MR. WALTER E. BUTCHER LOOKS ON INTERESTEDLY AS MR. BUTCHER PREPARES TO DEMONSTRATE THE NEW FOUNTAIN RECENTLY INSTALLED AT THE MAIN STREET SODA SHOP.

Seventeen years ago, on Feb. 15, 1922, Mr. and Mrs. Walter E. Butcher had faith in the business future of Antrim and opened the Main Street Soda Shop. They purchased their present location in January, 1921, from Samuel S. Sawyer and O. Frank Downes, formerly local agents for Chamberlain & Bunham of Boston. Mr. and Mrs. Butcher purchased the house at the corner of Summer and Main streets, but later sold it to the Contocook Valley Telephone Co., and made over the upstairs of the store building into a comfortable apartment.

Mr. and Mrs. Butcher's faith in Antrim of 17 years ago still continues. In fact, it is stronger than ever and is evidenced by their installation last month of a brand new all-electric soda fountain, which is the last word in this sort of equipment.

It is manufactured by the Liquid Carbonic Corporation of America, with main offices in Chicago. Believing that our readers will be interested in information regarding the new fountain, The Reporter

asked Mr. Butcher several questions and the following is the result:

The fountain has an 8-foot white porcelain front; the work board is stainless steel; top, bottom and sides of Tennessee marble; ice cream capacity 30 gallons; one cooler compartment for bottled tonics, cream, milk, etc.; eight syrup pumps; four crushed fruit bowls; running water dipper well which keeps ice cream scoop clean at all times; all soda and water super filtered; two sinks, one for hot water and one for cold water, with swinging faucets. There is also in connection with the fountain a new Kelvinator electric cabinet for storing 40 gallons of ice cream; a new Liquid Carbonic Carbonator which pumps 20 gallons of soda water an hour.

For 13 years Mr. Butcher has handled Hood's ice cream, carrying six flavors at all times in addition to Hoodies, Popsicles, and brick ice cream. Only the best of syrups and fruits are used at the fountain and the Main Street Soda Shop prides itself on the large size glass

used for milk shakes and sodas. "We think it is the largest glass of soda or milk shake sold for miles around at the regular price" says Mr. Butcher.

In addition to his soda fountain business Mr. Butcher also carries a general line of merchandise including confectionery, patent medicines, toilet articles, sporting goods, Lowe Bros. paints, oils and varnishes, and over 1,500 items.

Mr. Butcher has been a consistent advertiser in The Antrim Reporter every year and his volume of business year after year has amply justified the confidence he places in the Antrim newspaper as a result getter.

It is interesting to note that the Main Street Soda Shop has the only neon sign in town. New awnings were put up this Spring and a new two-car garage built. Since purchasing the building Mr. and Mrs. Butcher have remodelled the two store fronts. The First National Store is now on its third lease, having nearly completed 15 years as a tenant.

ANTRIM COMMUNITY CALENDAR FOR MONTH OF JULY

- Thursday, 7th.
No. Branch Ladies Home Circle 2 p.m.
Baptist Church Vestry, weekly prayer meeting 7.30 p.m.
Presbyterian Church Vestry, weekly prayer meeting 7.30 p.m.
Soft Ball 7.00p.m.
Rod and Gun Club vs Geenville
Friday, 8th.
Cong'l church monthly supper 6 p.m.
Saturday, 9th.
I.O.O.F. Lodge Meeting, 8 p.m.
Sunday, 10th.
Congregational Church—Morning Worship 9.45; Church School 10.30
Presbyterian church—Church School 10; Union Service 11 and at 7
Baptist Church—No Church School (Pastor on vacation)
Monday, 11th.
Wm. M. Myers Unit No. 50 meets at members homes, 8 p.m.
Rod and Gun Club Soft Ball Team vs Bennington at 7 p.m.
Tuesday, 12th.
Selectmen meet 7 to 8 p.m.
Wednesday, 13th.
Thursday, 14th

REPORTERETTES

When a woman cooks, sews, scrubs and nurses for money, that's labor. When she does it for nothing, that's love!

A New York court has ruled that a woman may weep as long and as loudly as she wishes. Ain't the law wonderful?

A financial review says that business has slipped into the doldrums. This latter term may be a polite way of naming the hot place.

GRANT—ADAMS

The wedding of Miss Marion L. Adams and Mr. Raymond F. Grant, at Hancock, Saturday, July 2, was attended by many friends and relatives from Antrim. The ceremony was held in the Congregational Church and the pastor, Rev. Lloyd S. Yeagle, performed the double ring service.

The church was beautifully decorated a back ground of hemlock, red roses and Easter lilies, with the initials of the two families outlined in white flowers. The sides of the pulpit platform were decorated with baskets of tall Delphiniums.

Before the bridal party entered, Miss Elinor Upton, of Hancock, sang, "O, Promise Me". She was accompanied by Mrs. Maurice S. Tuttle, of Hancock, who played the wedding march from "Lohengrin" as the bridal party entered. The bride was given in marriage by her father, Mr. Ernest Adams. The bride wore a white lace gown with long pointed sleeves and short train. She also wore a cap of orange blossoms, with a long train of tulle and carried white roses and sweet peas. She was attended by Mrs. Everett Adams, of Hancock, as matron of honor, who wore peach crepe and carried Talieman roses. The two bridesmaids were the grooms sisters, Mrs. Nelson Cook, who wore aqua crepe and carried pink sweet peas and Mrs. Robert Hammond, who wore yellow crepe and carried sweet peas. The flower girls were three year old Shiella and Shirley Adams, twin nieces of the bride, who wore pale pink dresses. Harold P. Grant, of New York City, served as best man, and Linwood Grant, of Antrim, and Everett Adams, of Hancock, were ushers.

Following the ceremony, a reception was held in the vestry. Refreshments were served and the bride cut the many tiered wedding cake. Upon their return from a short wedding trip, the newly wedded couple take an apartment in the Barrett Block in Antrim.

Mrs. Grant is secretary to H. W. Johnson, superintendent of the Goodell Company, and Mr. Grant is foreman of the Apple Parer Department of the same company.

HILLSBORO RED DEVILS WIN ANTRIM GAME

The Hillsboro Red Devils won their ninth straight victory by defeating the Antrim Town team on Monday afternoon at Antrim by the score of 11 to 8. Lefty Schoolboy Colby started on the mound for the Red Devils and pitched the first seven innings allowing nine scattered hits after which he weakened and Pug Matthews, the fast working right hander, went in and finished the game.

Cutter, shortstop for Antrim, parked the ball in the woods for a home run in the seventh with two men on for the feature hit of the game.

The summary:
Stolen bases, J. Stafford, G. Stafford, E. Matthews, J. Cuddihy, Bartlett; two base hits, J. Stafford; home run, Cutter; sacrifice hits, Gerini, H. Clark; left on bases, Hillsboro 7, Antrim 8; hits off Colby, 9 in 7 innings, Matthews none in 2 innings, R. Cuddihy 9; base on balls, Colby 4, Cuddihy 3; struck out, by Colby 5, by Matthews 1, by Cuddihy 9; hit by pitched ball, by Cuddihy (Bosse); passed ball, Bartlett 5; wild pitch, by Colby 2, by Cuddihy 3. Time, 2 hrs. 30 minutes. Umpires, Edwards and Reece.

REHEARSAL DATES FOR SESQUICENTENNIAL PAGEANT

Rehearsals are now under way for the Sesquicentennial pageant to be given at the First Presbyterian Church, Sunday, July 31. The pageant is in commemoration of the founding of the church on August 3, 1788. Miss Ethel Muzzy is in charge of the pageant and has prepared a fine historical sketch, using data from the town history and a few scenes from the pageant given in 1927. This will be an important milestone in the history of the church, and of the town, and is worthy of the best efforts of all who are co-operating to make it a success.

Rehearsal for the various groups in the pageant will be held as follows; Monday, "The Spirit of the Church" and "Meeting House Hill". Tuesday, "The Deacon Aiken Group" and "Dr. and Mrs. Whiton". Wednesday, "The Ordination of Dr. Cochrane", "The Town Meeting Group" and "The Laying of the Corner Stone". Meet at 7.15 sharp at the Presbyterian Church.

You can hardly choose your lot in life, but try to make it comfortable.

Weekly Letter by George Proctor Fish and Game Conservation Officer

Did anyone in this section, Dublin, Peterboro or East Jaffrey lose a female German Shepherd dog about two years ago? We have a letter from a man in a distant state stating that he knows the whereabouts of such a dog and he knows the dog was stolen from this section. If you lost such a dog get in touch with me at once. We know where the dog is now being confined.

In the past week we have had five different parties want to buy a second hand canoe. What have you got? Second hand boats are also in great demand. Something to be used for pout fishing.

We have at least four more boats lost that we are trying to check up on. Please let us know if a strange boat appears on your favorite pond or lake. It may be one that I am looking for.

Had something funny happen to me a few weeks ago. I had a tip that a certain man had a boat in his barn that belonged to someone else. I went up to see his dog which was said to be running at large and saw the boat. I asked him where he got it and he told me a good story. Before I left I told him that I thought the boat was owned by the man that lost it. The next morning the boat was back six miles on a pond from which it disappeared the year before and everyone was happy.

In some lines business is picking up. For instance, over \$500 more has been taken in by the Public

Service Commission for the licensing of motor boats and outboards. The Commission made a drive late last summer and found hundreds of motors not licensed. When it on-site costs three big iron men to license an outboard and the fine is \$100 for not doing so, it pays to license.

The Fish and Game department have a man at Concord that is watching the licenses very closely. For example, if a stub comes in from an agent he takes the checklist covering that town and if the name is not on the voting list he gets in touch with the town clerk and if the town clerk does not know he gets in touch with the local warden and he checks. If the party is an alien he is brought before the Judge for making a false oath. The fine is \$50 and cannot be suspended by the court. A few cases where the party goes to another town and "forgets" to bring the poll tax bill. Several of these cases I have had in the past month and my instructions were to notify the party to pay said poll tax within 24 hours or go to court. They all settled with the tax collector and brought the bill to me. No, you can not fool them now.

Speaking of dog shows, there is always a dog show on at the Field Head Kennels at Milford. Mrs. Spear has on hand right now 26 Cocker Spaniel puppies 6 weeks old and that's not counting her Kennel of adult dogs. All colors and no matter how fussy you are she can supply you.

To keep down the meat bill we know of quite a few families that have been living on woodchuck meat the past few weeks. They all agree it's good. This fellow only eats the best of everything and why should he not be good.

