had admitted his inability to answer the question.

### Why Cross Is Regarded as Symbol of a Kiss

Whatever your sex, at some time or other you have probably written a letter and put some "crosses" in it—for kisses. But have you ever wondered why a cross should be used as the written symbol of a kiss?

This story takes us back to the times when few could read, and still fewer could write. In that respect the nobility were no better off than those of a lower station in life, but deeds transferring property, wills and other documents had to be signed somehow. So those who could not write their names "made their mark," and this, in an age when religious symbolism was very much in evidence, almost invariably took the form of a cross. From motives of reverence the scribe used was not that of the cross of Calvary, but the St. Andrew's cross, which resembles the letter "X."

Having duly made their mark, the signatories of a document then kissed it—partly as a pledge of good faith and partly as an act of reverence. And so a cross put on paper became associated with a kiss.—London Answers.

### How Tuberculosis Acts

The public health service says that races differ very much in their resistance to tuberculosis. The colored population of the United States has a death rate from tuberculosis approximately three times as great as that of the white. The American Indian, likewise, is extremely susceptible to both pulmonary and other forms of tuberculosis. The disease often runs an extremely rapid course to a fatal termination. The Jew, on the other hand, among whose race tuberculosis has been present for many centuries, resists the disease well, and though frequently of frail physique, often makes a recovery under adverse conditions. The Irish, on the other hand, do not resist tuberculosis well, while the Italians do.

### How to Waterproof Clubs

A new process for treating wooden golf clubs makes them waterproof and extremely hard, says Popular Science Monthly. Heads of seasoned persimmon wood are subjected to a vacuum that extracts every particle of air and moisture from the wood, which then is impregnated with the newly discovered chemical. The club heads then are dried and hardened.

Clubs treated in this manner are said to have greater driving power than other wooden clubs and not to shrink or expand with varying atmospheric conditions. Inserted face plates are not required, since the chemically treated wood is itself harder than fibre, bone or ivory.

### How Ghost Stories Start

"Haunted houses," of which almost every community has had one or more at some time or another, may be simply old untenanted houses or houses with loose water piping, according to a theory advanced by water company engineers. Noises are frequently transmitted from one house to another when water is drawn. Vibrations are set up in the pipe and if the pipe is not securely fastened it and connecting pipes will hammer against the joint or wall. The noise is most perceptible when the water is turned off quickly and the "watch hammer," as it is called, makes considerable racket.—Utility Bulletin.

### Why "Fizz" Is Valuable

The fizz in the pop bottle has gone up in the world, says Popular Science Monthly, for surgeons are considering seriously its use as an anesthetic in the operating room. At a clinic recently held in Philadelphia Dr. Benn Morgan of Chicago demonstrated its use before the Eastern Society of Anesthetists. Carbon dioxide, Doctor Morgan explained, is the nonpoisonous anesthetic used by nature itself. If you are hurt badly in an accident your breathing is lessened, and an excess quantity of carbon dioxide in your blood makes you fall asleep.

### How Dew Is Formed

Dew is moisture condensed from the atmosphere, including the air contained in soil, and gathered in small drops on the surface of plants and other bodies, which radiate heat well, but conduct it badly. Frost is formed on nights when the dew point is below freezing point.

## Typewriter Paper

We still carry a stock of Bond Typewriter Paper, cut 8 1/2 x 11 inches, at prices varying with quality. Extra by parcel post. This we will cut in halves, if you desire, giving you sheets 5 1/2 x 8 1/2 in. We also have a stock of Light Yellow Typewriter Sheets, 8 1/2 x 11, especially for Carbon Copy sheets. 75¢ for 500 sheets, 12¢ extra by parcel post. Pen can be used on this very well.
