"DO YOU REMEMBER"

REV. WILLIAM A. LOYNE

NO. 17

Rev. William Arthur Loyne, beloved pastor of the Methodist church from 1897 to 1899, is held in fond remembrance by a large number of Antrim people. He was born on March 27, 1849, of English Scotch parentage, and died in Methuen, Mass., on the evening of Aug. 16, 1924. He came to America in 1869 and engaged in the tailoring trade in Dover, joining the New Hampshire Conference in 1886. He filled many pastorates in New Hampshire and Massachusetts being instrumental in the building

of an orphanage at Manchester, a hospital at Woodsville, home for aged persons at Laconia, and a cottage hospital at Gorham. Rev. Mr. Loyne had a pleasant, sunny disposition. It was his custom on Christmas morning to travel all through the town, dropping in at the homes and wishing a cheery, Christmas greeting. This he would do whether the home was Methodist, or not allied with any church. Rev. Mr. Loyne had a deep love for his fellow men and I Corinthians, 13th chapter, is a fitting epitome to his life.

THE REPORTER'S RECIPE COLUMN

by HELEN RICHARDSON

For the next few days we will probably be eating Turkey, or the remains of such, after that some of us may have to come down to hamburger, and here is a good way to serve it.

HAMBURG LOAF

1 lb. hamburger (freshly ground bottom of round)
2 slices bread, soaked in cold water, the water squeezed out and the bread broken in crumbs.
1 egg beaten
2 tbs. milk
Salt and pepper
A little chopped onion and green pepper
Mix all together, and bake in a 375°F oven, for 45 mins.

NUT CAKE

1 cup sugar, ½ cup butter creamed together. Add 2 eggs and beat well. Add 2 cups flour sifted with 1 tsp. cream tartar and ½ tsp. soda, and a little salt, alternately with ¾ cup milk. Add ½ cup nut meats (broken) dredged with flour. Flavor with vanilla and bake in 375°F oven. Frost with vanilla icing.

TWIN MOUNTAIN MUEFINS

Cream together ½ cup butter and ½ cup

FAREWELL RECEPTION

A farewell reception will be given to Mr. and Mrs. John Burnham in the vestry of the Presbyterian Church at eight o'clock next Monday evening, November 29th. Sunday, the 28th, will be the forty-second wedding anniversary of this couple and their departure from our midst, after living their entire married life here, calls for a recognition. The public is cordially invited to attend.

The Antrim High School boys and girls basket ball teams will open the season on Tuesday evening, November 30, at Antrim town hall, when they play two games with Hillsboro High School junior varsity teams. First game at 7.30 o'clock. Admission 25 cents and 15 cents.

sugar, add 1 egg well beaten. Put into flour sifter 2 cups flour, 4 tsp. baking powder, 1 tsp. salt. Add this mixture to first alternately with ¾ cup milk. Put into greased muffin tins and bake in 375 to 400°F oven. Dates or raisins may be added to this mixture.

In all my recipes I use Gold Medal Flour. That is an all round flour; if you use a strict pastry or bread flour you may have to vary the amount a little.

GRANITE STATE GARDENER

By Thomas A. Marsden, Jr., University of New Hampshire

Improving the appearance of our homes in the winter season when the color of growing flowers has disappeared is not as difficult as it seems. Window boxes, partially filled with soil, and planted with small rooted plants of some of our more common evergreens, will help your home put on a gay and festive air even on the coldest of December mornings. Red or white spruces, small fir balsams, and most any of our cultivated evergreens can be used. Added interest can be supplied by sticking sprigs of our ornamental and highly colored berries into the boxes. Such berries as the black alder, bayberry, rosehips, berries from the Regal Privet, or from any of our ornamental fruit, can be used. If you do not want to go to the expense and bother of getting rooted evergreen plants, then simply break off a few sprigs of evergreen and stick them into the soil

of the window boxes. Sprigs taken from some of the ornamental evergreens growing about the house may be used. Taking a few sprigs from some of these trees will not hurt them, instead it will aid their growth. A careful pruning of most of our ornamental evergreens helps prevent them from growing too thick and choking themselves out. In filling a winter box with sprigs I would suggest that you use some of the following to obtain an interesting variety in both color and texture: Canadian hemlock, white or red spruce, fir balsam, pasture juniper, and red cedar.

When preparing window boxes for winter interest, it is not necessary that you concern yourself with the soil conditions of the earth you put in the boxes. There will be little or no active growth of the rooted evergreens during the winter months.

PROMINENT CITIZEN PASSES AWAY VERY SUDDENLY

John W. Thornton, for many years one of Antrim's prominent citizens, died very suddenly Sunday evening while shoveling snow off the sidewalk at his home on Highland Ave. He was 69 years of age.

Mr. Thornton was born in Sheffield, England, and came to Antrim in 1891 with his bride (Sarah A. Simonite) who died in 1919. In 1924 he married Mrs. Melissa Worth, who survives him.

He was employed by the Goodell Company for 46 years; was Selectman for 12 years, Chief of the Fire Company for a long term, member of Waverley Lodge and the Crooked Encampment, I.O.O.F., and Harmony Lodge of Masons, of Hillsboro.

Besides the widow, he is survived by two sons, John W. and Albert E. of Antrim, four daughters, Mrs. Frank A. Mosley of Antrim, Mrs. Caleb J. Marston of Concord, Mrs. Maurice J. Tucker of Antrim, and Mrs. Wilfred Sullivan of Hillsboro, and several grandchildren. A daughter, Nellie, died in 1895, and Miss Eleanor, in 1935.

Funeral services were held at the Presbyterian church Wednesday afternoon at two o'clock, and the abundance of beautiful flowers bore testimony to the high esteem in which he was held in this community and everywhere he was known. Rev. Ralph H. Tibbals officiated, assisted by Rev. William McN. Kittredge. Mrs. Felker was the organist. The Odd Fellows service was exemplified.

The bearers were Archie Swett, Alfred Holt, Archie Nay, Maurice Poor, James Patterson, Charles Taylor. Burial was in the family lot at Maplewood cemetery.

HIGH SCHOOL NEWS

Friday, November 12, an assembly was held in high school with Barbara Fluri as the leader. The Sophomores having charge of the program chose as a topic: "Armistice Day and Education Week".

The program opened with the school singing "America", after which Jerome Rutherford led in a flag salute. Isabel Butterfield spoke about Armistice Day and the quest for peace, and then more songs were sung. Dorothy Whipple read a poem entitled "Peace" and Jane Rutherford talked about Edith Cavell, an outstanding character in the World War. Richard Ayer gave a short talk about "The Great Decision."

In honor of Education Week Elizabeth Hollis talked about "Horace Mann and Antioch", Reginald Cleveland followed with "His Influence Spreads", and Norine Edwards gave an interesting talk "He Gave Us Schools".

The Assembly closed with the school singing "The Star Spangled Banner". Mildred Newhall.

REV. EDWIN T. COOKE SPEAKS AT GUEST NIGHT

The annual Guest Night of the Antrim Woman's Club was held Friday evening, November 19, in the Presbyterian church vestry with a hundred members and guests present.

Rev. Edwin T. Cooke, Methodist Episcopal minister of Manchester, was the speaker. His subject was "The Place of Humor in Life". He pointed out the many advantages of a sense of humor in meeting all the demands of life. One needs humor for a balance in one's character. His humorous stories produced what he said was needed in life—a good laugh.

The speaker was introduced by the club president, Mrs. Fred A. Dunlap.

The musical numbers on the program were: two violin solos by Leslie Coad of Hillsboro, who was accompanied at the piano by his mother; two songs by the male double quartet, Fred Butler, Robert Caughey, Herman Hill, Carroll Johnson, Lester Putnam, Wendell Ring and Alwin Young, of Antrim; and two selections sung by Mrs. Ethel Roeder and Mrs. Vera Butterfield, whose accompanist was Mrs. Gertrude Thornton. All the music was well rendered and seemed to be enjoyed by all those present.

Refreshments of ice cream, cake and coffee were served following the program of the evening.

Merna Young, Publicity

REPORTERETTES

Mussolini says he thinks that Germany ought to have some colonies. Well, how about Sicily or a slice of Ethiopia?

They used to say that Uncle Sam was a pretty shrewd business man but Europe certainly outsmarted us when they borrowed all that money.

Cattle and hogs are now higher in price than they have been for four years but the trouble is that the farmers haven't nearly so many to sell.

Secretary Cordell Hull is going to see to it that you will be able to stand on your own feet—by providing you with shoes from Czechoslovakia.

What with streamline cars, trains and airplanes, all for the sake of greater speed, we should build streamline bears to take care of their by-product.

Physicians have decided that babies can hear from the time they are born, so fathers had better be careful what they say when they walk in and see triplets.

We understand that John Bull is going to resist Japanese penetration of China in the name of humanity until the Japs promise her a slice of international trade control under the new dispensation.

Weekly Letter by George Proctor Fish and Game Conservation Officer

Have at hand a nice long letter from my old side kick Jim Peck of Fitchburg, Mass. Jim has been holding down a cot in a Boston hospital for the past six weeks and is glad to get back to his home in Fitchburg. Jim, as you know, is a Conservation Officer in the Bay State.

Here is another show in Boston that will attract a large number of people. It's the 21st annual Canary show and the dates are Dec. 27th and 28th at Horticultural hall. Plenty of prizes.

The past week-end has been the worst for lost dogs that we ever experienced. The old phone was hot Saturday and Sunday, reporting in dogs that were lost in all the towns about us. Most of these dogs were rabbit hounds.

The Peterborough Fly Fishing club is composed of real honest to goodness sportsmen. They have a small limited membership. A fine pond in North Peterborough which is well stocked every year with real trout. No one can fish this pond unless a member and then by fry only. Last Friday night they held their annual meeting and election of officers at Wapack Lodge in New Ipswich. The supper or banquet was one of the best I ever sat down to. Miss Buck is to be commended on the table she set for one of these affairs. The old board of officers was reelected headed by "Chuck" Cummings of the Red Guernsey club. There were colored movies from California and the State Dept. About 40 men sat down to the banquet. Plans for stocking the pool with big ones was talked over and other plans were made for the season of 1938. I have been a member of this wide awake organization for the past few years and am glad to be associated with such a nice bunch of sportsmen.

They tell us that we live in the sticks where the wild foxes and bobcats roam in the back yards but according to newspaper reports we are not so far back as Concord, where wild bears are roaming the streets. That's one for the people of Concord to laugh off. There is no question now as to the shortage of water for the winter. The heavy rain of Saturday last did the trick and all the ponds and lakes and streams are full to running over and all the wells and springs are full. No hard work this winter carrying water as in the past.

The new State Police Dept. is doing a real job this year in checking all the cottages and summer homes in the state. Get in touch with the State Police at Concord. Tell them about your summer home, where located and who's in charge of the place during your absence. They are working 100% with the property owner.

It won't be long now to the cutting of spruce and evergreens for the Christmas holidays. The Hunting and Fishing magazine is pointing out the fact that unless this great waste is not stopped there will be a shortage in trees in a few years. Where this cutting is a business they restock the area.

Ran in the other night to a meeting of the Amherst Men's club. For a small town this club is a power. The reading of the minutes show that the club is doing a great work for the advancement of the town. Over 70 men were present and saw of the State's fine moving pictures of wild life put on by Mr. Murry of the State Dept. Refreshments and a hot game of indoor baseball was enjoyed after the meeting.