Here is a letter from George E. Marshall of Nashua, an expert on snakes. He says that snakes never milk a cow, the reason being that they cannot drink more than two teaspoons full of liquid at a time. He also says that he has examined the stomachs of snakes many times and never found any evidence of birds in them. They do

WAGES FOR REAL WORK

President, Opposing Outright Dole, Still Looking for Solution of Unemployment Problem

Speediest ship in our navy, the destroyer McCall, was commissioned at the Mare Island navy yard in California. The McCall, first privately built navy vessel since 1921, has a specified speed of 39 1/2 knots, but in recent tests was reported to have averaged 42 knots. It carries four 5-inch guns and four quadruple torpedo tubes and is especially fitted for quick attacks on capital ships.

Spending Is a Stop-Gap

DECLARING the New Deal's objective is to give wages for real work and that he is opposed to the outright dole for bare existence, President Roosevelt said in a press conference that he is still looking for a permanent solution of the unemployment problem. He made it clear that he did not believe relief or public works afforded anything more than a stop-gap remedy for a little understood dislocation of the nation's economic and industrial life. In fact, he said, no country in the world had as yet worked out a method for dealing with the most acute unemployment situation in the history of the world.

President Roosevelt

He noted that public works expenditures had worked better in Sweden than in this country, because the Swedish government had been able in recent prosperous years to put on heavy taxes and pay off its borrowings. He said the Swedish method was being given close study. The President warned that the prosperity which vast outlays for rearmament appeared to have brought to European nations was unsound. When the munitions plants close down, he predicted, the nations of Europe will find themselves weaker in an economic sense than ever before. No nation, he argued, could spend its way back to prosperity by laying out vast sums in unproductive goods like weapons of war.

Aubrey Williams Scolded

AUBREY WILLIAMS, deputy WPA administrator, aroused the indignation of many citizens, especially of opponents of the administration, when he advised organized relief enrollees at a meeting in New York to keep the Roosevelt administration in power and to elect 100 per cent Roosevelt Democrats to office. He even incurred a mild rebuke from the senate committee created to investigate senatorial campaign fund expenditures and the use of public money to influence voters.

Aubrey Williams

Farmers Oust a Union

FIVE hundred angry farmers invaded the Richland Co-operative creamery at Richland Center, Wis., to which they sell their milk, and drove out seven employees of a teamsters' union. They then forced the remaining employees to sign statements that they would not join a labor organization, and established a picket line to keep out union members and organizers. The demonstration was the climax of five months' resistance by the co-operative's directors, mem-

bers and patrons against the organization of the plant by the American Federation of Labor teamsters' union. At the insistence of the national labor relations board, the creamery had just agreed to accept the union as a bargaining agent and not to oppose recognition further. N. S. Clark, Milwaukee regional director of the labor board, had agreed to withdraw charges of unfair labor practices against the company. Clark said later that all offers toward a compromise with the creamery had been withdrawn. The farmers who took part in the demonstration had outlawed themselves, he said, and declared he would ask the Washington office of the labor board to prosecute them.

Indiana G.O.P. Picks Willis

RAYMOND E. WILLIS of Angola, Ind., a newspaper publisher and veteran political leader, was nominated for the senate by the state Republican convention in Indianapolis. Willis was named on the third ballot, defeating four rivals among whom was James E. Watson, former senator. The nominee, who is sixty-two years old, has been the active editor and publisher of his weekly paper, the Angola Republican, since its establishment in 1898. He is president of the Steuben Publishing company, and, with another editor at its head, publishes the Angola Herald, a Democratic organ.

Fish Attacks Hamilton

HEATED discussion over immediate control of campaign funds among members of the Republican national executive committee, meeting in Washington, gave Rep. Hamilton Fish of New York an opportunity to renew his fight on National Chairman John Hamilton, whose removal he demanded.

Rep. Fish

With Hamilton out of power, Fish said, the Republicans would win 10 senate seats and 100 house seats. With Hamilton at the helm, he warned, Republican gains would be reduced by half.

Rep. Joe Martin of Massachusetts and Sen. John Townsend of Delaware, chairmen, respectively, of the house and senate G. O. P. campaign committees, have demanded allotment of funds from the national committee and exclusive control of their expenditure. Hamilton has resisted these demands.

Representative Bertrand Snell of New York, Republican leader in the house, told the committee that he intended to retire from public life and would not seek re-election this fall.

Italy Checks Franco

VIRGINIO GAYDA, noted editor and spokesman for the Fascist regime in Italy, declared that Italy had advised Franco, leader of the Spanish insurgents, to use "moderation" in his efforts to prevent British and other foreign ships from bringing supplies to government Spain. Gayda said, however, that Italy approved the bombing of vessels carrying contraband, but disclaimed any Italian responsibility therefor.

Representations by the earl of Perth, British ambassador to Rome, had opened the way to an agreement to end the bombings. Mussolini was reported as ready to act only to spare Prime Minister Chamberlain from embarrassment.

London dispatches said Great Britain, France, Italy and Germany had agreed to split the cost of withdrawing foreign troops from Spain. Russia refused to pay a full share of the expense, estimated at 10 million dollars.

Signs of Compromise

THERE are distinct indications of compromise and co-operation in the American picture, and hopes for restored prosperity are somewhat revived. The stock market has become unusually active, and private enterprise is awakening. Unfreezing of three billions in stored-up credit is expected to result from new banking regulations ordered by the President. Thousands of contracts for approved projects to cost almost \$500,000,000 have been sent to all parts of the country by the Public Works administration.

Mr. Roosevelt, in his latest radio address to the nation, said: "In simple frankness and in simple honesty, I need all the help I can get," and it seems that the people are ready to give that help if the administration will do its part.

Notable in the President's talk was the admission that mistakes have been made not only by his opponents and by industry and labor, but also by government leaders. He sharply attacked reactionaries in business, blaming them for much of the current depression.

Asserting his continued belief in individual enterprise and the profit motive, he criticized the recent congress for failing to enact his program for government reorganization and legislation to aid the financially depressed railroad industry. At the same time, however, he said the legislators "achieved more for the future good of the country than any congress between the end of the World war and the spring of 1933."

Wants Liberals Elected

MOST of the President's radio speech was frankly political. He declared himself the leader of the liberals and held that, as such, it was his privilege to intervene in state primary and election campaigns for the purpose of insuring the defeat of those whom he characterized as conservatives, the opponents of his policies.

This aroused the indignation of many Democratic statesmen like Senators Burke of Nebraska and King of Utah.

Senator King asserted the President should not use the great advantage he has in controlling the purse strings of the huge spending program. "People who have fought for the Democratic party for a great many years do not like interference in their state affairs by outsiders," he said. "I do not believe the President should meddle in the primary elections of the Democratic party or any other party."

General opinion was that Mr. Roosevelt had widened the split in the Democratic party and by his words had placed the stamp of his approval on the attempted "purge" directed by Corcoran, Cohen and others of his advisers.

For Naval Expansion

IMPETUS was given the naval expansion program with PWA allotments of \$27,883,000 for the enlargement, extension and remodeling of existing plants and facilities of the navy department.

With orders for full speed ahead the navy department said that 113 projects, approved by Mr. Roosevelt, will be under way by August 15. Among the projects are power plant improvements, foundry building, high frequency radio station, fleet moorings, turret assembly facilities, improvements to ship building ways, structural assembly, electric and sheet metal shops, water storage, railroad tracks, noncommissioned officers' quarters, storage buildings and other improvements.

Mustn't Seize Hainan

THE British and French envoys in Tokyo warned Japan that any occupation of Hainan, Chinese island off the south coast of China, would be met by joint Franco-British action. The island, which lies near French and British trade routes, was bombed by Japanese flyers. Germany is recalling the Germans who have been acting as advisers to the Chinese army, and diplomats believe Germany may now give active aid to Japan.

Swedes Celebrate

AMERICANS of Swedish descent by the thousand and many from Sweden gathered at Wilmington, Del., for the celebration of the 300th anniversary of the landing in America of the first Swedes and Finns. From the old country came Crown Prince Gustaf Adolf with a large party, but he was confined to his suite on the liner Kungsholm by illness. His place was taken by his son, Prince Bertil.

Prince Bertil

The principal event of the opening ceremony was the presentation of a monument erected by Sweden on the landing site. The presentation was made by Prince Bertil and accepted by President Roosevelt. Then the President presented the monument to Gov. Richard McMullen for the state of Delaware.

After the monument ceremony there was a lawn party attended by Crown Princess Louise.

The celebration was continued for four days in Delaware, New Jersey and Pennsylvania, parts of which states were embraced in the New Sweden founded in 1638 by a company of 150 Swedes and Finns sent to America by Gustafus Adolphus

Washington Digest

National Topics Interpreted By WILLIAM BRUCKART

Great Wealth On Grill

WASHINGTON.—It is entirely possible that many people have failed to place together several developments of national import lately, and may have missed the significance of an action of congress in its closing days. The two incidents to which I refer are the federal grand jury indictment at South Bend, Ind., of a number of automobile manufacturing executives and the action of congress in adoption of a resolution providing for a broad-gauge inquiry into big business. The two, when pieced together, spell a sensational drive against the "malefactors of great wealth."

There was a period in 1936, it will be recalled, when business interests felt that President Roosevelt was preparing to follow a middle-of-the-road policy as far as government relations with business was concerned. During that period, there was a considerable improvement in general business. In that interim of time, as far as any observers could reach a conclusion, the President was relying on advice from many men in whom business had confidence. But there came a sudden end. Out of the clear sky, Mr. Roosevelt proposed reorganization of the Supreme court of the United States and the addition of six justices whom he could appoint at once. Through weeks of battle when it became apparent that one guess was as good as another whether the President would win, business men and women again became afraid. That was when the present depression began. It was also the time when Mr. Roosevelt turned away from his previous close advisers and began listening to the new brain trust which has come to be known as the "board of strategy."

As the depression became sharper and the numbers of unemployed increased with startling rapidity, the board of strategy sought means to offset the condition. The group also had to find a goat—which is always done when plans go awry. There followed then the vicious and intemperate attacks on "big business" by the trust-busting Robert H. Jackson, then favored at the White House as the next Democratic candidate for the New York governorship. Secretary Ickes also let loose his vocabulary and none can deny the interior secretary's capacity for speaking biting words. For weeks and weeks, we were treated to a barrage of words in which "big business" was pictured as beyond the pale of good citizenry and ought to be destroyed.

The trust-busting drive was not as successful in gaining public acclaim as had been hoped for. The truth is that it failed to get the country excited at all and the profit to the trust busters did not materialize as had been the case when "Teddy" Roosevelt was swinging a big stick of demagoguery in the same field of political endeavor. Indeed, this drive flopped at the start whereas the drive by the earlier Roosevelt was good politics for several years.