O Boy ain't it a great and glorious feeling to come out of a real honest to goodness banquet at peace with all the world, get into the car and coast down the road a half a mile and then find a tire flat. No lights and on a lonely road. Walk back to get a lantern. Jacking up the car was but a few minutes' work but try and get that spare on. If the man that invented that wheel could have been present his life would not have been worth a red nickel. As it was wherever he was his ears burned that night. Dark and the light was none too good but was good enough so after an hour which seemed like two weeks we got the spare on and homeward bound. By that time we were ready for another banquet. Not a car passed either way till I got ready to start and then six went up and three down. That makes three flats in the same town in one week. Guess we will give that burg a wide berth for awhile.

The past week we have seen more hares and rabbits in the possession of hunters than for a long time back. Those coney that the state bought from Missouri last year have turned out wonderful and the boys are having great luck bagging them.

The state of Massachusetts is holding 10,000 ring neck pheasants for the spring planting. They cut down on the number released in the fall.

According to the sporting magazines Congress is to take some action on the Cummings Anti-Gun bill in this coming session. This man Cummings wants to control your firearms. Let's watch for this action.

Here is a little tip. Every man who owns a gun or is interested in any branch of sport that takes in the use of a firearm of any kind should set down and join up with

the N.R.A. The National Rifle association headquarters in Washington, D. C., No. I have no connection with this association and no interest only that it's a wonderful thing for the gun man. But for this organization we would have lost our guns two years ago. Get a sample copy of their magazine and read for yourself. All these rifle clubs are connected with this big organization. If you only knew what this organization has done for you in the past you would gladly dig down.

Now is the time of the year to pull out that boat and get it on high land for painting. A good many boats were ruined last year by being froze into the ice. In looking over the lakes and ponds now be sure to report in any strange boats and canoes that may be left out. We have quite a list of stolen boats and canoes and we would like to look over some of these strange crafts.

If you find a trap on your property and you have issued no land permits let the trap remain. Do not disturb it, but get in touch with the nearest Officer and he will do the rest.

Know what you are shooting at. One fellow out west went out with his horse to do some deer hunting. Seeing some bushes moving he up and let drive and killed his own horse.

THE GYPSY MOTH

When Professor Woodward, the forester at the State University, was here a few weeks ago, he said that the usual method of caring for gypsy moth nests is very inefficient. To go about in deep snow in late spring allows most of the live eggs to escape, for the cold freezes most of the high nests. It is those that are low enough down to be protected by the snow that live through the winter, and do most of the damage.

He said that the work should be done before snowfall. He also said that some of the creosote that is used is of little value. The kind that should be used is called "Gypsy Moth Creosote", which can be secured from paint wholesalers.

Now if we are to take proper care of our street trees, which are so beautiful, and mean so much to our town, we must look after the gypsy moths. The town has no appropriation to take care of the matter, and it might be rather late before one could be put through at town meeting. Since the snow has already come, unless it goes away again, the work should be done just as soon as the snow melts in the snow melts in the spring.

I should like to make a suggestion. Perhaps some one will have a better one. It is this: that a proper amount of creosote be obtained, and a careful man hired, to take care of the nests on the street trees at the proper time, each property owner paying according to the number of nests found on his trees. The cost would be extremely small for each one, and since we should like to keep our trees as long as possible, it would be well worth while.

What Irwin S. Cobb Thinks about

The Law's Injustice.

SANTA MONICA, CALIF.—Had it happened in another country, we'd say, "What curious ideas foreigners have of law enforcement."

A footpad with an evil record held up a victim. A bystander saw the crime, identified the thief.

The ruffian was held under indictment. But he could give bond. The spectator was "detained" as a material witness—a gentle way of saying he was locked up, exactly as though he had been the criminal. Well, he was guilty of being poor.

Irwin S. Cobb

Six months later came the trial. The defendant, having been out all that time on bail, looked hale and hearty. The prosecution's witness was produced under guard, pale and sickly from close confinement. It didn't help his health any when the crook's attorney browbeat him, yelled at him, practically accused him of perjury.

The citizen sued the state for false imprisonment, for loss of wages, for separation from his family, for all he'd suffered. Under the statutes he had no standing. They threw his case out.

Meanwhile, the convicted crook had been released by the parole board and was free as a bird.

Aquatic Novelties.

INTERESTING discoveries were made in Hawaiian waters by government ichthyologists. For fear the similarity of sound may lead to wrong impressions, let me state that this department has nothing to do with Secretary Ickes, although, since ichthyology pertains to fish, Mme. Secretary Perkins might possibly have a contrary view on this point. Because they do say there are moments in the cabinet when all is not sweetness and accord.

However, the point is that Uncle Sam's piscatorial sharps dredged up a fish that is most delectable for six months of the year, but poisonous the other six months. So at least they've found a creature emblematic of the California climate.

Let this be regarded around here as treason, I will state that I'm as loyal a native septon as any that ever came out of Iowa, having been here long enough now to join in passing resolutions endorsing the scenery and at intervals uttering three loud ringing cheers for the sunsets.

Also let envious Florida refrain from gloating. To typify Florida's climate that fish would be good only four months of the year and powerfully hard to put up with the rest of the time.

Lecturing Adventures.

IN ALABAMA is a sect which forbids its converts to laugh or even smile. Now I know who it was bought out the house when I delivered a humorous lecture down there.

The other day a chap asked me why I didn't go back on the lecture platform. I told him I'd appeared in practically every sizable town in America, and, though it was years ago and probably popular indignation had abated now, still I wasn't taking any chances—I was waiting for some new towns to be built.

Once I tried the experiment of slipping around to the front door to hear what the crowd said, coming out. That was the night I attempted suicide by gas, but was saved when someone, passing through the hotel corridor, smelled something that smelled even worse than the hotel smelled.

A lecturer's lot is not a happy one. But usually it's the audience that suffers most.

Eating Oysters.

THERE'S a brand-new movement called eat-oysters-in-any-month-you-please movement, or, unless you're working on space rates, it may be called E. O. I. A. M. Y. P. M., for short. Its sponsor says the prejudice against eating oysters in months having an "r" in them is a fallacy dating back 2,000 years when, between hicoughs, a Roman senator said: "Oysters should be eaten only in certain seasons."

So it appears we've been penalizing ourselves ever since then for the indigestion of a Roman senator, although, so far as eating the California oyster is concerned—he runs around forty to the dozen—I personally could refrain for the whole year without any undue longings. The California oyster looks something like a brass overall button suffering from vertigis.

Still, maybe it's all for the best. Because during May, June, July and August is when the oyster does practically all his courting. There's little enough romance left in the world—and anyhow, who am I to come between an oyster and his love-life? He doesn't seem to have any too much fun the rest of the time.

Washington Digest

National Topics Interpreted

by William Bruchart

National Press Building

Washington, D. C.

Washington.—Word comes from Rio de Janeiro that the government of Brazil has decided at long last to place its coffee business again on a competitive basis. That is to say, Brazilian coffee once more will be sold in world market conditions. It was 14 years ago that crop control was started, and now it has flopped finally after costing the growers losses accountable in millions and after virtually wrecking some portions of Brazil's foreign trade.

I think it might be said also that the fallacy of the coffee control policy was among the real causes which eventuated in the dictatorship that established itself in Brazil recently. President Getulio Vargas succeeded in placing himself at the head of the nation "indefinitely" and he did so, he said, because of "unrest among the peoples" of the provinces. The first dictatorship in the Western hemisphere, therefore, is a fact.

But to get to the coffee question: it was the determination of the Brazilian leaders that a policy of scarcity would force coffee prices higher in the world market. The state of Sao Paulo initiated the scheme. It failed to work, and its sponsors said the reason was its scope was limited. Thus, it was expanded until the whole nation was embraced. Still, coffee prices did not go high enough and it was then that actual destruction of coffee began. Millions of tons were dumped into the Atlantic ocean and other millions were burned—even as we in this country burned surplus wheat and corn and killed 6,000,000 pigs.

As the destruction continued and the growers found themselves tied tighter with regulations and decrees, there were some increases in prices. But the promised great profits proved to be as illusory as a mirage on the desert.

The whole thing was a boomerang. Not only were the producers in Brazil disillusioned by failure to gain the record returns they had been led to expect, but they found another sad and wholly disadvantageous result staring them in the face. There was some increase in the price—just enough, indeed, to reduce consumption to some extent—for the growers, but with Brazil reducing available supplies others got into the producing business.

Among these new coffee growing areas, Colombia sprang into prominence. Maybe Colombia coffee was not as good as Brazil's, in quality. Maybe it was not quite as acceptable otherwise. But it was cheaper, and it was profitable for Colombia planters to produce. They found a ready sale.

That, however, was not the worst. When other coffee-using nations bought coffee from Colombia and other growing areas, Colombia was able to buy other commodities from the nations buying her coffee. New trade agreements suddenly showed up; new relationships were established, and some of Brazil's former business connections throughout the world are gone with the wind. They may never be re-established.

We, in the United States, ought to give quite a bit of thought to Brazil's coffee experiment for we have had, and are threatening to have more, experiments of a kindred nature. Lessons in crop control are right expensive, and more important is the fact that sooner or later all through history, they have had to be abandoned. And when I refer to crop control, I include all kinds of production control whether agricultural or industrial. Somebody always has to pay dearly for it and usually the cost has been extended. It is reflected in other commodities and in taxes until the actual loss from the experiment is multiplied many times over.

Speaking of congress, the way it has started off makes me think that the extra session was purely a political move. I am quite sure it is going to accomplish some great good like amending the neutrality act. Of course, I suppose I should not be selfish. I ought to consider that the representatives and senators must have time to make speeches for this or that or the other so that their constituencies back home will be duly impressed with their importance. Maybe so! But I repeat that the prospect of anything worth while in either the special session or in the regular session to follow in January is decidedly dull.

Politically, there are several things to watch for in the time that congress will be heave-hoing. One of these definitely now visible is the maneuvering among the Democrats to find out whether President Roosevelt really wants to be a candidate for a third term.

I think I am violating no confidence when I say that a good many of the President's real friends at the Capitol would like to know, and know now, whether he is going after a third term. He hasn't told them in a way that is convincing. He made a speech at the "victory dinner" last March 4 in which he said

he had an ambition to leave the President's chair and desk with "the nation intact, a nation at peace, a nation prosperous," etc. He said he planned to do that in January, 1941.

That would seem to be clear enough. Yet, it is amazing how many members of the President's party at the Capitol contend that those remarks did not constitute a final withdrawal. They point as well to the fact that other Presidents, after being re-elected for a second term, have come out flat-footed with their announcements and have told their party, in effect, "Go out and get yourselves a new candidate."

So, I am making a small prediction. There will be plenty of odd maneuvers, unusual situations, that will appear to "just happen" that way. Their purpose will be to bring about a circumstance wherein President Roosevelt can appropriately tell all of those who have so faithfully stood by him that he is, or is not, a candidate for a third term.

The other phase of congressional activity that will prove interesting links in somewhat with the third term question. It involves the personal political fortunes of the representatives and senators who will seek re-election in 1938. It is easy to see how many Democrats, if they know definitely that President Roosevelt will seek a third term, will want to ride again on the New Deal wagon. It is equally easy to understand how some of them, desirous of observing the tradition that no man shall serve more than two terms as President, may want to take a stand opposing the course if President Roosevelt decides that way.

This condition leads far afield. I am informed, for instance that some senators and representatives who have been back home in conservative sections of the country want to dodge further support of the New Deal. This class obviously is biding its time for something to happen to justify a jump. Announcement by Mr. Roosevelt of intention to be a candidate for the third term would provide the reason. The converse is true, as well, for there are those in the house and senate who have found the President's personal popularity at home as great as ever and they are looking for an excuse to sound off that they believe in the Roosevelt policies 100 per cent and want him to have a third term.

The election results in various parts of the country will have some influence on the attitude of representatives and senators as the session continues. Take the vote in Arkansas, for example. Representative Miller won the senatorship in succession to the late Senator Joe Robinson. His victory was over Governor Bailey, who announced that the New Deal was for him and that his defeat would be a slap at President Roosevelt. It is a fact that New Dealers were pulling for him—but Representative Miller was elected.

That is just a sample. The senators and representatives are going to interpret such elections in the light of sentiment in their own bailiwicks. Undoubtedly, some are going to show more spunk in behalf of the New Deal while others have come back determined to foster their ideas of Democratic principles rather than those of New Deal.

This date being what it is, I want to record a tribute in these columns, a tribute to a grand public servant who never has sought publicity for himself nor claimed the credit that is due him. For, it was 40 years ago this week that Col. Edwin A. Halsey, of Tye River, Va., entered the employ of the senate. Now, he occupies the post of secretary of the senate, the highest available outside of senate membership. The senate never convenes but that I am again impressed with the smoothness of the senate organization under "Eddie" Halsey's direction. I truly believe him to be the best informed man at the Capitol on legislative procedure. As his colored messenger once said to me: "Yessah! De cunnel he suah do know his stuff."

And that goes for Colonel Halsey's political acumen, too. He has performed the chores of the Democratic side of the senate to everybody's satisfaction. I suppose some of the senators who like to be regarded as big shots won't care for this exposure, but I have seen them saved from unnumbered mistakes that would have made them the laughing stock of their constituencies. Day after day, in season and out, "Eddie" Halsey has done more for the Democratic senators than they can ever repay. He ought to be called "the Sage of Tye River," as his counsel warrants that description. The state of Virginia could do itself a good turn if it kept "Eddie" Halsey in mind for something higher.

© Western Newspaper Union.

WHO'S NEWS THIS WEEK...

By Lemuel F. Parton

NEW YORK.—Faint school-day memories bring back one of the prettiest passages of Terence about the human voice passing and being forgotten and only the written word surviving. From a vault in the Smithsonian institution, a mechanical voice answers him, after 2,000 years, reminding him that "there are more things in heaven and earth, Horatio, than are dreamed of in your philosophy."

Charles Sumner Tainter's graphophone gets an encore after fifty-six years, and speaks, scratchily to be sure, the words first used in wax recording. Mr. Tainter was assisted in the invention by Alexander Graham Bell and his cousin, Chester Bell, but the graphophone was accepted as his invention, also the dictaphone.

The voice from the crypt of the years, however, is believed not to be his. His daughter, Mrs. David Fairchild, of Coconut Grove, Fla., thinks, though, that he wrote the message for the recording. She says he liked to quote Shakespeare.

Mr. Tainter is the sole survivor of the three. He is eighty-three years old, living in a quiet residential street in San Diego, a street bordered with eucalyptus and pepper trees and poinsettias. It was his idea that the old graphophone be called out for another turn, but he was unable to go to Washington to hear it.

This writer observed in his early youth that garret inventors and cobblers quoted Shakespeare and were usually known as the "well-posted men." A Yankee inventor, and pretty much of a garret inventor, was Mr. Tainter. At his home in Watertown, Mass., he was tinkering and scheming during his early years and, like Thomas Alva Edison, whose tin-foil phonograph recording preceded the graphophone, he did not go to school any more than he had to. Both took up their conjuring at an early age without academic aids.

He was co-inventor of the radio-telephone, using light as a sound carrier in communications. At the age of twenty, he had begun associating with scientists and went to the South Pacific to observe a transit of Venus. After his invention of the graphophone, he continued his researches in the development of the talking machine, and received many scientific awards, at home and abroad.

But doubtless today there are more school children who know about Terence, who said that the voice must perish, than there are who know of Charles Sumner Tainter, who made it live.

MISS ROSE LIVINGSTONE, stabbed, blackjacked, tossed out of two-story windows, ribs and leg broken, half-blinded, beaten twenty-two times in her 34 years' war against vice in New York, gets a silver cup.

The donor is Mrs. J. Sergeant Cram, and the cup is one of eight, presented to various persons for "peace heroism." Miss Livingstone received a similar award in 1929, when the National Institute of Social Sciences gave her a medal at a ceremony at which John D. Rockefeller, Jr., also was honored.

She lives alone in an East side tenement room, sleeps in the daytime and stalks the city's slums and stews at night, saving girls. She has snatched hundreds of them from the vice lords, sent to the hospital many times in these encounters. She lives on \$50 a month, supplied by the "Rose Livingstone Prudential committee." These funds failed several years ago and she had no support, but now her committee is solvent again and once more the "Angel of Chinatown" assails the hosts of darkness, fighting for souls. When she was stabbed three years ago by a white-slaver, the knife entered her lung. The wound troubles her. Her sight was impaired by a blackjack blow, but she says "I will go on until God calls me."

"I get up late in the afternoon," she says, "eat something out of a tin can and go out for the night's work."

It is lonely work, from dark to dawn, usually in the Brooklyn navy yard district. Sometimes she wears a disguise; sometimes she "joins" a gang, to get evidence. She is a little woman, about five feet tall, with graying bobbed hair. She came to New York from her native town of Hamilton, Ohio, in 1903. She was horrified by her first sight of city slums and then and there began her vice war. She turned in her life for a silver cup and a medal, and, possibly more important to her, the gratitude of innumerable girls she has dragged from the pit.

She says she isn't very religious. She is disillusioned about social uplift and social panaceas.

Waiting to Be Sewn

NOW, we ask you, isn't this the layout supreme for Young America, Miss Modern and Mother Meticulous? Childish glee, sophisticated gusto and maternal satisfaction will be the order of the day when you have run-up these swank wardrobe assets. Remember, it's the natural thing to Sew-Your-Own!

For Master or Miss. It's grand to be young in the wintertime; there's so much fun to be had. Mother, to be sure your edition of Young America has his share of outdoor fun this winter make this smart and complete ski ensemble. (For either boy or girl.) It is styled after a real ski champion's outfit and makes an instant hit with every young husky. (Incidentally, this ensemble rates mighty high as a remembrance from Santa Claus.)

Sophomore Sensation. Here's a dress after your own heart, Milady!—I betcha. Sew-Your-Own calls it its Sophomore Sensation. And aptly, for its allure and poise are typical of the modern miss. From Paris comes its concave silhouette; from S-Y-O its concise, easy to follow sewing instructions. Make your version in thin wool or velvet for Ace occasions this winter.

Carefully Planned. Mothers are sweet in almost any kind of dress, but in the trim new model, above right, they're superbly sweet. There's something genteel about its styling. It was carefully planned to bring you the best in style, the most in comfort. A glance at the diagram will convince the woman who sews of its simplicity. Two versions will be better than one

of this charming fashion. Anything from percale to sheer wool will do nicely as the material.

The Patterns. Pattern 1965 is designed for sizes 4, 6, 8, 10, and 12 years. Size 6 requires 2 3/4 yards of 54-inch material for the ensemble plus 1/2 yard knitted fabric for hat, sleeve and trouser bands and 7/8 yard zipper fastener for blouse front.

Pattern 1359 is designed for sizes 12 to 20 (30 to 40 bust). Size 14 requires 4 1/2 yards of 39-inch material. With three-quarter sleeves 4/4 yards are required. The bows and belt require 2 1/2 yards ribbon.

Pattern 1402 is designed for sizes 34 to 46. Size 36 requires 4 1/2 yards of 35-inch material. The collar in contrast requires 3/4 yard.

Send your order to The Sewing Circle Pattern Dept., 247 W. Forty-Third Street, New York, N. Y. Price of patterns, 15 cents (in coins) each.

New Pattern Book. Send 15 cents for the Barbara Bell Fall and Winter Pattern Book. Make yourself attractive practical and becoming clothes selecting designs from the Barbara Bell well-planned easy-to-make patterns.

Home Heating Hints By John Barclay Heating Expert

Rubbish and Garbage Should Not Be Burned in Your Furnace; They Cause Trouble.

I SHOULD like to caution you against burning garbage and rubbish in the heating plant of your home. Many home-owners are given to this practice, knowing it is a quick and easy way to dispose of garbage, but not realizing fully that it is very harmful to the furnace.

Your furnace was built to burn coal, and coal only. Garbage and rubbish, when burned in it, de-

posit a thick crust of soot on the burning surfaces, and this soot absorbs much of the heat that should go into your rooms. They also form clinkers which, as you know, cause no end of trouble for you in keeping your fire burning efficiently.

Don't burn rubbish or garbage in furnace. They cause heavy soot to cake on surfaces and waste heat and also cause clinkers to form. Keep the ashpit clean.

Remember this: A clean furnace, like a clean automobile engine, will give better service and greater comfort.

WNU Service.

When Sales Drop Between 1929 and 1933 the expenditure for advertising in newspapers and periodicals dropped 50 per cent, but the value of manufactured products showed a much greater reduction percentage.

Name _____ Street Address _____ City _____ State _____

Ask Me Another
A General Quiz

1. Is gasoline a stronger explosive than dynamite?
2. How many acres of floor space are there in the Capitol in Washington, D. C.?
3. Is it true that the Golden Gate bridge would sink instantly if it should be destroyed by enemy bombardment?
4. How does a nautical mile compare with a land mile?
5. Why is Wall street so called?
6. What kind of a government has Italy now?
7. What is the record length of time that any one has ever attended college?

Answers

1. According to Dr. George Granger Brown of the University of Michigan, gasoline as an explosive has 10 times the explosive power of dynamite.
2. The building has a floor area of 14 acres. The structure stands in a park of nearly 50 acres. The dome is 387 feet in height.
3. It is designed so that it would immediately sink to the bottom of the channel and not congest the harbor.
4. It is almost 800 feet longer than a land mile.
5. A wall, the northerly defense of the city, once ran along it.
6. Italy is now referred to as a corporative state. The legislative powers of parliament were surrendered to the council of corporations, set up January 18, 1934. Mussolini is the head of this.
7. It is said to be that of the late William Cullen Bryant Kemp. Returning to college at approximately forty years of age, he took courses in almost every school and department of Columbia university up to the age of seventy. His degrees included A. B., A. M., Ph. D., LL. B., LL. M., M. E., E. E., C. E. and Phar. G.

Advertising Reduced Cost

A third of a century ago the price of the cheapest automobile was about \$5,000. Today a much better car can be bought for around \$700. Advertising created demand, demand created mass production, with many times the number of jobs, and mass production improved the quality and reduced the price.

HOW LONG CAN A THREE-QUARTER WIFE HOLD HER HUSBAND?

YOU have to work at marriage to make a success of it. Men may be selfish, unempathetic, but that's the way they're made and you might as well realize it.

When your back aches and your nerves scream, don't take it out on your husband. He can't possibly know how you feel.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."

Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

Peace in the Home
He is happiest, be he king or peasant, who finds peace in his home.—Goethe.

STOP NIGHT COUGHING AND THROAT TICKLE. Get a good night's sleep. A tsp. of Kemp's Balsam soothes tender membranes... lubricates dryness.

Ma!
I got my name in the paper!

Only Newspapers bring the news of vital interest to you

Headlines may scream of death and disaster without causing you to raise an eyebrow. But if your son gets his name in the paper—that's real news!

It isn't by accident that this paper prints so many stories which vitally interest you and your neighbors. News of remote places is stated briefly and interpreted. Local news is covered fully, because all good editors know that the news which interests the readers most is news about themselves.

Now is a good time to learn more about this newspaper which is made especially for you. Just for fun ask yourself this question: How could we get along without newspapers?