It was here, according to the best information available, that the tactics changed. The change in methods is the real reason for the story. Thus, it can be said that the trust-busting drive is still going on as strong as ever but it is going on in several fields without any apparent connection because the board of strategy has lost none of its determination to convince the nation that it is being ruined by those same malefactors of great wealth toward which Teddy Roosevelt waved his fist and bared his teeth.

Now, to put the pieces of the picture together. The first section comprises the indictment of the automobile moguls, Edsel Ford, Walter P. Chrysler, Alfred P. Sloan and William Knudsen, among some sixty-odd officials of Ford, Chrysler and General Motors and the companies affiliated with them in the financing of motor cars bought on the installment plan. They are charged with violation of the antitrust laws, although how anybody can believe the Ford interests ever could or would play ball with the other two, I have been unable to see. Anyway, big news-stories were carried by the press services from South Bend, and the department of justice here had much "background" information which officials were delighted to hand to any inquiring reporter. They did this in order to co-operate with the press inasmuch as the story was so sensational and so vast in scope that none of us writers here could possibly be permitted to miss any phase of it.

The other phase of the continuing drive against "big business" takes the form of a great inquiry, thinly disguised as a general study of business practices. It is a somewhat

unusual type of investigation and is to be managed in a very unusual manner. The committee that will do the job is made up of three senators and three representatives, and a representative from each of a number of executive departments and commissions. And the important fact in addition is that the \$500,000 which the investigation will cost will be expended under the direction of President Roosevelt.

To bring it own to simple terms, when congress adopted the resolution for the inquiry, the board of strategy was able to turn on enough political steam to force adoption of an amendment placing the funds under the direction of the President, rather than under control of congress, as usually is done when congress participates in an investigation. That action means that investigators for the committee will be able to rely upon laws covering inquiries and searches made by the department of justice, the federal trade commission, the securities and exchange commission and the national labor relations board, among others. The combined powers will be all-comprehensive.

To explain further the full meaning of these broad powers, it is necessary to cite constitutional provisions prohibiting illegal search and seizure. The investigators for the committee must be able to dig deep into private records of any bank or corporation or individual if they are to accomplish fully the desire of the board of strategy for complete exposure of all the secrets of business. When they get all of those records, of course they can analyze them and place their own construction on the business practices. That is today, by inference and innuendo, hint or open charge, the investigator can smear anything or anybody—and the newspapers will spread the information. It being an official investigation, it will be followed closely by the press and, as usual, there will be little chance for the individuals to reply. When they are marked to be smeared, they will be smeared, whether justly or unjustly. It is a deplorable thing that our government stoops to that sort of thing but it has done so in a number of instances.

Now, as to the main objectives. Every indication is that the guiding hands in the projected investigation are determined to destroy two great masses of capital. I mean; they intend to break up the combination of men and money in two instances. The banking house of J. P. Morgan and company, and the huge industrial setup of the DuPonts are marked. Whether they like it or not, those two groups are to be made the goats of the depression of 1937-38, and those on the inside recognize that it is a fight to the finish. There will be other corporations, other individuals, whose business lives will be laid bare, but the Morgans and the DuPonts are the real targets. The board of strategy believes the Morgan bank and the DuPont interests are chiefly responsible for the refusal of business to yield on many of the crackpot ideas of the professors, and so it is inevitable that those two groups will be cast as the villains.

There arises, next, the question whether such an investigation and such a prosecution as has been started at South Bend will do the country any good. One ought not to prejudge. It may be that the motor magnates and their corporations are guilty as pups. It may be that the Morgans and the DuPonts and scores of others among families with great fortunes have set about to wreck the New Deal. But the question in my mind is: why has it not been discovered before? It seems to me that if there was so much corruption, so much improper influence being exercised and such illegal use of money power as is represented by those who were pushing the investigation, it should have been several years ago. Mr. Roosevelt has been in office five years and it appears strange that there was no effort to uncover these demons until the business of the country as a whole lost confidence in the policies of the national administration. These developments have come along as the depression grew worse. They reach their climax of preparation at a time when another federal agency, the board of governors of the federal reserve system, says that the industrial depression in the United States now is the worst in the world. Neither England nor any other industrial country abroad has experienced a depression that has been as precipitous as the United States is experiencing, the board said in an official statement.

The power is not given to me to determine the numerous and varied facts, but the processes of deduction eliminate many possible causes for our nation's condition—most of them, indeed, excepting government meddling and the harassing of business, big and little.

How the Picture Looks

Now, to put the pieces of the picture together. The first section comprises the indictment of the automobile moguls, Edsel Ford, Walter P. Chrysler, Alfred P. Sloan and William Knudsen, among some sixty-odd officials of Ford, Chrysler and General Motors and the companies affiliated with them in the financing of motor cars bought on the installment plan. They are charged with violation of the antitrust laws, although how anybody can believe the Ford interests ever could or would play ball with the other two, I have been unable to see. Anyway, big news-stories were carried by the press services from South Bend, and the department of justice here had much "background" information which officials were delighted to hand to any inquiring reporter. They did this in order to co-operate with the press inasmuch as the story was so sensational and so vast in scope that none of us writers here could possibly be permitted to miss any phase of it.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—When Charles Maurras came out of the Sante prison last year, he was met by a committee of distinguished Frenchmen, who nominated him for the Nobel peace prize and said they would make him a member of the Academy. They have just fulfilled the latter promise, and M. Maurras becomes an immortal by a majority of one vote.

He had spent 250 days in jail on a charge of having urged the assassination of 140 members of the chamber of deputies who had voted for sanctions against Italy; also on a charge of inciting the French people to "sharpen up their kitchen knives" for use against certain proscribed politicians.

In the 250 days he had written five books, swelling his vast collection of books on biography, politics, economics, literary criticism, history and what not to probably well over 100. I talked to him once in the Cafe des Lilas, a fragile, deaf, bearded old man with a contented, blurring mind which makes one think of a sizzling battery running an automobile without any engine.

In 1923, he was in jail for four months in a somewhat anti-climatic adventure for one

who was to be garded as an immortal. Three members of the chamber of deputies were kidnapped and fed castor oil—Mussolini is said to have got his broad prospectus of Fascism from Maurras—and the bald head of one of them was painted with violet ink and glue.

In 1925, M. Maurras was sentenced to two years in prison, the charge being that he had threatened to kill the minister of the interior—"Among the causes of his incarceration in October, 1936, was conspiracy evidence in the assault on Premier Leon Blum, in which he was severely beaten, while attending the funeral of a friend."

His books and virulent editorials against democracy in the Royalist, paper, translated into many languages, are the fount of Fascist doctrine all over the world. His hatred of democracy is savage and vitriolic. He is witty, learned, brilliant and he has the most excoriating and corrosive vocabulary in France.

A FOOTNOTE to the main text of the world discussion on Japan bombing babies is the interchange between Avery Brundage, chairman of the American Olympic committee, and William J. Bingham (Bill the Plugger), Harvard athletic director. Mr. Brundage says it has nothing to do with sports, and Mr. Bingham says it has—with sportsmanship, at any rate—and he withdraws from the committee and the 1940 games.

The sports writers are becoming almost metaphysical in weighing and appraising the moral values of the argument: Bill the Plugger says, in effect, that he won't play with baby-killers.

He became Bill the Plugger by losing 19 races at Harvard and winning the twentieth. Thereafter, he was Harvard's crack miler.

He started out plugging at the age of fourteen, leaving school to work in a mill and help support his five younger brothers and sisters. He saved \$30, went to Exeter and worked his way through Exeter and Harvard.

He came out of the war a captain with appropriate decorations, did a turn in the banking business in Texas and became Harvard graduate supervisor and track coach in 1921. On the side, he is president of a concern which imports rubber goods.

IF GERARD B. LAMBERT builds a house, they're likely to find a center-board and a skys' yard on it. It's hard to see how he can get his mind off his yachting, but, at any rate, he becomes special adviser to Stuart McDonald, federal housing administrator.

The gargles and shaves of the multitudes built his chemical fortune at St. Louis. He was one of the original backers of Lindbergh and the originators of great advertising slogans.

Author of a spirited "Defense of Babbitts" in the American Mercury, commander of the Eastern Yacht club of Marblehead, Mass., he maintains a valhalla for gallant old yachts.

Women Get First Vote

In their first vote women of Uruguay recently helped choose a new parliament of 99 delegates and 20 senators.

To Ride the River With

COPYRIGHT WILLIAM MACLEOD RAINE—WNU SERVICE

CHAPTER VIII—Continued

"In this Western country men respect a decent woman," Ruth urged desperately, already aware of the futility of such an appeal to him.

"I'm not curly Connor," Norris replied, with a hateful smile. "What I want I take. You're going with me, understand. Maybe, if you're good, I'll make you Mrs. Morgan Norris." The smile went off his face as the light goes from a blown candle. His gaze swept the room. "Where's the other wench gone?" he demanded harshly.

Nelly had slipped out of the room a minute earlier, as inconspicuously as a shadow. Evenly her mistress said, "I expect she has gone to the smoke-house for a slab of bacon."

"You'll have to take some heavier clothes, both of you," Norris mentioned, accepting the explanation without question. "Go to yore room and pick them. I'll drift along with you."

She shivered. "I'll have my father give you anything you like if you'll go now with your friend. I'll see he does not pursue you."

"That fellow can't give me anything," he cried, with a furious oath. "I'll do the giving when we meet—a bullet through the heart. . . . Get up and shove along to yore room for the clothes—unless you want to go as you are."

He dragged Ruth to her feet and pushed the girl in front of him from the room.

Kansas backed out of the house and bowlegged his way to the stable. He took the same ropes he had used for the other horses and went to the corral. No expert, it took him several minutes to catch two ponies. His churning thoughts were full of hatred as he threw, missed, and gathered the rope again. He despised himself for taking this lying-down.

Hate o' Norris seethed in him. He made up his mind, as soon as he was out of this jam, to cut loose from the Tail Holt bunch and go back to Texas.

Kansas led the roped horses back to the stable and saddled. His gaze swept the road along which Chiswick's men must approach the ranch. If it came to a showdown he could jump a bronc and light out, leaving Norris to play his hand alone.

He heard a sound of something moving at the hitchrack on the other side of the stable. It might be a horse stirring—or it might not. Stealthily he moved through the stable to the door and looked out. His revolver was in the open, ready for action.

What he saw surprised him. The girl Nelly was pulling the slipknot that tied one of the animals to the rack. Kansas moved toward her. "Where you going?" he demanded.