KNOW YOUR NEWSPAPER

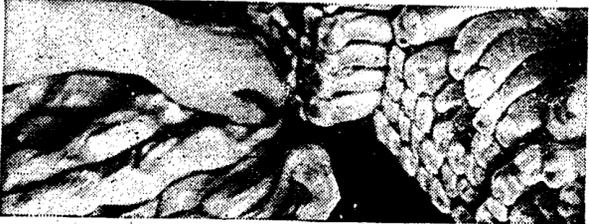

SAGA OF SILK

Lowly Worm Achieves Its Moment of Glamor

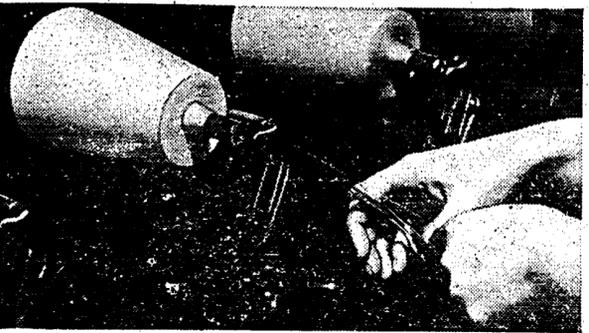

in **PICTURE PARADE**

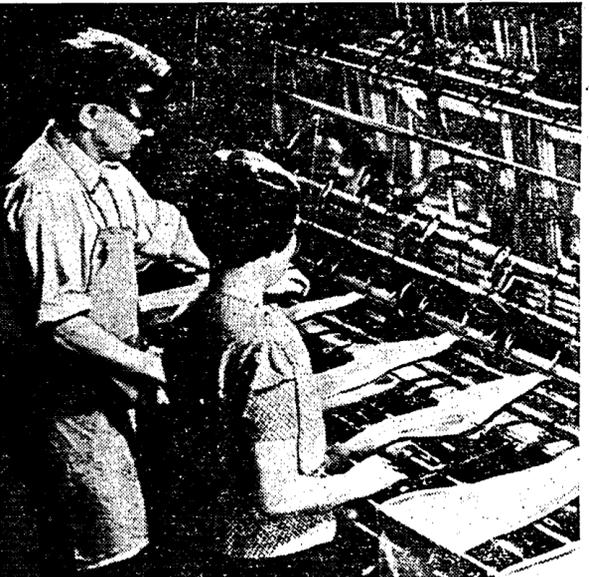

Not a pretty thing itself, the silkworm contributes to the world's beauty by spinning the raw silk for stockings to clothe lovely legs like those of June Claire, above. Below, the Picture Parade marches through a silk stocking factory.

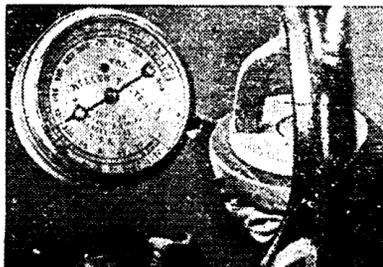

Raw silk, as spun by the worm, arrives in American factories from abroad, braided as are little girls' curls. It is unraveled from the tight, individual bundles and once more becomes lengthy strands.

Long strands of raw silk are woven by machinery into single strands; these, in turn, are wound on bobbins, ready for the weaving machine.

Almost magically, the strands on the bobbins of the machine operated by the man and woman above turn into flat, woven silk. Coming out of the machine, they are the exact size of the finished stocking. The stocking is folded and sewed, heel and toe sewed on separately.

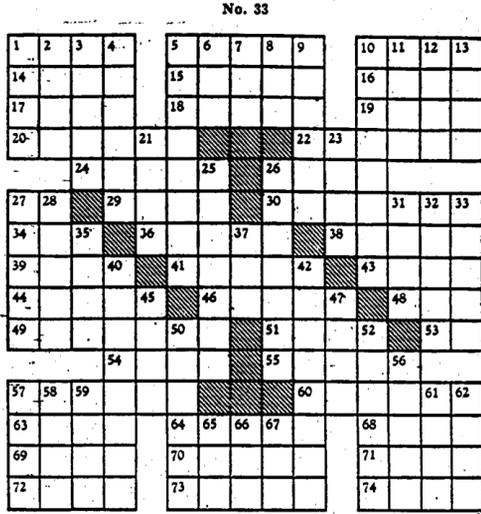

When the stockings in this factory have been dyed, dried and shaped, they are given accurate tests for strength in the machine shown above. Then, before being boxed for the stores—and the legs—they are once more inspected (left).

A queer sight are the metal driers which shape the stockings.

Puzzle No. 32 Solved:

King Cobra Most Feared, Also Most Intelligent

The king cobra, or hamadryad, of Burma, is the largest as well as the most deadly of poisonous snakes. Its average length is twelve feet, and individuals have been known to measure eighteen feet, which is three times the length of the common "hooded horror" cobra of India. The king cobra's intelligence, quick temper, extraordinary agility, and lethal poison makes it the most dreaded of all snakes, asserts Guy Murchie, Jr., in the Chicago Tribune.

The spectacular appearance of the king cobra and its terrifying reputation are enough in certain parts of Burma to cause it to be hunted by big-game hunters much as is the tiger in India and the Lion in Africa. The only difference is, as Adventurer Gordon Sinclair once wrote: "You don't hunt the hamadryad. They hunt you. If you go out to track down a tiger the element of surprise is all yours. You ambush the tiger and smash him down. But you can't put a hamadryad on the spot; the surprise element is all his. He sees you coming and either lies in ambush for you or comes for you like a spluttering skyrocket."

According to one authority, the king cobra is the most intelligent of all snakes. It is one of the very few snakes, for instance, that realizes when in captivity that it must rely on its keeper for food. A slight vibration at the door of a king cobra's cage is enough to bring the snake at full speed to the crack, where it will explore up and down the frame with flipping tongue in anticipation of receiving food. And it will invariably lift its head and anxiously look about at feeding time, even before the keeper has put in his appearance.

"Sino" Combined With Japanese
"Sino" instead of "Chinese" is combined with Japanese because it is more euphonious. It is derived from "Sina," the Greek and Latin name for an Oriental people mentioned by Ptolemy, who lived in the Second century, A. D., and supposed to have been the Chinese. Some writers, however, prefer "Chino" to "Sino" and write "Chino-Japanese" after the analogy of "Russo-Japanese," "Franco-Prussian," etc.

Fire Burns More than 136 Years
The "Wagon and Horses" Inn at Saller's Gate, near Whitby, London, claims a record for keeping a kitchen fire alight. Its fire has burned without intermission for more than 136 years.

Cephenomyia Fly Found Fastest Thing in World

A fuzzy fly, the Cephenomyia, is credited with the speed championship of the world by Dr. Roy Chapman Andrews, director of the American Museum of Natural History, in an article in the museum's magazine, Natural History.

The insect can attain a speed of 818 miles an hour, and travels faster than sound. Sound travels 1,089 feet a second, while the Cephenomyia, says Dr. Andrews, can fly 1,200 feet a second, and therefore can keep ahead of its own buzz. Dr. Andrews admits he has never observed Cephenomyia's flight in a wind tunnel, but says that the estimate of the insect's speed is based on the observations of a scientist who devoted years of study to this fly.

Cephenomyia is a member of the family of bot flies, which lay their eggs under the skin of animals. This particular fly, which is about a half inch long, is found in New Mexico, and lays its eggs under the skin of deer.

"Perhaps we had better not commit ourselves," Dr. Andrews says, "as to whether it is the superior streamline, or the extraordinary wing strength, or merely the knack of knowing how to use their wings that gives some insects their speed. Science has yet to solve this riddle."

Bats Pollinate Bananas

Bats play the role of bees in pollinating certain kinds of bananas, states Dr. L. van der Pijl, biologist of the Netherlands East Indies. Certain species of these flying mammals have very long tongues, equipped to collect pollen for food. They move from flower to flower, and in so doing transfer enough of the pollen surplus to effect fertilization. The banana flowers visited by the bats have an odor quite disagreeable to human nostrils, which is said to be quite like that of the bats themselves, and hence presumably attractive to them.

Historic Reminders in Lima

In Lima, Peruvian capital dating from the early Spanish days of the Fifteenth century, are notable monuments reminiscent of the viceroys, the University of San Marcos, the oldest seat of learning in the Western hemisphere, and the finest examples of Spanish colonial architecture in existence. Adjacent to modern Lima are the ancient shrines of the pre-conquest peoples and the dead city of Coeval, which vies with Babylon in its antiquity.—Rocky Mountain Herald.

Cuddle Toys from "Odds and Ends"

Fun to sew—inexpensive to make—excellent for Christmas gifts is this collection of cuddle toys. Two pieces with just the necessary "trimming" of ears, mane and tails extra. The kiddies love them! Use up those odds

Pattern 5932.

and ends and make your toys as colorful as possible—in short, irresistible. In pattern 5932 you will find a pattern of the three toys; directions for making them; material requirements.

To obtain this pattern, send 15 cents in stamps or coins (coin preferred) to The Sewing Circle, Household Arts Dept., 259 W. Fourteenth St., New York, N. Y.

Favorite Recipe of the Week

Dutch Apple Cake.

- | | |
|--------------------------|------------------------------------|
| 1 cup sifted cake flour | 1/2 cup shortening |
| 1 1/4 tsp. baking powder | 2 lbs. milk |
| 1/2 tsp. salt | 3 cooking apples, pared and sliced |
| 4 lbs. granulated sugar | 1/2 tsp. cinnamon |
| | 1 tbs. butter |

Sift together the flour, baking powder, salt, and 2 tablespoons of the sugar. Cut in shortening. Add egg and milk mixed together. Spread in greased pan about 10 by 6 by 1 1/2. Arrange apples flat side up in rows over mixture. Sprinkle with cinnamon and remaining 2 tablespoons of sugar, mixed. Dot with butter. Bake in moderately hot oven, (400 degrees F.) 25 to 30 minutes.

The use of apples in our menus helps to keep food costs under control now that apples are in season. Baked Sweet Potatoes With Apples

6 medium sized sweet potatoes	1 cup sugar
4 lbs. butter	4 tbs. salt
4 apples, cored and peeled	1/2 cup water

Slice the sweet potatoes and apples and arrange in alternate layers in a buttered baking dish topping each layer with the sugar and butter. Pour the water and salt over the last layer. Bake uncovered in a moderate oven (350 degrees F.) about 40 minutes.

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste
Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-wide distress.
Burning, scanty or too frequent urination may be a warning of some kidney or bladder disturbance.
You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes, and nervous, all played out.
In such cases it is better to rely on a medicine that has won country-wide acclaim than on something less favorably known. Use Doan's Pills. A multi-herb of great people recommended Doan's. Ask your neighbor!

Cause of Static

Static is a natural atmospheric interference. It is caused by stray, natural electrical discharges, traveling through the same medium. It is more prevalent by day than by night and far more troublesome in summer than in winter.

MISS ALINE WEAVER ENGAGED TO WED JOHN H. DAY

Mrs. Leola Weaver of Orlando, Fla., announces the engagement of her daughter, Aline Melville, to Mr. John Henry Day of Canaan, son of Mr. and Mrs. John T. Day of Hillsboro. The wedding will take place in Orlando late in December.

Miss Weaver, the daughter of Mrs. Weaver and the late Mr. A. de P. Weaver of Montgomery, Ala., and Joplin, Mo., has been a resident of Orlando for the past two years and previous to that time made her home in Winter Garden. Since coming to Orlando Miss Weaver has been associated with the Duval Jewelry Company as bookkeeper.

Mr. Day is a graduate of the Keene Normal School in Keene and is a member of Kappa Delta Phi Fraternity. For the past five years he has been a member of the faculty of the Canaan schools.

Following their wedding Mr. Day and his bride will reside in Canaan.

"ONE-EYE" CAR SEEN MENACE ON HIGHWAYS

Seven more deaths from motor vehicle accidents increased the death toll from that source for 1937 to 128 or 43 more than a year ago, it was reported by the state motor vehicle department.

In addition to the five deaths fifty-one persons were injured in recent accidents.

The department again called attention to the dangers of "one-eyed" cars in a safety bulletin which read:

"It is necessary that all vehicles be equipped with headlights and tail-lights in good operating condition. A burned out headlamp bulb should be replaced at once; tail-lights should be examined frequently to make sure that they are burning. The "one-eyed" car is a menace not only to an approaching vehicle but to the operator of such a car and its passengers."

Manila Bay Fine Harbor

Manila bay is the finest harbor in the Far East. Its greatest width is 88 miles. It has a circumference of 120 miles. There are no obstructions to navigation or safe anchorage.

Mrs. Elizabeth Bassett has been awarded a 38-piece set of gold band china for her entry in the recent contest conducted by the makers of an oleomargarine. The local firm of Raleigh & Coolidge will receive a duplicate award for selling a prize-winning contestant.

East Antrim

Edson Tuttle has sold to Herbert Bailey of South Dartmouth, Mass., a piece of real estate near their home where Mr. Bailey plans to build a permanent home, spending summers here and eventually making it an all year residence.

Dewey Elliott has a telephone installed in his home, and electricity will be added as soon as convenient.

Mr. Hefelin has closed his labors at Eva Thompson's.

Robert Mulhall is at Grasmere hospital for observation.

Carl Fish and Carroll White were business visitors in Woburn and Melrose, Mass., last week.

The many friends of Maurice Barnes wish him speedy recovery of health.

Mrs. Edward Knapp is a patient at Margaret Pillsbury hospital, where she underwent a successful operation.

LET DOWN IN BUSINESS

Recent business financial charts have shown a downward trend in trade and commerce. Now the Government surveys state that the national income will probably be less than the estimated \$69,000,000,000 for 1937. Prices and buying power of farm products have declined, says the Department of Agriculture.

The Government admits that there is a "recession" but the official economists think it is "temporary." Whenever the Government slumps it usually lays its shortcomings on the major movements in private industry.

At the present time the national situation shows what the Government calls "hesitant buying" by consumers. Of course this means that stocks will pile up in wholesale and retail places and in factories.

LOOK OUT FOR INFLATION

From official sources in Washington comes the familiar warning that private business will have to take up the slack caused by the proposed "tendency to curtail government credit by deficit financing through banks." That viewpoint comes from the Agricultural Department. In other quarters there is concern over the condition of the currency. A good many observers in the National Capital fear of inflation.

Monday evening at eight o'clock a public reception to Mr. and Mrs. John Burnham will be given in the vestry of the Presbyterian church. Everybody invited.

Tuesday evening the Unity Guild will meet with Mrs. Helen Paige at eight o'clock.

Wednesday at 7.30 the monthly "Workers' Conference" will be held in the vestry.

Baptist
Rev. R. H. Tibbals, Pastor
Sunday, November 28
Church School 9.45 o'clock.
Morning Worship 11. The pastor will preach.
Crusaders at 4 o'clock.
Union Vesper Service at 5 o'clock in this church.
Young People's Fellowship meets with the Hancock Young People's Society in their church at 7 o'clock.

Little Stone Church on the Hill
Antrim Center
Rev. J. W. Logan, Pastor
Sunday School at 9 a.m.
Sunday morning worship at 9.45.

Hillsboro

Curtis-Smith of Manchester was in town on business this past week.

Mr. and Mrs. Ammi Gould visited relatives in Lacouia this past week.

Maurice A. Barnes is seriously ill at his home on Main street with pneumonia.

Miss Myrtle Burt bought a dozen of eggs at Boynton's Market and out of the dozen two of them had three yolks.

About four inches of snow fell in this town on Saturday and Sunday making travelling conditions quite hazardous.

Miss Emma Janowsky of Fairhaven, Mass., spent the week-end with her parents, Mr. and Mrs. Herman Janowsky.

A J. Millward of Bible Hill was retired from his position as railway mail clerk this past week after a period of thirty years in the government service.

Mrs. Bessie Hearty fell on the icy sidewalk Monday morning cutting her head quite badly.

Mrs. B. H. Smith and Mrs. Maude Waterford motored to Center Lovell, Me., on Tuesday.

Mrs. Clarence Davis, who was taken to the hospital last Thursday for an operation, is improving daily.

Tuesday morning was the coldest so far this fall. The thermometer registered 12 degrees above in some parts of the town.

The Hillsboro Black Hawks and Red Devils basketball teams will meet two teams from the Peterboro Boys' Club, at the local gymnasium on Friday night. If you are interested in basketball don't fail to see these games.

Mrs. Kathleen Gilchrist moved from Henniker to Hillsboro and her cat, after being here about a week, walked back to Henniker again to the old home. Hillsboro is all right, but the cat thinks Henniker is the best for him.

FIVE YEARS HENCE

The question that runs through the year, "what more can be done to improve cars," is temporarily answered by the new models. But Charles F. Kettering says that he is still challenged with the question: "What will cars be like in five years from now," and his answer is: "I don't know. If we in General Motors knew we'd be building them now." The news commentators agree that new cars never looked more attractive and perfect to experienced eyes than this year. H. I. Phillips says he is a little "disappointed" because there is hope that some of the designers will ever run out of ideas, and he facetiously remarks that the present questions are: "Can she take any broadcast without trouble, how soon will autos be equipped with television, and has she a throttle to regulate fireside chats?"

State of New Hampshire

To the Honorable Judge of Probate for the County of Hillsborough,

Your petitioners, John B. Jameson and Harry F. Lake, both of Concord, in the County of Merrimack in said State, respectfully represent that at a Court of Probate holden at Nashua in Hillsborough County, on the 1st day of November A.D. 1937, a certain instrument, purporting to be the last will and testament of Mary Butler Jameson late of Antrim in said County of Hillsborough deceased, was offered by John B. Jameson and Harry F. Lake, the executors therein named, for Probate; that the same was proved, approved and allowed, as the last will and testament of said Mary Butler Jameson, in common form and without notice; that no appeal has been prosecuted or claimed; and that your petitioners are the executors of said will of said deceased and interested in said will:

Wherefore they pray that the probate of said will may be re-examined, and the same proved in solemn form before the Court of Probate for said County, and that the former probate thereof be decreed void or affirmed, as to law and justice shall appertain, agreeably to the laws of said State.

Dated the 1st day of November A.D. 1937.

John B. Jameson
Harry F. Lake

Hillsborough, ss Court of Probate

At a Court of Probate holden at Nashua in said County, on the 2nd day of November A.D. 1937, upon examination of the foregoing petition, it is ordered that a hearing be had thereon at a Court of Probate to be holden at Manchester in said County, on the 3rd day of December next, when and where you may appear and show cause, if any you have, why said will should not be approved and allowed; and that the said petitioners give notice to all persons interested therein, by causing said petition, and this order thereon, to be published once each week for three successive weeks in the Antrim Reporter, a newspaper printed at Antrim in said County, the last publication to be at least seven days before said day of hearing.

And said executors are ordered to summon the several subscribing witnesses to said will to appear at said time and place, to testify in relation to the execution, thereof.

And it is further ordered that the said John B. Jameson and Harry F. Lake, executors, give notice to all persons known to them to be interested in said will, by cutting from said newspaper a printed copy of said petition and this order thereon, and mailing by registered letter return receipt, directed to such interested persons, at least fifteen days before said Court.

By order of the Court,
Wilfred J. Boisclair
Register.

Fancy Work For Sale :
Pillow Cases, Luncheon Sets, Fancy Aprons, Buffet Sets, Towels, etc.

Miss Mabelle Eldredge
Grove Street - Phone 9-21
Antrim, N. H.

Bennington

Congregational Church
Rev. J. W. Logan-Pastor
Morning Service at 11 o'clock.

Frank Seaver has purchased the residence of Mr. and Mrs. John M. Burnham, Concord St., Antrim.

Mr. and Mrs. Frank Taylor have been visiting her sister, Mrs. Milan Cooper, in Somerville, Mass.

Bennington schools are closed for the Thanksgiving vacation.

Frank Traxler passed away at his home on Monday after a long illness. He was seventy years of age. Funeral services were held at the home Wednesday afternoon, with Rev. John W. Logan officiating. He is survived by a son, Paul, of Bennington, and a daughter at Peterborough.

Mrs. Isabella Gerrard passed away at the home of her son, Will, Holyoke, Mass., early Sunday morning, where she has resided since the death of her husband in August. She was 82 years of age.

Mrs. Gerrard had lived in Bennington for 55 years and always active in Church and Grange affairs. She was Secretary and Treasurer of the Congregational Church Missionary Society since its organization 52 years ago, and Chaplain of the Grange about 30 years.

Funeral services were held Tuesday afternoon at the Congregational church with Rev. John W. Logan officiating, assisted by Rev. Earl C. Osborne of North Berwick, Me. Mrs. Vera Butterfield sang a selection.

BURNETT PROPERTY IN STODDARD AND WASHINGTON SOLD

What is believed to be the largest single sale of residential and private property made in New Hampshire for more than 10 years was made known this week by the E. A. Bishop Real Estate Agency of Peterboro, which handled the transfer. Involved are 5,308 acres of land in Stoddard and Washington, a log cabin, lodge and farm buildings. The seller is the Robert M. Burnett Estate and the purchaser, Dr. James M. Faulkner of Boston and Brookline, Mass.

The property has been in the Burnett family for several generations. Robert M. Burnett was the son of Joseph M. Burnett of vanilla fame, the family also owning the Deerfield Farms of Southboro, Mass. Robert M. was the brother of the late Edward M. Burnett, at one time the owner of Four Winds Farm in Peterboro at present the summer home of Robert S. Hoffman.

About three-fourths of this vast acreage is in Stoddard and the balance in Washington. It is covered by about 22,500,000 feet of timber, including pine, spruce and hard wood. The section of Stoddard known as Jackson and Hubbard Hills is included, as is also the whole of Pitcher Mountain with the exception of the reservation given by the Burnetts to the state several years ago. Highways extend around all but two or three of the more than 25 miles bounding the property. Numerous bridge paths and brooks are in the acreage as is the entire section surrounding Cold Spring Pond in Stoddard, a sheet of water covering about 20 acres. In all, the purchaser acquired about eight and one-half square miles of territory.

Dr. Faulkner is a prominent Boston doctor and consultant. He is related to the Keene Faulknors, being a cousin of Atty. Philip H. Faulkner of that city who represented him in the transfer. The interest of the Burnetts was represented by Atty. Orville E. Cain, also of Keene. It is understood the property will be used for recreational purposes.

REV. ALLAN I. LORIMER TO PREACH AT DEERING

Rev. Allan I. Lorimer of the Franklin Street church, of Manchester, will be the speaker at the meeting in the Deering Center Community Church at Deering Center of the West Hillsboro Association of Churches, on December 5th, at 7:30 p. m. Mr. Lorimer will bring his choir with him.

The Colosseum in Rome
The Colosseum in Rome was begun by Vespasian, on the site of part of Nero's Gold house, and inaugurated by Titus in A. D. 80. Originally it consisted of three arched stories of stone and an upper gallery of wood. Some time in the Third century this gallery was rebuilt of stone. The Colosseum probably seated between 40,000 and 50,000 persons. It is elliptical in plan, with its long axis 615 feet and its short axis 410 feet. Its arena is 281 feet long and 177 feet wide. The top of the stone screen wall is about 160 feet above ground.