Nelly gave a little cry of fear, staring at him, her fingers flying to her open mouth.

"I—I—please let me go, Mister," she wailed.

To Kansas came a thought. He was a stupid man, and his mind usually worked slowly. But his safety was at stake. He had to look after himself or this crazy fool Norris would lead him into trouble from which there was no escape.

His furtive glance swept to the house. No sign of Morg, who was probably busy inside with getting the food ready.

Kansas stepped closer. Instinctively he lowered his voice, though he knew nobody could hear him.

"Girl, I'll let you go," he said. "Fork that bronc and light out. Keep going till you reach Chiswick and his posse. Tell Lee Kansas helped you get away. Tell him I'll be with his daughter and Norris watching over her all the time. Tell him I'm against this thing every way from the ace, but Morg is bent on having his way. His idea now is to hole up in the old Walsh cabin back of Crowfoot. Don't forget the name, girl. It is Kansas. I'll be doing all I can every minute for Miss Chiswick. Don't forget that too."

"I won't forget," she promised breathlessly.

"All right. Light a shuck and go like the heel flies were pestering you." He added: "I'll have to make a play at shooting at you."

Nelly pulled herself to the saddle and was off, gathering the horse to a gallop in a few jumps. Kansas fired in the air twice. He ran toward the house shouting at the man inside it.

Norris ran out to the porch, gun in hand.

"She's gone!" Kansas screamed. "Jumped one of the horses while I was coming back from the corral. I took a crack at her and missed."

The killer looked at the horse and rider diminishing in the distance. "Suits me fine," he said. "I didn't much want her along anyhow. But we'll have to get going my pronto. Finish saddling and bring the horses to the house. We'll pack the grub on there."

He went back into the house and into the bedroom where he had left

Ruth a few moments before. The man moved noiselessly. He was of the tiger-cat breed. All his motions were smooth and rhythmic, as if he trod on padded feet.

Curtly, he snapped at her, "You got what clothes you'll need?"

"Yes."

"Enough to keep you warm nights if we're on the dodge outside. That's all you can take."

Again she pleaded with him. "I don't know what-all you've done, but if you'll only let us go I'll see you get off. It would be madness for you to take me. Don't you see that?"

"No more of that," he said harshly. "We're on our way."

He took her back to the porch. Kansas was bringing up three saddled horses.

Ruth looked round. She had to fight down her terror to keep from getting panicky.

"Where is Nelly?" she asked.

"She isn't going on our picnic," Norris said.

"But—you said—"

Ruth broke off, her eyes filled with fear. She swallowed, then tried again. "You haven't—you didn't—"

She was thinking of the two shots she had heard.

"The young lady lit out while we weren't looking," Kansas explained. He was busy packing the horses.

"While you weren't looking," Norris jeered. "Stand aside. I'll do that packing. You don't even know

Hour after hour they wound deeper into the hills.

how to tie a rope. Where you belong is back in Kansas at the plow-handles you left."

Kansas said sulkily, "I didn't leave any plow-handles."

Kansas led the way and Norris brought up the rear.

The riders circled the pasture and took the hill trail back of it. The outlaws pushed the horses, anxious to get out of sight before they were seen by any Chiswick riders. As they topped each rise, all three of them turned in the saddle and swept the valley below with their eyes. Presently the folds of the hills enclosed them.

As Jeff Gray rode from one land wave to another, heading north by east, he had a conviction that he was losing a lot of time. If Norris and his companion were making for the L C ranch-house—and he had no doubt of this, since they had to find another horse—they would get there long before he did. He was letting himself get tangled up in the hill country. Eventually he would get his bearings, but every minute was of importance.

He swung due east, along a rock ledge that barred the way. His judgment was that he had been working too far north. Now he was going due east.

From the ledge a voice came, one with an Irish brogue, upon which was superimposed the drawl of the cattle country. "Stop right where you're at, me lad, and throw up your hands."

Startled, Gray pulled up. His heart turned a somersault, but he looked up with an expressionless face.

"First off, drop that gun," the voice ordered.

The man whose face peered over the ledge was Pat Sorley. A wave of relief swept over the rider. He was not going to be shot down.

"Lucky I met you, Pat," he said coolly. "I'm lost. Get yore horse and take me to the ranch."

"You've got a gall, young fellow," Pat told him. "I said to drop that rifle."

"I reckon to use it soon if I get a break," Gray said, ignoring the command. "Listen, Pat. War has broke loose. Chiswick has just had a fight with a Tall Holt crowd who came to dry-gulch some Mexican smugglers. Morg Norris and another

fellow are heading for the ranch to get another horse. Nobody is at the house except Miss Ruth and Nelly. Don't talk. Get busy. We've got to ride there hell-for-leather."

"Are you lying to me, you scout?" demanded Sorley.

"No. I came from town to warn Chiswick and was with him during the fight. We caught them in Live Oak canyon after they had ambushed the Mexicans."

Sorley had heard how Gray had saved young Chiswick. Swiftly he made up his mind.

"All right. I'll be with ye in a jiffy. Don't run off again while I'm getting my pony."

He joined the other a minute or two later. They rode knee to knee, traveling as fast as they could without injuring their mounts.

They dropped down from the broken hill-country toward the valley. Below them they could see a huddle of buildings at the L C home ranch-house. The windmill flashed signals as the blades of the wheel caught the sun rays. At that distance it was too far to make out any signs of life, but the peacefulness of the scene was reassuring.

The ranch-houses disappeared, cut off by a hilltop as the riders continued their descent.

"Likely those devils aren't heading this way at all," Sorley said, "and we're worryin' ourselves for nothing."

"I hope so," Gray replied. He did not share the line-rider's optimism. He knew that if he were in Morg Norris' place his urgent impulse would be to strike for the nearest point where a horse could be got safely.

"And if they went to the ranch Miss Ruth might be out gallivantin' over the country the way she does," Pat went on, bolstering up his assurance. "Half the time that girl spends in the saddle."

Gray pulled up abruptly. "Listen," he said.

To them drifted the sound of a galloping horse. Instantly Gray lifted his pony to a canter and rode out of the draw in which they were. The approaching rider was a woman. She caught sight of Sorley and dragged her horse to a halt.

"They've got Ruth!" she cried.

"Who?" asked Pat sharply.

"I don't know. Two men. I—I got a horse and ran away."

Nelly broke down and began to sob.

"Two men with one horse?" Gray inquired.

"Yes. They found horses in the corral, and they made us pack food."

"What d'you mean, they've got Ruth?" the crook-nosed man asked grimly.

"They're taking her with them. I was to go, too, but I got away like I said. One of the men let me go."

"Which one? Did you hear his name?"

The girl suspended her sobs. She looked at this hard-faced stranger whose eyes were like a day of judgment. His strength communicated itself to her.

"No. Yes, I did, too. He said his name was Kansas, and that I was to tell Mr. Chiswick he would try to look after Ruth. He said he was against taking her and to remember that they would make first for the Walsh cabin back of Crowfoot. That is where they will hide."

"Did he call the other man Morg Norris?"

"He called him Morg."

"How did Kansas get a chance to let you go?"

"The other man had sent him out to rope and saddle horses and I slipped away to the stable. This Kansas caught me there. But he let me go. He pretended to shoot at me as I rode away."

One for All, All for One, Even Germs Take Up the Chant, Scientists Assert

Two Department of Agriculture scientists announced discovery of four types of bacteria that give up their rugged individualism when the going gets tough and organize themselves into an army, marching on parade with the precision of West Point cadets, writes a Washington United Press correspondent.

Scientists long have believed that bacteria act, like ruthless savages, on the principle of "the devil take the hindmost."

These four species, however, unite in a co-operative organization when the water in which they live starts to dry up. They move in ranks with as many as 50 individual bacteria in a single, even file. Half a dozen ranks of bacteria may parade across a microscopic field in a few minutes, it was said.

Dr. Francis E. Clark and N. R. Smith, of the bureau of plant industry, solved the mystery of the socially conscious bacteria. The phenomena was first described by J. L. Roberts, a graduate student of the University of Texas.

Dr. Clark and Smith, working independently, discovered the same

thing while doing research in the Department of Agriculture laboratories. They pursued their studies further and found what made the bacteria act so strangely. It was reduced moisture, they reported.

Do these spore-forming bacteria inherit some astonishing trait which guides them when their living conditions become unfavorable?

Dr. Clark and Smith do not know the answer, although they have been working on the puzzle for months. All they know is that, when the moisture is reduced, these four species of bacteria organize into co-operative units to save themselves.

Under the microscope, the bacteria form an even row of many dozens. Out in front, one or more individuals may lead the parade—like drum majors. They move so rapidly that magnified 100 or 200 times their actual size they "march" out of view within a very few minutes.

Behind the rows in even formation, a few stragglers fall out of line and vainly try to keep up with the larger crop—just like soldiers.

Gray fired the next question at Sorley. "Where is this Walsh cabin?"

"Way up in the hills. You follow Lance creek—that's the one back of the house—pretty near to its headwaters. Then you cut across mighty rough country to Escondido park. The Walsh cabin is in a little park on the yon side of the pass. Unless you knew where it was, you wouldn't find it in a hundred years."

"You'll have to go with me, I reckon, Sorley. I'd never find it alone. We'll stop at the ranch and pick up some grub," Gray turned to Nelly. "You're not afraid to ride alone to meet Chiswick, are you?"

She said, "No," very dubiously.

"Good girl," the stranger said quietly. "We wouldn't let you go alone if there was any danger."

"You—you won't let them hurt Ruth, will you?" she begged.

No muscle in the man's grim immobile face changed, but the eyes that looked into hers had a cold fierce deadliness appalling in its ruthlessness. He made no threat in words, no promises.

"Quien sabe?" he murmured.

A moment later he was galloping toward the ranch.

They found the place deserted. Gray flung himself from the saddle, grounded the reins, and strode into the house.

On the kitchen table he found a note written on the margin of a torn piece of newspaper.

"Dear Lee,

"We had to borrow some grub for our honeymoon in the hills.

"Your son-in-law,

"Morg Norris."

Ruth knew she must not show fear. No matter how urgently it knocked at her heart, she dared not let it appear on her face. The man who had her in his power was a bully, and if she gave any sign of panic, he would take a devilish delight in trading on it.

Hour after hour they wound deeper into the hills. Each added mile increased her worry. Not many people had penetrated the folds between these steep and rugged passes. Her friends would not know where to find her. They might as well look for the proverbial needle in the haystack.