RED CROSS OBSERVES NURSING ANNIVERSARY

1937 Marks 25th Year Of Public Health Nursing In Rural Areas

"Prior to inauguration of the Red Cross Town and Country nursing service in 1912, no national effort was made to bring nursing skill to the rural sickbed." James L. Fieser, vice chairman in charge of domestic operations for the American Red Cross, said today in commenting on the silver anniversary of Red Cross public health nursing.

In a plea for an increased membership during the coming Red Cross annual Roll Call held from November 11 to the 25th, Mr. Fieser pointed out that Red Cross rural nursing rounds out 25 years of continuous service this year. "It is essential activities such as this which the American people support through membership," he said.

In 1910 Lillian Wald, then head resident of the Henry Street Settlement in New York City, proposed that the American Red Cross pioneer in the field of rural nursing. Public health nurses were active in urban districts but a similar provision had been made to guard the health of the rural dweller. Miss Wald felt that the Red Cross was best qualified for the undertaking through its long experience in converting humanitarian ideals into practical accomplishment.

Two years later the first Red Cross rural nurse set forth upon her rounds in a county in Massachusetts. Jacob Schitz, member of the Red Cross Board of Incorporators, and Mrs. Whitelaw Reid each contributed funds to start the project. Special courses of training for nurses resulted in young women who thoroughly knew the mechanics of this new job.

By 1918 there were 100 rural nursing services conducted by Red Cross chapters; and 18 months later the number of services had skyrocketed to 2,000, as the signing of the Armistice released a flood of War nurses for peace-time duty.

"Reorganization and consolidation eventually cut the number of public health nurses serving under the Red Cross flag," Mr. Fieser stated. "But as a group their efficiency increased."

Mr. Fieser called attention to a study of Red Cross public health nursing accomplishments since the service was begun. "Statistics show that in all nearly 3,000 services were established by the Red Cross," he said. "During the past 15 years 6,800 public health nurses were assigned to chapters, and a total of 18,000,000 visits were made to or in behalf of patients."

"Each year during the past 11, more than 440,000 rural school children have been found to have physical defects. Each year 189,000 of these children were helped through treatment."

At the present time there are 686 Red Cross public health nurses engaged in health work in rural communities, and last year more than 1,000,000 visits were made on behalf of the sick.

"It has been our purpose from the first," Mr. Fieser emphasized, "to demonstrate that rural nursing was needed and could be organized. In many instances we have turned established community nursing services over to local health authorities. When this was done, we turned our effort toward opening up additional virgin territory."

Other Red Cross services supported by Roll Call memberships are life saving; first aid; disaster relief and the work of organized Red Cross volunteers.

Many Red Cross chapters carry on extensive civilian relief work. During the past year 120,000 needy families received this type of Red Cross help.

Hillsboro

Maurice A. Parker, Jr., returned to school this week after recovering from the measles.

Mr. and Mrs. Harrison Hare of Worcester, Mass., were recent guests at the home of Merrick Crosby.

Fred Hill, local lineman for the Contoocook Valley Telephone Co., is confined to his home by illness. Frank Fowle is substituting for him.

Mr. and Mrs. Ralph G. Smith spent the week-end as the guests of their daughter, Mrs. Thomas Fearnside, and family at White Plains, N. Y.

Reginald Murdough, driver for J. L. Ellsworth, sustained a broken wrist when he fell from the side of a truck on which he was standing while drawing a tarpaulin cover over his load.

Mrs. Esther Colby, West Henicker school teacher and a resident of this town, is restricted to her home as the result of an automobile accident in which she received an injury to her shoulder.

Miss Mildred Peasley, daughter of Mr. and Mrs. Frank Peasley, and student at Plymouth Normal school, has been elected a member of the governing board at the school. She held a similar office last year.

Deering

Mrs. Robert Johnson was in Goffstown on Monday.

The roads were sanded on Sunday, following the snow storm.

Harold Taylor is employed at carpentering at Hillsboro Center

Miss Almada Holmes was called to Boston on Monday by the sudden death of her half-sister.

Mrs. G. Edward Willgeroth spent several days recently with her parents, Mr. and Mrs. John Preston, at East Jaffrey.

Mrs. Edith K. Foster of the Pond district has left for Boston, en route for Detroit, where she will visit her daughter, Mrs. Gregory Even.

The Women's Guild of the Deering church will hold its annual Christmas celebration Tuesday evening, December 21, for the children of the town.

The Deering Red Cross chapter is conducting its annual drive for memberships in town. Mrs. J. D. Hart, president of the chapter, is in charge of the campaign, and is assisted by Miss Lillian Fisher.

Mrs. Edgar J. Liberty and daughter Ann Marie of Wilton visited her parents, Mr. and Mrs. Harold G. Wells, at Pinehurst farm one afternoon last week. Miss Edith Gerini accompanied them to Hillsboro, where she visited relatives and friends.

C. P. McNally, tax collector, reports that taxes are coming in more slowly than usual. Up to the end of last week only a small percentage of the amount assessed had been paid. But it is expected that this week will show a decided acceleration in payments.

A lumber camp is now located on the main road from Hillsboro to Deering Center. It is near the Frog Pond, on land adjoining the Dutton farm. A stand of pine is being cut. At the Long House, home of Dr. D. A. Poling, large quantities of cord wood, cut last season, is being carted away. It is reported that other cutting operations will be undertaken soon near the Center.

Wolf Hill grange, No. 41, held its regular meeting in grange hall, Monday evening, November 22. Chester M. Durrell, master, presided at the business meeting. The following officers were elected for the ensuing year: Master, Mrs. Hilda M. Grund; lecturer, Leroy H. Locke; secretary, Mrs. Marie H. Wells; overseer, Mrs.

REPORTERETTES

A woman sometimes treasures the memories of her past heart-breaking romances, as a reformed old gayboy treasures the memories of his worst headaches.

There is such an eternal glamour about a wedding ring, that even the woman who pawns hers to pay her husband's fine for wife-beating sheds a tender tear over it!

Jimmy Roosevelt has been stationed by the New Deal at Washington as a sort of coordinator. But the administration doesn't need a coordinator now so much as an escalator.

When the United States Conference of Mayors was held in Washington recently the question of relief was foremost. Haven't these mayors learned yet that the New Deal has cured the depression.

The reason residential building is lagging is that people are not buying houses fast enough, and the reason people are not buying houses fast enough is that they are too expensive. The reason they are too expensive is that it costs too much to build them. The President in devising a building boom program might take these acts into consideration.

Halibut Liver Oil

Halibut liver oil changes greatly in vitamin value with the different seasons of the year, a chemist reports.

Louise L. Locke, steward, Miss Almada Holmes, assistant steward, C. Harold Tewksbury, chaplain, Mrs. Maria Osborne, treasurer, Miss Marie Johnson, gatekeeper, George Ellsworth, Ceres, Miss Fern Grund, Pomona, Mrs. Mary J. Willard, Flora, Mrs. Lillian Durrell, lady assistant steward, Mrs. Ethel Tewksbury, member of executive committee for three years, Chester M. Durrell. Mrs. Louise L. Locke, lecturer, had the names read of all the patrons who had assisted on the literary programs during the year. The highest scores were Mrs. Locke, 247; Mrs. Esther Colby of Hillsboro, 208; and Mrs. Marie H. Wells, 150. Mrs. Locke presented two beautiful prizes to Mrs. Colby and Mrs. Wells and thanked everyone who had helped make her programs interesting during the past year.

The Curse of Progress

Poser

"You've been out with worse-looking fellows than I am, haven't you?" She did not reply.

"I said, you've been out with worse-looking fellows than I am, haven't you?"

"I heard you the first time. I was trying to think."—Cornell Widow.

A Hard Night

"I shall put you fellows in this room," said the host. "You'll have a comfortable night I'm sure because the room has a feather bed."

At 2 o'clock in the morning one of the guests awoke his companion.

"Change places with me, Dick," he groaned. "It's my turn to lie on the feather."

An Intellectual Benefit

"Do you think it worth while to send your boy Josh to college?"

"Yes," replied Farmer Corntosel. "Even if he doesn't learn much he'll get amongst people who can prove to him there are a few things he doesn't know."

RESPITE

AROUND THE HOUSE

In Making Vegetable Salads.—To prevent vegetable salads from becoming too watery, dry the vegetables before combining with the salad dressing.

Washing Voile.—Voile frocks will not shrink if you use a tablespoonful of epsom salts to every gallon of water when washing them.

Wipe Up Acid Foods.—Since some enamels lose their luster when they come in contact with acid, always be careful to wipe up, immediately, any vinegar, lemon juice, tomato, or other acid food that is spilled on the enamel of your range.

Ten-Minute Sweet.—Line a buttered pie dish with breadcrumbs. Into a pint of milk whisk 2 eggs, 4 tablespoonfuls of sugar and a dash of vanilla essence. Pour over the crumbs and bake for 10 minutes.

To Wash Velour Curtains.—Did you know that curtains and table covers of heavy velvet-finished furnishing velour can be washed? The trick is never to wring them—just douse them in warm soapy water, then in clear water and hang out dripping wet to dry.

Savory Salmon Dish.—Turn out a small tin of salmon, remove skin and bones and flake the fish. Season with pepper and salt. Mix 2 cupfuls of breadcrumbs with 2 ounces of flour, stir in 2 well-beaten eggs and the salmon. Mix well, then form into the shape of a fresh salmon steak. Fry in a little hot fat until brown, turning carefully so that both sides are cooked. Serve garnished with sliced lemon or tomatoes.

Improving Flavor of Bacon.—When boiling bacon or any kind of salted meat, the flavor will be improved if six cloves, a dessert-spoonful of lemon juice, a tablespoonful of brown sugar, a sprig of mint, and a grating of nutmeg are added to the water.

When Washing Blankets: Never leave any soap in blankets as this will turn them yellow. Allow half a cupful of vinegar to each gallon of final rinsing water; this will clear all soap from them.

IT'S GREAT TO BE BACK AT WORK

when you've found a way to ease the pains of

RHEUMATISM

and do it the inexpensive way, too.

You can pay as high as you want for remedies claimed to relieve the pain of Rheumatism, Neuritis, Sciatica, etc. But the medicine so many doctors generally approve—the one used by thousands of families daily—is Bayer Aspirin—15¢ a dozen tablets—about 1¢ apiece.

Simply take 2 Bayer Aspirin tablets with a half glass of water. Repeat, if necessary, according to directions.

Usually this will ease such pain in a remarkably short time.

For quick relief from such pain which exhausts you and keeps you awake at night—ask for genuine Bayer Aspirin.

CHAPTER I

"This room might be a man's office, stripped like this," said Anne Vincent from the flat desk where she was ostentatiously busy with a pile of bills and a check-book.

"But think how feminine it is with rugs and the curtains and the cretonne covers and the china dingbats on the mantelshelf," said Rachel; adding, as she stuffed two more packages into the boxed window-seat, "Do you think I've used enough mothballs? Remember how the mice made nests in here last winter!"

"Both women had spoken louder than was necessary and there was the tension of a topic avoided in their voices. The living room of the cottage was bare except for the furniture, even the bookshelves had been emptied and the pictures taken down.

Anne twisted about to look at Rachel's packing. "You put in the whole two boxes? That'll surely be enough. It was Mrs. Kreef's fault—the mice, I mean."

"Poisonous woman!" said Rachel and banged down the lid of the window seat. "Every time I see her and that squabby sister of hers walk by I want to rush out and beat them with my tennis racket!" Her work finished, she rose and stretched her tall young slender-

"It Must Have Been Tragic."

ness, pulled her white sweater down and adjusted her belt. She watched Anne from the corners of her eyes. At last she went over to the desk and sat on the edge of it. "Aren't you almost done?"

"There are ever so many more." "Are you checking every item?" "Yes, of course. Why don't you take a last swim? Where's Bob? I thought he asked you to go out in his boat?"

Rachel swung her feet obstinately. "You're stalling, mother. You want to get away without telling me a thing. It's no use. Bob's gone out alone and I'm not having a swim. You can just come out of that mess of eggs and potatoes and cords of wood and talk."

"Rachel, I've always told you that when you were twenty-one, if you wanted to hear—or before, if there was good reason—"

"There's plenty good reason. You're going abroad and Great-aunt Helene may hang on to you for ages!"

"If I stay more than six months you can join me: You know that."

"Don't evade. It's only another year till I'm twenty-one and I'm just as mature and sensible now as I will be then. The way you act I'm beginning to feel as if there was something perfectly rotten—"

Anne Vincent's protesting hand stopped her. "Darling, no! Don't say such things. There's nothing rotten or foul or poisonous or any other of your favorite bad adjectives about it—really. Give you my word."

"Then why do you want to hold out on me?"

"Maybe I'm a little jealous."

"Mother, darling lamb, don't be ridiculous. Jealous of what?"

Anne's grasp tightened. "I'm afraid I'm jealous of your interest in your real mother, Rachel. I'd like you not to think of her."

"But I don't think of her as my mother. I don't. She's never thought of me as her child, that's evident enough. She was glad to get rid of me. Wasn't she?"

"I can't answer yes or no; it's not as simple as that." Anne considered the sea a moment longer, wondering, doubting, uncertain. If she could only understand Rachel's urgency! Then she resolved. "I see I'll have to explain things, I don't want you to be getting strange notions. Let's go down to the beach; it's so dreary here with everything packed."

They linked arms as they stepped

off the terrace before the low shingle house which had been their home for ten summers. It was the last but one of the straggling village street, there was only the roadway between it and the dunes. The single house beyond theirs was an ugly square high-elbowed thing with stiff shell-bordered walks, and a gypsy kettle, on a tripod painted a flaming red and filled with clashing magenta geraniums, beside the front door. As Anne and Rachel crossed the road this front door opened swiftly and a little anxious man hailed them.

"You be out some time, Mis' Vincent?"

"I don't know exactly, Mr. Kreef," said Anne, "but you can go in and turn on the radio."

"Thank you, ma'am. There's a program offerin' a nice book of photographs and a tube of cold cream I aim to get and if there's any new contests I want to try 'em." He explained breathlessly and was inside their house with the last word.

"Couldn't we leave the house open and the electricity on so he can have the radio after we're gone? It's so mean of Mrs. Kreef to lock theirs up except when she wants to hear something herself, I'd like to get round her somehow."

"I suppose we could. He has such fun writing for samples and entering all the contests, it's pathetic."

"Do let's do it, mother."

"All right, my dear, the electricity won't cost much. And if the weather's very cold he can build a fire. I'll give him written permission."

They had reached the beach, a half-circle of sand scooped in between points of rock which went far enough out on each side to break the sweep and drag of the waves. The Vincents' bathing house lay so unobtrusively back among the dunes that this little scallop shell of quiet and peace seemed never to have known man's trespass, yet it had been a favorite haven of rum runners during the latter half of the great prohibition farce. Now those days were over and the village and summer people found the larger beach below the town more convenient for bathing, so this one had come to be Rachel and Anne Vincent's exclusive property, their outdoor living room and extension of summer days.

They sat down facing the sea, their backs against the length of pale water-washed Norwegian fir which once held the mainsail of a skimming saucy clipper. Anne, uneasy, disturbed, made a most uncharacteristic fuss in settling herself, while Rachel watched her with growing impatience.

"It can't be as dreadful as you're making out," said Rachel at last, half laughing, but with nervous excitement beneath.

Anne pulled her wits together. "It's not dreadful at all, I simply don't know where to start."

"Tell me her name. I don't even know her name. I've always rather hoped it was Rachel, like mine."

"Oh, Rachel, darling, have you been thinking about her so much! Why didn't you tell me? I—" she caught back her emotion, took an easier tone: "Rachel, your mother's name was Elinor, Elinor Malloy. She was only about eighteen when you were born, she wasn't through high school when she was married. And your father's name was Edwin Malloy. They were just a couple of youngsters who ran off and got married without knowing one another, without thinking about it—"

"A sort of joke, I suppose."

"Don't be bitter. They were so young, they had no idea they didn't realize—but I'll have to go back and begin properly. I never saw your father, but your mother was one of the loveliest, no, she was absolutely the loveliest creature I ever laid my eyes on. She didn't seem quite real, she was so lovely."

"Was she light or dark?"

"Very fair skin, very dark hair, very blue eyes. Everything in her appearance was accented and distinct and yet there was a complete fusion so that her beauty stood clear and perfect. She's only—let's see—she's only thirty-eight years old, Rachel, now, nine years younger than I. And she's still beautiful, but in a different way."

"How do you know? I thought you said you'd only seen her once, years ago."

"Her pictures come out in the newspapers now and then, the society columns—"

"They do! Oh, mother, who is she? Have I seen her pictures?"

"She's Mrs. Peter Holbrook Cayne."

"She's married someone else?"

"Rachel, darling, I want to get through this as quickly as I can and afterward I'll answer your questions. You must try to understand about her. Your grandfather—her father—died and left your grandmother with very little money and this child to take care of and life was very hard—and meager—for both of them. Uncertain, too, insecure. Mrs. Rhodes—"

"But who's Mrs. Rhodes?"

"Your grandmother, Elinor's mother. Did I forget to say her name? I'm mixing this up dreadfully."

"No, no, I've got it straight. My mother was Elinor Rhodes and she married Edwin Malloy."

"Yes, that's right. Mrs. Rhodes did fine sewing and embroidery for her friends to help along, monograms on table linen and that sort of thing, it didn't amount to much and she must have been very anxious about Elinor. There seems to have been no one who took any interest, or perhaps she was proud—and shy. She kept her daughter with her and sent her to school. And one day Elinor came in with Edwin Malloy—he was a young clerk in the corner drugstore—and she had married him. Now remember, Rachel, I'm simply telling you the story I heard. I never met Mrs. Rhodes. Even so, I can understand what a shock this marriage was for her. If she'd had the means she probably would have had it annulled, because Elinor had lied about her age. But she could do nothing, so she took them into their cramped apartment to live with her. And from the first they weren't happy, nothing went right. Your father was apparently just a good-natured, good-looking boy with almost no education and no family, he made very little money, he wasn't ambitious, he wasn't clever. Mrs. Rhodes detested him and kept lamenting the marriage all the time, and there was Elinor herself with her beauty and her youth and her pliable unformed nature—you can see them, can't you?"

"Yes. It must have been tragic. For all of them."

"Tragic and pitiful. You must remember this of your mother, Rachel; she was very young and had married where she had no chance of being happy, not even ordinarily contented—"

"Mother, you're apologizing for her!"

"I'm not apologizing, but I want you to understand her. I'll go on. They were married in June, 1915, and they stuck it out through the summer. Then Elinor discovered that you were coming and she was so frightened and her mother so angry that your father—you see, he was young too and not the sort to face anything hard and difficult, so—he ran away."

"Deserted her! But that was foul!"

"I think it was the best thing he could have done, he wasn't her kind, there was no way to work it out and—well, anyway he went. Like a good many other unsettled young men he went over to France—this was before America went into the war, remember—but he found a place as orderly in one of the hospitals and in January he came down with pneumonia. Edwin Malloy died in France and you weren't yet born. So there was poor little scared Elinor and her mother struggling along with hardly any money, anxious and not very well, not knowing what in the world they'd do with a child to bring up—it was desperate for them all."

"I can see why I wasn't welcome."

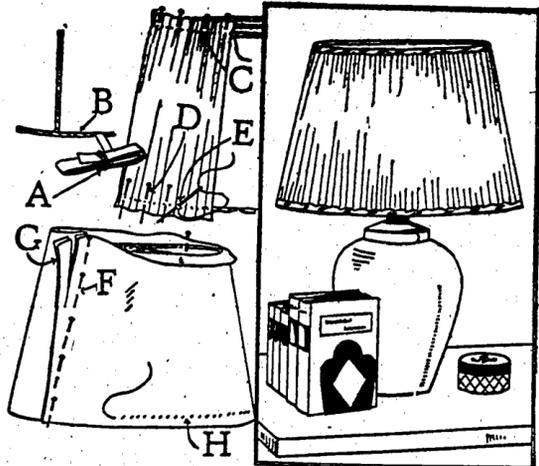

Anne disregarded this. "And when at last—no, I must put in a little here about Harry and me. I had gone to the hospital a few weeks before Elinor did, of course I knew nothing about her then, I'd never even heard of her. My baby died as soon as it was born, Rachel, and one of my nurses inadvertently let me know that I could never have another. So I—I was very ill, I don't think I'd have tried to get well except for Harry, he was so wonderful to me, he put aside all he was feeling and just took care of me. When Elinor was brought in I didn't see her, she was put into a ward and I was in a private room, but we both had Dr. Ayres; he'd known Mrs. Rhodes in her prosperous days and she had gone to him and begged him to take care of Elinor and poured out her troubles, so then, do you see, with my disappointment and grief for my baby and this lovely healthy child—you—

who—who—"

HOW TO SEW

by Ruth Wyeth Spears

Silk Shades Give a Soft Glow

THERE is subtlety in the light that glows through a silk shade, and many decorators are using them for the room that needs the softness of plaited folds and the mellowness obtained by placing two tones of fabric one over the other.

Two tones of China silk, one to be used for a plain lining and the other for a gathered outside covering will make an attractive shade. Before you buy the material it is best to experiment with samples one over the other trying them both in daylight and over an artificial light. You will also need a roll of silk binding tape matching the top color of the shade. This tape is to wrap the wire frame. And fancy braid either in gold, silver or a harmonizing tone of silk is used to bind the top and bottom of the shade. Use cotton thread to match the outside tone of the silk.

Slip the binding tape off the roll and wrap a rubber band around it as shown here at A. Working from the inside end of the tape wrap the frame as shown at B. The outside layer of silk is put on next. This is gathered both top and bottom and pinned to the wire covering as at C and D so that it is stretched quite tight. Joinings in the outside covering need not be sewed but may be hidden under the folds. This material is sewed in place as at E.

Next, cut a straight strip for the lining and fit it around the outside of the frame as shown here at F. Trim the joining allowing a seam as shown at G. Sew to the frame at the bottom as at H. Trim quite close at the bottom. Turn lining to inside as at I. Slip stitch the joining. Turn in raw edges at top and whip around top of frame. Pin the binding around and then sew it with stitches buried in the mesh of the braid.

Every Homemaker should have a copy of Mrs. Spears' new book, SEWING. Forty-eight pages of step-by-step directions for making slipcovers and dressing tables; restoring and upholstering chairs, couches; making curtains for every type of room and purpose. Making lampshades, rugs, ottomans and other useful articles for the home. Readers wishing a copy should send name and address, enclosing 25 cents, to Mrs. Spears, 210 South Desplains St., Chicago, Illinois.

Find American Flag With 38 Stars; Old Banner Is Presented to a History Class

An American flag which proudly boasted a Union of 38 states, was recently discovered by Boy Scouts in an abandoned building on the bluffs above the Merrimack river, near Fern Glenn, states a writer in the St. Louis Globe-Democrat.

When the 38-starred flag was our national emblem Colorado had just been admitted to the Union, and North and South Dakota, Montana, Washington, Idaho, Wyoming, Utah, Oklahoma, New Mexico and Arizona, were still territories, not yet admitted to the right to statehood. That was in 1876, about 100 years after the birth of the Union had been accomplished through the Declaration of Independence. The flag, however, may have been anywhere from 48 to 61 years old, for the thirty-ninth star came into the

Union with North Dakota, in 1889.