Norris rode beside Ruth, insulting her with his jeers and even more with his admiration. She looked straight ahead, hot shame in her cheeks. It was in her mind that she deserved this. Punishment had come home to her for all the careless flirting she had done in the past.

Upon her hand, lying for the moment on the pommel of the saddle, he let his fingers close. Ruth did not snatch her arm away. She moved it definitely but without haste.

He grinned. "You don't like me, sweetheart."

Her scornful eyes rested upon him for an instant. "I come of decent people," she said.

His vanity was colossal. It came to her that perhaps she could play upon it to save herself. He liked to talk about his prowess. By flattery she might deflect him from the purpose playing in the shallow surface of his mind, might at least lead him to move toward it with finesse. She made a change of front. It was useless to reproach him with outrageous her rights, since he recognized no claims of others. Better to let him see himself as a lover irresistible, gradually wearing down her will to fight his fascination.

"Don't you believe in any moral law at all?" she asked, looking at him with critical interest.

GREAT BOOKS

Siege of Troy Recounted in Homer's Story

By ELIZABETH C. JAMES

THE story of "The Iliad" by Homer takes place during the Trojan war and relates the wrath of Achilles, greatest of warriors.

It is now the ninth year of siege when Homer begins his epic and the Greeks are encamped on the shores of Asia Minor, besieging Troy. They are dejected as the poem begins, for their hero will not fight. The mighty Achilles sulks in his tent.

Elizabeth C. James

Agememnon, commander of Greek forces, had demanded a slave girl who had previously been awarded to Achilles as part of the spoils of battle. Thus unjustly treated by his commander, Achilles retired to his tents with his followers and refused to fight.

During the days of this quarrel, conversations among the men relate previous happenings.

Helen, most beautiful woman of history, was wooed by every prince of Greece. To protect the fortunate winner, all these chieftains swore to defend Helen, should the necessity ever arise.

She finally chose Menelaus to be her husband. Sometime after this, Paris of Troy, a handsome youth, came to visit at the palace of Menelaus. When he returned, he took Helen back to Troy with him. Thus all Greek chieftains were called upon to fulfill their vows and go to reclaim Helen.

Pretends to Be Mad.

Ulysses, happily married, did not wish to go on such a quest. He pretended madness, and plowed the fields, sowing salt.

When the boats were ready to sail for Troy, the winds stopped. An oracle explained that a maiden of royal birth must be sacrificed. So, Iphigenia, daughter of Agememnon, was made a human propitiation to the god of winds.

Nine years of encampment then followed with neither side gaining much advantage. Meanwhile within the walls of Troy, Helen's great

TRADITIONAL POET

The Iliad and the Odyssey were recited or performed every four years at Athens during the classical period. Homer is the traditional poet of these two poems; he has no existence apart from his poetry. The facts of his life are traditional or are surmised from his writings.

As far back as the classical period in Greece, Homer was an ancient poet. The classical Greeks made translations of his work, they wrote lives of Homer, they taught his poems and made analyses of his work. The language which he used in the original poems was ancient to the classical Greeks.

beauty had so completely captured the Trojan people that they fought madly to keep her within their city.

Hector Challenges.

Then occurred the incident of the slave girl and Achilles' wrath. Hector, the greatest warrior of Troy, came forth and issued a challenge for individual combat. But no one answered. Achilles was the only man to fight this Trojan warrior, and Achilles would not fight. Then Patroclus, dear friend of Achilles, borrowed the armor of Achilles and went forth to uphold the fair name of Greece.

From his tents Achilles saw his friend die. With a roar he rushed into the battle, but he had no armor. He would recover Patroclus' body for burial. The sound of his voice was enough; the Trojans were back inside the wall.

Achilles must have new armor. His goddess mother came and offered to have a suit forged in the fires of Vulcan.

Achilles Fights Hector

Clad in his new armor, Achilles sought Hector for combat. The mighty warriors were evenly matched. Around they circled, each seeking an opening in the other's guard. Time passed, yet they fought furiously, neither gaining advantage over the other. A goddess favoring Achilles slew down from Olympus and clouded the eyes of Hector, so that Achilles succeeded in smiting him a powerful stroke with his sword. Hector lay in the dust, his plumes and fine clothing despoiled. A wall went up from the tops of the walls of Troy as Achilles fastened thongs in the heels of Hector and tied him to his chariot, then drove madly round the walls of Troy.

Late at night there came a visitor to the tents of Achilles, it was Priam, aged king of Troy and father of Hector. Weeping, he pleaded for the body of his son, he recounted the glory of Hector and with tears of love he proved that Hector was too noble to be forced to wander forever through the shades for lack of proper burial. Achilles heard his prayer with compassion and gave to him the body of his son.

By Their Ruins

A British speaker recently said that, out of 21 civilizations that have arisen since the dawn of history, 14 are known only by their ruins.

How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change (usually from 38 to 52), who fears she'll lose her appeal to men, who worries about hot flashes, loss of sex, dizzy spells, upset nerves and moody spells.

Get more fresh air, 8 hrs. sleep and if you need a good general system tonic take Lydia E. Pinkham's Vegetable Compound, made especially for women. It helps Nature build up physical resistance, thus helps give more vivacity to enjoy life and assist calming jittery nerves and disturbing symptoms that often accompany change of life. WELL WORTH TRYING!

A Call

A need, a need known, and the ability to meet that need, constitute a call.—John F. Goucher.

Black Leaf 40

KILLS LICE

JUST A DASH IN FEATHERS... OR SPREAD ON ROOSTS

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work and do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, periodic attacks of dizziness, puffiness getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!

North Branch

Miss Hilda Cochrane is home for a vacation from her duties at Memorial Hospital, Nashua.

Miss Mary McClure recently received a 15 foot canoe from her grand-mother, Mrs. R. F. Hunt.

Many North Branch residents attended the Grant-Adams wedding in Hancock, Saturday.

Mr. and Mrs. Nelson Cook visited Boston recently.

Mr. and Mrs. A. L. Cunningham entertained friends from the White Mountains over the week end.

Walter Knapp is haying for W. D. Wheeler.

Mr. and Mrs. Harold Grant, of New York, and Elbert Grant, of Athol, Mass., were week end visitors of their father, E. R. Grant.

The North Branch Home Circle met at the home of the president, Mrs. Edith McClure and plans were made for the summer activities.

Mr. and Mrs. Paul Cole and family, of Methuen, Mass., visited with Mrs. Cole's mother, Mrs. R. F. Hunt, over the week end. Mrs. Cole and children are staying for a longer visit.

Bennington

The Trustees of the Public Library have voted to open the library Monday, Wednesday and Saturday from 3 to 5 and 7 to 9. In the past the library has been open one after noon and two evenings a week. In the two weeks the plan has operated, the readers have responded noticeably. Many new books have also been added.

STATE OF NEW HAMPSHIRE
 Hillsborough, ss.
 Court of Probate

To the heirs at law of the estate of Elizabeth R. Warren, late of Antrim, in said County, deceased, testate, and to all others interested therein:

Whereas James E. Armstrong, administrator with will annexed of the estate of said deceased, has filed in the Probate Office for said County, the final account of his administration of said estate:

You are hereby cited to appear at a Court of Probate to be holden at Nashua, in said County, on the 23rd day of August next, to show cause if any you have, why the same should not be allowed.

Said administrator is ordered to serve this citation by causing the same to be published once each week for three successive weeks in the Antrim Reporter, a newspaper printed at Antrim, in said County, the last publication to be at least seven days before said Court.

Given at Nashua, in said County, this 22nd day of June A. D. 1938.
 By order of the Court,
WILFRED J. BOISCLAIR,
 33-3t Register.

Antrim Locals

Paul H. Prescott has joined the United States regular army at Fort Williams, Maine.

The monthly supper of the Congregational Church, in Antrim Center, will be held Friday evening at 6.00.

The Antrim Garden Club will meet July 11 with Mrs. Webster Talmadge in Bennington.

Mrs. Arthur G. Bill, of Danielson, Conn., is the guest of Mr. and Mrs. Herbert E. Wilson.

Mr. and Mrs. Cranston D. Eldredge, of Winchendon, are spending some time at their Gregg Lake camp. Their son, Jimmy, is enjoying a two weeks stay at Camp Takodah, Richmond, New Hampshire.

Principal and Mrs. Guy B. Staples and sons, Carlton and Baxter, have been guests of the Eldredge family at Gregg Lake. They left Tuesday for a visit at Fortune's Rock, Maine.

A happy birthday party was enjoyed at the Tenney Farm Monday, in honor of Wilbur Tandy, Ellery Ring and Louis Bezio. Although all three birthdays did not fall exactly on "the 4th", yet so close did they come to that date that a celebration was quite in order.

FOR SALE

Small grindstone, steel frame, foot pedals. Nice Oak dining table and chairs. Kitchen range in first class condition.
 H. W. Johnson, Antrim

Miss Priscilla Grimes has been spending a few days with her grand-mother in Hillsboro.

Miss Harriet Wilkenson, R. N., has finished her work in Hillsboro and is at home.

Mr. and Mrs. Edmund Dearborn, of Claremont, are visiting her mother, Mrs. L. Gertrude Robinson this week.

Mr. and Mrs. Don Madden and son, of Washington, D. C., are with his father, Thomas Madden.

The 1st game of the double header ball game played on July 4, was won by Hillsboro, 11-5. The 2nd game was won by Antrim, 17-5.

The Donkey ball game between the Antrim Rod and Gun Club and the Business Men, drew a capacity crowd to the West Street grounds, Tuesday night. Several spectacular plays were made and the crowd was thrilled at the skill of certain riders. When the last bray had died and the dust had settled, the Gun Club had won 8-3.

A family reunion was held at the home of Mr. and Mrs. Albert Brown over the holiday week end. Those present were; Mr. and Mrs. Geo. Clement, of New Boston, Mr. and Mrs. Clarence Douglas and daughter, of Amherst, Mrs. Josephine Sterns and Mr. Leon Hale, of E. Hampton, Conn. Mr. and Mrs. Maurice Grant and children, of Goffstown, Mr. and Mrs. Harry Dufraim and daughters, Mr. and Mrs. Laurence Dufraim and daughters, of Hancock, Mr. Clifford Worthley and Mrs. Marion Shoults, of E. Swasey, and Mr. and Mrs. Algott Carlson and son, of Laconia. A pleasant visit was had by all and dinner was served by Mrs. Brown and Mrs. Carlson.

before said Court:
 Given at Nashua, in said County, this 22nd day of June A. D. 1938.

Therba—The Unruly

By CLEWLEY CLIFFORD
© Wheeler Syndicate Inc.
W.N.U. Service.