The property upon which the old flag was found was once owned by Captain Schaaf, who died at an advanced age several years ago. He was a noted shot and was associated with the police department as a coach in its target practice. The buildings have long since fallen into disuse and ruin. The discovery was made while the Scouts were using one of them as temporary headquarters for a day of patrol activity.

The union of the flag is in perfect condition. The stripes, however, have been tattered and worn at the ends. Troop 332 has offered to place the flag in the custody of the history class of Maplewood high school, to become the property of the high school unless the rightful owner is found.

WISE

The wise and pleasant way to relieve a cough due to a cold is a Smith Brothers Cough Drop. (Two kinds: Black or Menthol—5¢.)

Smith Bros. Cough Drops are the only drops containing VITAMIN A

This is the vitamin that raises the resistance of the mucous membranes of the nose and throat to cold and cough infections.

Cheap Sales Cost
United States census figures for 1929 show that at a cost of but 1.54 per cent advertising created a market for the \$70,434,863.443 worth of manufactured products of that year.

Putting Failure to Use
Every failure should be a step to success; every detection of what is false should direct us toward what is true; and every trial should exhaust some form of error.—Whewell.

Are Women Better Shoppers than Men?

GRANTING a woman's reputation for wise buying, let's trace the methods by which she has earned it. Where does she find out about the advantages and details of electrical refrigeration? What tells her how to keep the whole household clean—rugs, floors, bathroom tiling—and have energy left over for golf and parties? How does she learn about new and delicious entrees and desserts that surprise and delight her family? Where does she discover those subtleties of dress and make-up that a man appreciates but never understands?

Why, she reads the advertisements. She is a consistent, thoughtful reader of advertisements, because she has found that she can believe them—and profit thereby. Overlooking the advertisements would be depriving herself of data continuously useful in her job of Purchasing Agent to the Family.

For that matter, watch a wise man buy a car or a suit or an insurance policy. Not a bad shopper himself! He reads advertisements, too!

MORE ADVERTISING TO SELL MORE CARS

The automobile New Year is resplendent with beautiful colored cars that indicate the collapse of all-blacks. Once upon a time a manufacturer said: "I don't care what color you paint your cars just so long as they are black." The optimists who look forward to 1938 figure that with strikes and labor troubles out of the way that there will be continuous stability in employment and production. Everything, so far as possible has been stabilized in America's number one industry. So the mark is set for five million new cars for the coming year. One of the factors depended upon to reach that goal is more advertising in the newspapers. Buick, for instance, announced at the New York show, that it would "reach its peak" in lineage during the coming months. The 1938 advertisements will stress the

increased value in automotive transportation," says the company in its observations about "straws in the wind that prove rather conclusively that business is and has been able to take care of itself and that the American business man is making fighting comebacks from depression lows and will hold the ground he has won and push onward." Brave words that will likely be proved, and the estimate of 250,000 new Buicks seems sure to be realized inasmuch as its cars have literally "stolen the show" with engineering and style improvements. Kings, queens, presidents, duchesses, and the average family have favored this car in past years and helped raise its position from a bare scratch in the beginning to distinctive leadership in the entire field.

Jenny Lind's Grave
Jenny Lind, the Swedish nightingale, is buried in Malvern, England.

Force of Buoyancy
A solid immersed in a liquid is buoyed up by a force equal to the weight of the liquid displaced. The velocity with which the submerged body will rise to the surface will depend on the relation between the weight of the solid and that of the liquid. Buoyancy is simply the upward pressure exerted by the liquid.

Where Sapphires Are Produced
Sapphires are gems of essentially the same mineral as the ruby. They differ chiefly in color, the sapphire varying from pale blue to deep indigo. On exposure to high temperatures the sapphire loses its color but does not regain its luster upon cooling as does the ruby. Principal sapphire deposits are found in Ceylon, Siam, Madagascar and Australia. They have been found in small quantities in the United States.—Pathfinder Magazine.

The SNAPSHOT GUILD

MIRROR PICTURES

HAVE you ever taken mirror pictures; that is, for example, a picture of sister or the "girl friend" standing in front of a mirror perhaps "dolling up" a bit or maybe just admiring herself?

It is the unusual that attracts attention but it is necessary to use your eyes and a little imagination and ingenuity to ferret out the exceptional and get pictures that show individuality.

When making mirror pictures and focusing for reflected images only, it is necessary to add the distance from the mirror to the subject, to the distance from the mirror to the lens of the camera and then set the focus accordingly.

If it is desired to include the subject in the picture with the reflected image the focus should be set for the distance from the mirror to the lens. The smaller the lens opening the greater the depth of field and the sharper will be both images. Of course, the nearer the subject is to the mirror the less is required in the matter of "depth".

Let us suppose that sister Mary is two feet and the camera six feet from the mirror. If you want to include sister, as well as her reflected image, in the picture, set the focus at six feet. If you want only the reflected image in the picture, you set the focus at eight feet. A photoflash lamp simplifies your exposure problem and permits a small enough lens opening to gain a sufficient range of sharpness.

After locating your subject in the finder and setting the focus of your camera at the proper distance, set the shutter for "time" place a photoflash bulb in an ordinary floor lamp within reaching distance from the camera, tilting the shade slightly upward and toward the subject. If you cannot tilt the shade, remove it from the lamp. It is best not to have any bright lights burning near the lens of the camera. Set your lens opening according to the table on the photoflash lamp container. Take your position at the camera, press the cable release to open your shutter and immediately turn on the

photoflash and then quickly close the shutter—and the picture has been taken. Simple, isn't it? For this

A section for unusual pictures will brighten the pages of any album.

type of picture a No. 10 photoflash bulb will furnish enough light.

In amateur photography, experimenting becomes the spice of life and you will be surprised at the interesting effects you will get in working out "stunt" pictures on gloomy, rainy days when outdoor activities are taboo. Results, in some instances, may be rather grotesque but you will have a lot of inexpensive amusement and pictures that show individuality. Anyone can take the ordinary run of pictures but it requires a little ingenuity to get the unusual. That is what you should "shoot" for, and the resulting pictures will be far more interesting than ordinary record pictures and breathe life itself into your photograph album.

John Van Guldef

First Kindergarten Was in Blankenburg, Germany

That idea of schooling as simply the fostering of the best natural growth was in the mind of Frederick Froebel when he opened the first kindergarten in the little town of Blankenburg, Germany, in 1837, and found a name for his educational idea, says a writer in the New York Times. From a hilltop where he could see the village houses, each with its tiny garden plot, he made his famous declaration: "Eureka! I have it! Kindergarten it shall be!"

Froebel's first school was at Keilhau, established in 1816. The working plan of that school and his educational theory he put into print in 1826 in the "Education of Man." The "Means of Education" used there and printed in "Education of Man" would be an acceptable course of study in a modern country day school.

Froebel's experience in this school and his observations of mothers with their children in the home life about him led to his conviction that education was a continuous process, and to be effective should begin in early childhood. For twenty years he thought and worked over his plans for obtaining a more abundant life for children.

He had made his appeal to parents for a better understanding of child nature in the following terms: "O men, as you stroll through garden or meadow or field or copse, why not use your sense to perceive what nature would teach you? Behold the sun! When grown under pressure you scarcely guess its natural life and purpose, but in open ground it becomes a sun of green rays, a star of leaves. Your children, too, O parents, have it in them to become creatures fully developed to beauty."

Ghost of William Tell Walks in a Swiss Town

The ghost of William Tell walks in Altdorf, a town of approximately 4,200 inhabitants near the southern end of Lake Lucerne, in Switzerland, notes a correspondent in the Detroit Free Press. It is surrounded by lofty, snow-capped mountains. On the slope behind the town the Bannwald (banned forest), mentioned in Schiller's play, serves as a protection against avalanches.

Altdorf is famous as the place in which the great marksman, having incurred the ire of the tyrannical Austrian bailiff Gessler, was commanded to demonstrate his skill by shooting an apple from the head of his young son. In the open square a colossal bronze statue of Tell commemorates his intrepid deed.

Questioned about a second arrow in his quiver, Tell is said to have remarked that it was intended for the bailiff's heart had the first arrow harmed his son. He was promptly seized and was to have been taken by boat across Lake Lucerne to a prison in Kussnacht. Tell escaped on the way.

The Game of Bowling

The game of bowling came to this country from Holland, according to a writer in the Washington Post, where it has been popular for many centuries. The Dutch inhabitants of New York (then New Amsterdam) played it on a special square near the southern end of Manhattan. They called the square Bowling Green and the name has stuck for 300 years. Originally an outdoor game, bowling was greatly handicapped by the weather, but the first indoor greens, built in New York in 1840, eliminated this trouble. These were floored with baked clay, later with slate blocks. Finally wood came into use and the word "greens" was dropped and "alleys" substituted. The game is played in many foreign lands, but enjoys by far its greatest popularity in the United States.

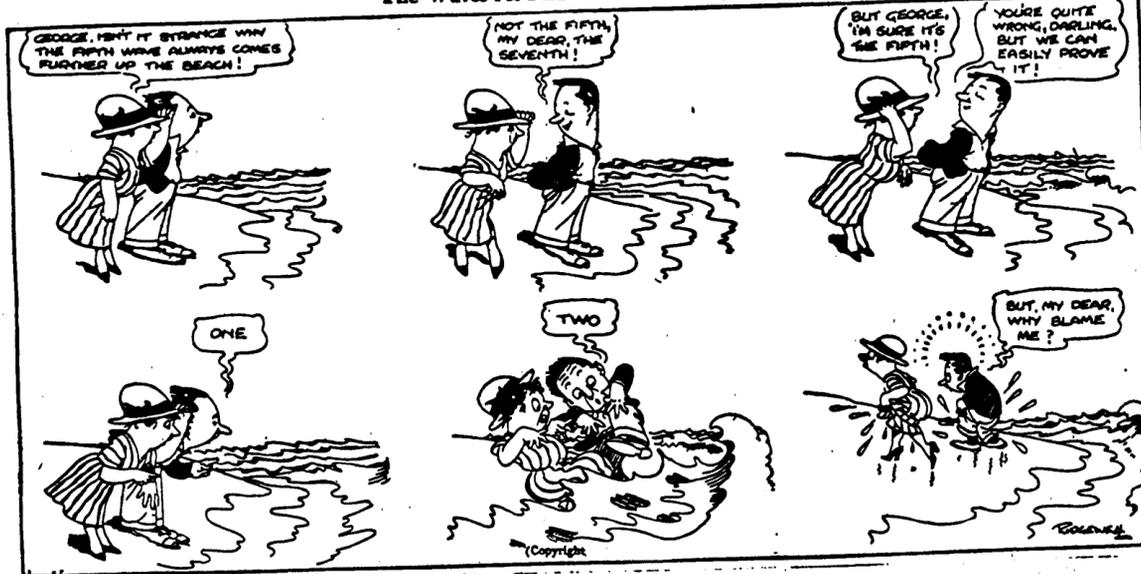

700,000 Words by Signs

The human arm, which includes forearm, wrist and fingers, can produce about 700,000 distinct signs, according to scientists. Sign language is, therefore, far richer and more expressive than human speech. Further, states a writer in Pearson's Weekly, it is very simple and it has no language barrier to overcome. Experts consider that it is the best possible foundation for building up a real universal language, particularly because signs have been a natural means of communication since prehistoric times.

Return Lightning Explained

Return lightning is described as a quite small electrical discharge that takes place here and there from objects on the earth's surface directly with lightning flashes. This discharge is quite insignificant to the main flash, but is powerful enough to cause explosions, to start fires and even take life.—Rocky Mountain Herald.