Therba Tash was the despair of all the traffic men in the district. They made their regular visits and gave her instruction; sent all their bulletins of the latest rules and changes and tried to impress their importance upon her; but they knew it was of no use.

"Now, Mr. Bentley" — Therba beamed over her glasses — "wouldn't it be downright silly for them to have to stop to look all those numbers up when I know 'em forward and back and it don't bother me a mite to tell 'em what time it is? I got the best watch ever; never gains nor loses. Had it 15 years, too."

"But, Miss Tash, it's ridiculous for a person to call for R. A. T. and get a telephone connection."

"Not if you know R. A. Trent as we do here in this town; that's just exactly what he is, a 'rat'! I s'pose it would be like a cross word puzzle for a stranger, but I know 'em all and what they want."

After he went out, Therba got to thinking about the rules and decided that they were made for op-

SHORT SHORT STORY

Complete in This Issue

erators who couldn't tell right from wrong, but that a wise operator was one who knew when to break them.

The office gave service until 12, but after 10 most nights she was able to put the night bell on and nap on the couch behind the switchboard, until she could go home in the rattly old car waiting at the back door. One night, after things had quieted down and she had settled herself for a nap, the bell rang. It was a toll line calling.

"Hullo, there, what you want?" she yawned.

The operator in the next town was speaking. "Say, we're having great excitement here. Some kind of disturbance here at a political meeting. Some young boys got into a rough house."

"That so? What of it?" Therba was sleepy.

"Well, Sheriff Bean from your town was here, and he's on your trail, and says he'll make an example of them if he catches them."

A young boy came in, all out of breath.

"Get me 24-4 Barton, please, soon's you can."

Therba knew this must be one of the disturbers of the peace. She thought, "Only a boy. Didn't mean a bit of harm." She looked at the tousled head showing through the glass door of the booth.

While she was ringing, she was startled by a loud voice just outside. Sheriff Bean! There was no time for the boy to get out of the booth. "The sheriff's coming an' you don't want to see him," shut that door and get down on the floor and keep quiet," she warned the boy. It was quite evident that he didn't wish to meet the sheriff.

"Good evening, sheriff."

"Hello, Therba. Get me Ant Blake over in Dixmont. Want him to be on the lookout for some dangerous characters."

"Been raising the devil over to the meeting tonight. They're a bad lot an' I'm goin' to give 'em the limit when I get some of them." He roared as he stamped up and down the office. Therba's heart skipped a beat every time he went near the booth. "The old hyena!" she thought. She was determined now to outwit this vicious old man.

"They don't answer over there now."

"Must be there," he said impatiently, walking toward the booth again.

"Oh, come here quick!" she shouted in an excited tone. He came back and she added: "Er—er—why, I thought that last call must be one of those dangerous characters, but it wasn't, after all."

"The devil!" the man blazed as he made for the door.

Pulling the curtain down, she got the boy behind the board just in time. The sheriff returned and this time she had no difficulty in getting his connection for him.

Therba questioned the boy.

"It's this way, Miss Tash. There's a rough gang out there been cutting up, but tonight some of us boys got to fooling — honest, we didn't do much, but my mother — the boy sobbed — "why, it'll break her heart if I'm arrested. That's why I didn't keep on with the rest. I wanted to let her know about it."

Therba made up her mind. "Now, son, you lie down here and rest, and at 12 o'clock I'll take my flivver and take you some place. Where'd you aim to go?"

He wished to go to his aunt's in Hanover.

"Righto, and I'll telephone your mother so she'll know what's up. This will soon be over. Don't you worry none." She thought, "I'll get back just about time to go to work in the morning."

"There you go, Therba, breaking more rules. You're just a natural law-breaker," she muttered.

DEERING

Several farmers have begun their haying.

Ralph Adams is employed at Mountain View Farm.

Mrs. F. A. Lundberg, of Hillsboro, called on Mrs. John Herrick last Thursday.

Mrs. C. Harold Tewksbury was confined to her home several days last week by illness.

Mrs. F. A. Lundberg and Miss Marion R. Lundberg of Hillsboro were in town last Friday.

Mr. and Mrs. Lindstrom, of Boston Mass., have been spending a few days at their summer home.

Mrs. Jasou C. Sawyer, of East Jaffrey, has been staying with her mother, Mrs. John Herrick.

Miss Alice Crane, R. N., who has been taking care of Mrs. John Herrick, returned to her home in Hillsboro last week.

Mrs. Edgar J. Liberty and daughter, Ann Marie, of Wilton, visited her parents, Mr. and Mrs. Harold G. Wells at their home, Pinehurst Farm, last Thursday.

Mrs. D. A. Poling has returned to Philadelphia, after a few days' stay at the Long House. Her sisters, Misses Matilda and Louise Diebold, are here for the season.

Mr. and Mrs. Emil Teigert, Mr. and Mrs. Smith and Mr. and Mrs. Flanders, of Lawrence, Mass., visited Paul Willgeroth and family at his home, Mountain View Farm, on Sunday.

Mrs. Harold G. Wells and Mrs. Paul Grund, of Hillsboro, attended the last meeting for the summer of Union Pomona Grange at East Weare last Wednesday afternoon and evening.

Miss Josephine Gardner, Miss Rose LeMay, Lester LeMay and Theodore Bissonette visited friends in Manchester on Sunday and also attended the fireworks at Pine Island Park in the evening.

Dr. and Mrs. Edward A. Glatfelter and children, Edward, Jr., and Janice, of York, Penn., were visitors this week at the home of Mr. and Mrs. A. A. Holden. Edward Holden and Mary Stevens, of Hoboken, N. J., have arrived at the Holden home for a visit.

Dr. Walter A. Morgan occupied the pulpit at the Deering Center Church on Sunday morning. This was the first of the summer services arranged by the church committee. An afternoon service was held at the Methodist church at East Deering, with Rev. Edwin B. Young, of the Hillsboro Methodist church, officiating.

Boston University will inaugurate its summer extension courses at the Deering Community Center the coming week. They will be under the supervision of Dean Henry H. Meyer of the School of Religious and Social Work. Among the instructors will be Dr. William A. Harper, Miss Mary J. Young, Mildred Keefe, Harry M. Titus and Rev. Thomas A. Goodwin, pastor of the Congregational church of Littleton.

Wolf Hill Grange, No. 41, holds its regular meeting in Grange Hall, last week. Hilda M. Grund, master, presided at the business meeting. Leroy H. Locke, Lecturer, had charge of the following literary program: Patriotic Night was observed. Readings, "George Washington's Prayer," Mrs. Josephine LeMay; "The Flag is Passing By" Mrs. Hilda M. Grund; "The American's Creed," Miss Charlotte Holmes; recitation, "The Dying Soldier," George Ellsworth; "The Ship of State," Mrs. Esther Colby, of Hillsboro and "The Flag," Ronald Locke and a talk "The New Hampshire Constitution," Miss Almeda Holmes. Monday, July 11th Bird Night will be observed and the program is in charge of Marie H. Wells, Lillian Durrell and Ethel Tewksbury, Bird Committee.

WEST DEERING

Mr. and Mrs. Ira Roach, of Hillsboro, were holiday guests at the Ellis home.

Mr. and Mrs. Allen Ellis called on old friends in Frankestown one day recently.

Charles H. MacDonald, of Sunapee was a business visitor here one day last week.

Mrs. William Watkins and Mrs. Harrison Hare, of Worcester, Mass., were in town last Thursday.

I. A. Parnell and Mrs. Joseph Watkins, of Nashua, were calling on relatives in town on Sunday.

Mrs. E. W. Colburn and Miss Ethel Colburn were visitors in the Capital City on Wednesday of last week.

Mr. and Mrs. Charles E. Brown, of Boston, Mass., spent the weekend and holiday as guests of Mr. and Mrs. Allen Ellis. On Sunday they all attended a baseball game in Tilton.

The SNAPSHOT GUILD

SUMMER CLOUDS AND SKIES

Clouds help your outdoor pictures. Use a color filter to record them more effectively.

SUMMER is the outdoor season, and one of the season's chief picture charms is its wonderfully rich blue skies against which cloud masses stand out in magnificent fullness and contrast. Given two pictorial subjects in which the sky appears, it's a safe wager that your attention will be held by the one effectively showing the clouds against a gray sky and not the attractive flat, white firmament.

Here is the way to picture clouds and skies as you eye sees them: load your camera with chrome type or panchromatic film, and slip a yellow color-filter on your lens. The diagram below shows how a yellow filter works—it preserves the sky tone, recording blue in the corresponding shade of gray instead of white. Thus, the clouds and sky are more dramatically recorded and much is added to the appeal of your picture.

Summer clouds and skies are pictorial studies in themselves. Try picturing clouds alone—the different types of cirrus and cumulus; fair-day clouds and stormy-weather clouds. Use the sky and clouds as background for your pictures of people. Work them into your landscape views. They give your pictures reality, and a warm, summery feel. Use your filter for all such pictures, increasing exposure according to the instructions that come with the filter or with the film you use.

Such practice pays rich snapshot dividends.

Color filters are traffic cops. A yellow filter (K-1 or K-2) stops part of the blue light, so that in the print, blue shows up as gray. Filters come in several colors, but a yellow K-1 or K-2 is what you want for general use.

GRANITE STATE GARDENER

By J. R. Hepler, Associate Horticulturist, New Hampshire University

Cabbage and cauliflower growers are bothered very much by the greenish cabbage worm which eats holes in the cabbage leaf and after a time damages the cabbage plant so much that it is practically worthless. Eggs of the cabbage worms are laid by the white and yellowish butterflies which are so plentiful in the cabbage fields and around mud puddles in the roads. The worms themselves are such voracious eaters that there is no trouble in killing them. Dusting the cabbage once every week or ten days or as often as necessary with a dust made of nine pounds of lime and one pound of calcium arsenate will control them without any trouble. People who do not wish to use an arsenical may use a rotenone dust which will kill the insect just as quickly and is not poisonous to animals or human beings. However, a rotenone dust costs a little more.

This same treatment will also control the tomato worm, that hideous looking creature which eats tomato plants. Of course tomato worms will not do any damage for another four or five weeks, but it is well to be ready for them. Dusting beans with rotenone dust, being sure to dust the under side of the leaf, will go a long way toward keeping your beans free from Mexican bean beetle injury. By killing the adults, the beetle crop of larvae or youngsters, will be cut to a minimum. If a poisonous or cheaper dust is wanted, the calcium arsenate dust can be used. Lead arsenate should never be used on beans because it burns the bean foliage.

How can you expect the country to be bull sh when Henry Wallace is trying to curtail the raising of corn which is the one outstanding feed for bulls?

It used to be the coals from father's pipe which burned a hole in the parlor rug, but now its the butt of mother's cigarette which causes the damage.

After your Round of Golf A HOT SHOWER and we mean really hot!

DEERING VACATION SCHOOL OPENS MONDAY, JULY 11TH

The Vacation School at Deering Community Center will open Monday, July 11. Local communities participating in the three weeks of activities are: Hillsboro, Hillsboro Center, Upper and Lower Villages, Deering, East Deering, Clinton Grove, Henuiker, Weare, North Weare, Weare Center, and points in between.

Dean Meyer, of Deering Community Center, announces the faculty and the courses of study for the Daily Vacation Bible School. The First session will be held at 9:30 on the morning of July 11th. An excellent teaching staff has been secured to carry on the work of the school.

Miss Mary J. Young, M. A., assistant Professor in Religious Education in the Boston University School of Religions and Social work, will be the Director of the Vacation School.

The Rev. Guy Mossman, M. A., of Holbrook, is principal of the Intermediate Department. The unit of work to be studied is, "Discovering God in the Beautiful." His assistants are: Mrs. Rachel Rolfe, M. A.; Shelburne Falls, Mass., Mr. Harold Grandstaff, B. A., West Virginia, Miss Mitsuki Arikki, B. A., Japan, Mr. James Pyke, B. A., China, and Miss Crystal Foster, Rochester, N. Y.

Miss Bess Doherty, M. A., of the Children's Section of the Boston Public Library will be in charge of the Junior Department. "Learning about War and Peace" will be their theme. Associated with Miss Doherty will be, Mr. William Barnes, of Virginia, Mr. Ralph Chapman, of Cincinnati; Miss Sigrid Grotten, of Albany, N. Y., Mr. Mark Benedict, Poughkeepsie, N. Y., Mr. David Kahn, Dorchester, Mass., Miss Barbara Hanson, Arlington, Mass.

Miss Jean Dum, B. A., is the Principal of the Primary Department and has chosen "Discovering God's Out-of-Doors" as their unit of work. Assisting Miss Dum will be Miss Esther Springer, Moravia, N. Y., Miss Judith Mitchell, Mrs. F. Pyke, China, Mrs. Bertha Hutchins, Spencer, Mass., Mr. Norman

Hersey, South Portland, Maine, Mr. Harold W. Woodbury, Rochester, N. Y., Mr. Carl Burke, Dover, N. H.

Miss Miriam Nelson, M. A., Kindergarten teacher in the Longfellow School, Cambridge, Mass., will have charge of the Kindergarten group. She has chosen "Making the Child at Home in God's World," as her theme. She will be assisted by Miss Vaunora Underwood, West Virginia, Miss Doris DeLine, Syracuse, N. Y., Miss Ruth Pyke, China, Miss Winifred Bromley, Cranston, R. I., and Mrs. Mellen, Hillsboro, N. H. Miss Mildred Keefe, M. A., Instructor in Religious Education in the Boston University School of Religions and Social work, will plan the music for the school and Donald Towle will have charge of the carpentry work.

The recreation will be planned by Mr. Donald Towle and Mr. James Pyke.

Interest in the Vacation School is keen and the Center is anticipating a large registration. The bus will call for Hillsboro children as it did last year.

Mrs. Nellie Mellen has consented to escort the children in the bus to and from Hillsboro each day. The Hillsboro churches and their pastors, Catholic and Protestant, are co-operating.

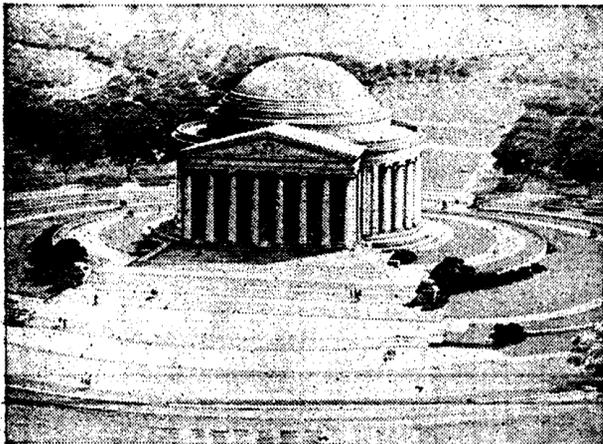

REPORTERETTES

A Chicago man who won \$400 on the races was slugged by three highwaymen and relieved of the easy money. That's almost like getting money from the government and then having it taken away from you in the form of taxes.

It's a wonder there are any Indians left in the country. We have seen about three thousand wild western films and the redskins got wiped out in every one of 'em.

Jefferson Enshrined

Many 1938 celebrants of July Fourth will forget that Independence Day has brought death to three former American Presidents. John Adams and Thomas Jefferson both died July 4, 1826, and James Monroe passed away the same day in 1831. By far the greatest of these, Thomas Jefferson is usually ranked with Washington and Lincoln. But not until this year have active steps been taken to enshrine Jefferson at the nation's capital.

Construction will start soon on the above white marble memorial designed by the late John Russell Pope. A round, low structure supported by surrounding pillars and covered by a dome, it will stand on a tidal basin of the Potomac river within sight of the monuments to Washington and Lincoln. Thus will be completed the trinity of edifices to these towering figures in American history.

A heroic size statue of Jefferson will grace the center rotunda, surrounded by inscribed panels of his famous statements. Six successive designs have been considered since the memorial was first agitated in 1901. The final plan by John Russell Pope conforms closely to the original under consideration at the turn of the century.

Nor was it an accident that the shrine will follow Graeco-Roman lines. Jefferson, himself an architect, would have built it that way because he saw something symbolic in such a design.

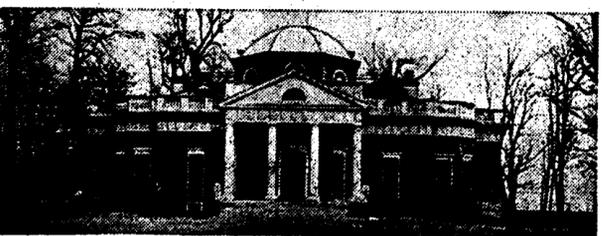

Picture Parade

Architecturally-wise Americans will recognize a similarity between the Jefferson memorial and the rotunda of the University of Virginia, a product of Jeffersonian simplicity. In Jefferson, the architect and statesman, the crafts of building and statesmanship were blended. Since (as he pointed out) our government was founded on a Greek concept of statesmanship, he reasoned that our architecture should express the Graeco-Roman ideals. Monticello, his home, follows the same style.

Smaller than the monuments to Washington and Lincoln, the Jefferson shrine will be just as impressive. Here is an aerial view of the future, showing the Jefferson monument at the extreme left center.

Monticello, Jefferson's home, still stands as a symbol of his classic mind.

Star Dust

- ★ Hurricane Elopement
 - ★ Story of Earhart
 - ★ Norma Steps Out
- By Virginia Vale—

MOVIEDOM is still gasping a little over the elopement of Frances Langford, the radio singer and movie actress, and Jon Hall, who skyrocketed to fame in "Hurricane" and hasn't been seen on the screen since.

Just after it was announced that they wouldn't marry until he had become more firmly established in pictures, they slipped off to Prescott, Ariz., with her mother and his sister and got married. But Hollywood didn't know about it until four days later, possibly because he used his real name, Louis Locher.

Frances Langford Even after Hall made such a hit in "Hurricane" he drew only \$150 a week for some time—mere chicken feed in Hollywood—but this salary was finally raised to \$200.

Kay Francis' last picture under her present contract will probably be based on a story that she herself wrote and sold to the studio. It's all about a famous aviator who goes into a round-the-world flight contest, and gets lost on a desert isle. Can it be possible that Miss Francis heard about Amelia Earhart?

Fashion news: Claudette Colbert has a daytime costume of dark blue with white floral buttons down the side of the jacket, like one which the duchess of Windsor likes to wear. Recently, one evening in New York, Helen Vinson wore a black chiffon gown with a skirt yards and yards wide, banded with many rows of narrow black velvet ribbon. No shoulder straps.

The New York revival of those two Valentino pictures, "The Sheik" and "The Son of the Sheik," was so successful that Agnes Ayres, the heroine, has been booked for a 20-weeks' personal appearance tour. And two more Valentino pictures will be brought forth.

Speaking of those Valentino pictures, Verree Teasdale and Adolph Menjou were in New York, before sailing for Europe, when they were being shown, and he was none too anxious for her to see "The Sheik" and see how funny he looked on the screen in those days.

Norma Shearer would like to do a smart modern comedy, after her long siege of costume pictures, so you may see her in "The Women."

NORMA SHEARER

which had a long run as a successful play before being handed over to motion pictures. Norma has a way of getting what she wants—as Marion Davies found out when they both wanted "Marie Antoinette" and Norma got it.

Remember Eric von Stroheim, who used to make pictures ("Greed" and "Foolish Wives" among them.) that cost millions? He's acting in French pictures now—which usually cost not more than \$75,000.

Incidentally, Jean Hersholt was reminiscing about "Greed" the other day—how it was way over the right length, and von Stroheim felt so badly about having it cut that he wouldn't even look at the film that was finally released.

ODDS AND ENDS—A radio actor and director who learned nineteen languages is on the air—as a dialect stogge and imitator of animals. . . . Many of the professional radio announcers are bad, but after hearing the words of them sounded marvelous. . . . Betty Davis refused to be included in a list of movie-dom's ten most beautiful girls; said "The idea is silly, because I'm not even a near beauty" . . . It's said that Metro spent \$250,000 developing "I Married an Angel" as a picture, and finally abandoned it—whereupon it was bought for the stage, where it's a tremendous success.

WHAT to EAT and WHY

C. Houston Goudiss Noted Food Authority
Explains What Is Meant by
CORRECT NUTRITION

Describes How to Construct a Balanced Diet, So Essential to Maintain Optimal Health

By C. HOUSTON GOUDISS
6 East 39th St., New York City.

TO SOME families, a summons to the dinner table means nothing more than a chance to satisfy hunger. To others, it represents an opportunity to gratify the palate, sometimes to the extent of overtaxing the digestive system.

Neither of these extremes fulfills the true function of food, which is to provide adequately but not to excess, for growth, maintenance and repair of the body.

Food May Fail to Feed
You can satisfy hunger without providing correct nutrition. You can partake of delicious-tasting foods to the point of over-indulgence—without meeting bodily requirements.

The mere spending of money will not insure good nutrition, for extremely poor diets can be found in households where the income is large and the food budget is ample.

What counts is learning to provide the right foods in the correct proportions. The return in health will be more than worth the investment of effort in acquiring this knowledge.

A Balanced Diet
Science has discovered what foods are necessary to help build top health and keep us 100 per cent fit. The amount of food required by a man for a day's work can be accurately determined. We know that a specific disease may be produced by one diet and cured by another; that growth can be influenced through changes in the quality of the dietary; that old age may be deferred by choosing the food with care.

We know that the body is a working machine which never stops but may slow down or get out of order unless the daily diet includes every element, every mineral, every vitamin needed to maintain health and avoid the deficiency diseases.

Seven Essentials
There are seven factors to be considered in planning a balanced diet. Protein for building body tissue and repairing the millions of cells that are worn out daily. Carbohydrates to produce quick heat and energy. Fats—a more compact form of fuel, which are also essential in a satisfactory diet. Minerals which serve both as builders and regulators of body processes. The six vitamins, A, B, C, D, E and G, that also act as regulators and prevent a number of deficiency diseases. Water—which serves as a vehicle by which food is carried to the tissues. And cellulose or bulk—required for the normal functioning of the intestinal tract.

Danger in Omitting One Food Substance
The homemaker who fails to take every one of these factors into consideration is depriving her husband of the opportunity to develop his greatest efficiency. Moreover, she may be robbing her children of their birthright. During every day of childhood, the body is being built, and defects in body structure are likely to arise if the child is improperly nourished. It is then that disease and disability make their appearance as a result of faulty nutrition. How tragic to deprive the young body of substances so necessary to its well being.

How to Check the Diet for Balance
Perhaps you are like the homemakers who tell me that they do not know a protein from a carb-

The Protective Foods
It is essential that the diet should contain an abundance of minerals and vitamins which are furnished by the protective foods—milk, eggs, fruits and vegetables.

60 Per Cent Carbohydrates
Carbohydrates should form at least 60 per cent of the supply of food fuel. Rarely are menus deficient in carbohydrates, because they are so widely distributed in such common foods as cereals, bread, potatoes, macaroni products, sweets, and sweet fruits and vegetables, such as oranges, grapes, apples and peas.

Fats should supply about 20 per cent of the caloric content of the diet. They are obtained from butter, margarine, cream, egg yolk, salad dressings, vegetable oils and the fat of meats.

A protein food should be provided at each meal. Meat, poultry, fish, eggs, cheese, milk and most nuts supply complete protein. Cereals and legumes furnish incomplete protein which may be supplemented by the complete protein of milk.

Cellulose or Bulk
Cellulose or bulk is obtained from fruits, vegetables and whole grain cereals. Water comes from juicy fruits, succulent vegetables, milk and other beverages, as well as the water that is consumed as a beverage.

To provide adequate amounts of the seven food essentials at every meal—to avoid the mistake of serving too much of one type of food and too little of another—should be the worthy aim of every homemaker. You will find the task considerably easier if you send for the Homemaker's Chart. Tack it up in your kitchen or in the room where you plan your menus, and use it to check the nutritional balance of every meal you prepare.

If you faithfully follow the food program outlined in the chart, you will help to assure your family of correct nutrition. This is the most priceless gift you could bestow upon them. For nutrition is the architect that draws the plans of human destiny. In providing the right foods, you lay a firm foundation for health on which to rear a life of happiness and success.

Questions Answered
Mrs. F. C. T.—Dried figs contain from 60 to 70 per cent sugar and 4 to 5 per cent protein. They are a fine energy food.
Mrs. A. G.—Prunes are a fine natural laxative food for those in normal health. They furnish vitamins A, B and G. But they must not replace oranges or tomatoes as they do not supply vitamin C.
A. F. B.—When thorough chewing is impossible, food can be finely minced or put through a sieve, to make it easily digestible.
Mrs. G. L.—There is evidence that a lack of vitamin A more quickly affects the eyes of children than adults. However, both children and adults require generous amounts of this vitamin to help maintain healthy eyes. A shortage may affect the tear glands causing a failure of secretion and dryness. The membrane becomes sensitive and inflamed, and the lids may swell.

Free Homemaker's Chart for Checking Nutritional Balance

PLANNING a balanced diet will cease to be a puzzle if you send for the Homemaker's Chart for Checking Nutritional Balance. Offered free, by C. Houston Goudiss. It lists the foods and the standard amounts that should be included in the daily diet, and includes skeleton menus for breakfast dinner and lunch or supper to guide you in selecting the proper foods in each classification. A postcard is sufficient to bring you this valuable aid to good menu planning. Just ask for the Nutrition Chart. Address C. Houston Goudiss, 6 East 39th St., New York City.

hydrate. Or it may be that while you understand the difference, you do not know what quantities should be included in the diet each day.

To simplify your task of serving balanced menus at every meal, I have prepared a Homemaker's Chart for Checking Nutritional Balance. In convenient chart form, it shows what foods should be included in the diet every day and gives the standard amount for each food. There are also skeleton menus outlined by food classifications, which enable you to plan balanced menus for every meal by making a choice from each group of required foods.

I urge every homemaker to write for this chart and use it daily. Then you won't make such common mistakes as serving a dried legume as a vegetable at a meal in which meat is used, which tends to concentrate too much protein in one meal; or choosing a too-heavy dessert following a main course that is overly rich in carbohydrates.

60 Per Cent Carbohydrates
Carbohydrates should form at least 60 per cent of the supply of food fuel. Rarely are menus deficient in carbohydrates, because they are so widely distributed in such common foods as cereals, bread, potatoes, macaroni products, sweets, and sweet fruits and vegetables, such as oranges, grapes, apples and peas.

Fats should supply about 20 per cent of the caloric content of the diet. They are obtained from butter, margarine, cream, egg yolk, salad dressings, vegetable oils and the fat of meats.

A protein food should be provided at each meal. Meat, poultry, fish, eggs, cheese, milk and most nuts supply complete protein. Cereals and legumes furnish incomplete protein which may be supplemented by the complete protein of milk.

The Protective Foods
It is essential that the diet should contain an abundance of minerals and vitamins which are furnished by the protective foods—milk, eggs, fruits and vegetables.

For Tea and For Tennis

plains, it has darts at the waistline to make it fit with becoming slimmness. This is a diagram pattern—practically nothing to make!

Afternoon Cape Ensemble.
With or without the cape, this dress with lifted waistline to flatten the midriff, is a charming, slenderizing style. The cape is a darling—puffed high at the shoulders, and made with arm slits so that it won't be always slipping off your shoulders. Make this design in georgette, chiffon, linen, or in a pretty combination of plain or printed silk, and you'll have a very distinguished, expensive-looking ensemble.

Pattern No. 1544 is designed for sizes 14, 16, 18, 20; 40 and 42. Size 16 requires 3 3/4 yards of 39 inch material for the dress; 2 1/4 for the cape; to line cape, 2 1/4 yards.

Pattern No. 1546 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14 requires 3 yards of 35 inch material. 3 1/2 yards bias binding to trim as pictured.

Success in Sewing.
Success in sewing, like in any other field, depends upon how you approach the task in hand. To help you turn out clothes professional looking in every detail, we have a book which plainly sets forth the simple rules of home dressmaking. The beginner will find every step in making a dress clearly outlined and illustrated within its covers. For the experience sewer there are many helpful hints and suggestions for sewing short cuts. Send 15 cents (in coins) today for your copy of SUCCESS IN SEWING, a book every home dressmaker will find of value.

Send your order to The Sewing Circle Pattern Dept., 247 W. Forty-third street, New York, N. Y. Price of patterns, 15 cents (in coins) each.

Why Rome Failed in Ancient Britain Is Shown by Digging

By EMILY C. DAVIS
London.—Once again the past teaches a lesson in conquest and its results.

Archeological investigation in England is revealing what written history has never explained: How and why Rome failed to Romanize barbarian Britain, 2,000 years ago.

Rome failed, says Dr. R. E. M. Wheeler, London university archeologist, because Rome tried in Britain to introduce too revolutionary an upheaval in a social order.

Rome brought a pattern of city life which was new to the Britons because it centered around commerce. Excavations show that the Britons had their own cities. But the civilized Briton was bucolic. He drew on the nearby countryside for food and for the stone, iron, clay, bone, and horn that made weapons and household gear. Rarely did these prehistoric Britons import foreign luxuries. Their trade was petty.

Came the Romans, and they set about improving these people. Native towns that resisted were stormed and dismantled, as has been recently shown by digging at Maiden Castle. Disarmed townsfolk remained to rebuild their houses and become Roman subjects.

No Middle Class. The Romans introduced foreign craftsmen to teach the natives to build in the Roman way, and foreign capital to develop resources of the country.

By the middle of the second century, says Doctor Wheeler, London and Verulamium "shone brightly on the provincial landscape." Britain had acquired central heating, dust-proof floors, bath suites.

But, "little more than a century later the bubble had burst." Another century, and Romano-British cities degenerated into concentrated slums. No prosperous middle class had developed, and without this type the Roman city plan was bound to fail.

Doctor Wheeler sums it up: Rome effected a political and social revolution in Britain, but not the economic revolution to fit it. Romano-British country life succeeded. The cities awaited the Middle Ages for a comeback.

Molten Rock Destroys Early Geological Records

Washington.—Evidence that geological records of the earth's oldest happenings have been destroyed by molten rock masses rising to the surface of the earth in later times was reported to the American Geophysical union here by Dr. E. N. Goddard of the United States geological survey.

Starting more than 50,000,000 years ago during the Eocene age when primitive mammals were displacing the great dinosaurs, a mass of molten rock rose up from the depths to break the billion-year-old crust of the earth at a point where today the mining town of Jimtown, Colo., is located, Doctor Goddard declared.

In the intruded rock, he found fragments of these younger rocks, some of them hardly changed by their submersion in the molten mass. Other fragments were greatly changed, and there is evidence that still others had been melted and dissolved in the rising mass, transformed into part of it.

These findings, Doctor Goddard pointed out, show on a small scale the cycle of rock changes that is going on everywhere. Molten rocks are washed away, deposited as sediments, then they are heated and squeezed into new forms, then are absorbed by intruding melted rocks, beginning the cycle all over again.

"Mud Jacking" Method of Mending Concrete Roads

Chicago.—Surface irregularities in certain types of paving caused by settlement of the roadbed can be repaired cheaply and efficiently without tearing up whole sections of paving, John W. Poulter of Milwaukee, Wis., reports here.

"Mud jacking," which consists of pumping mud and cement mixtures underneath concrete paving slabs which are settling, is gaining in popularity among road maintenance men because of its cheapness and efficiency, he reports.

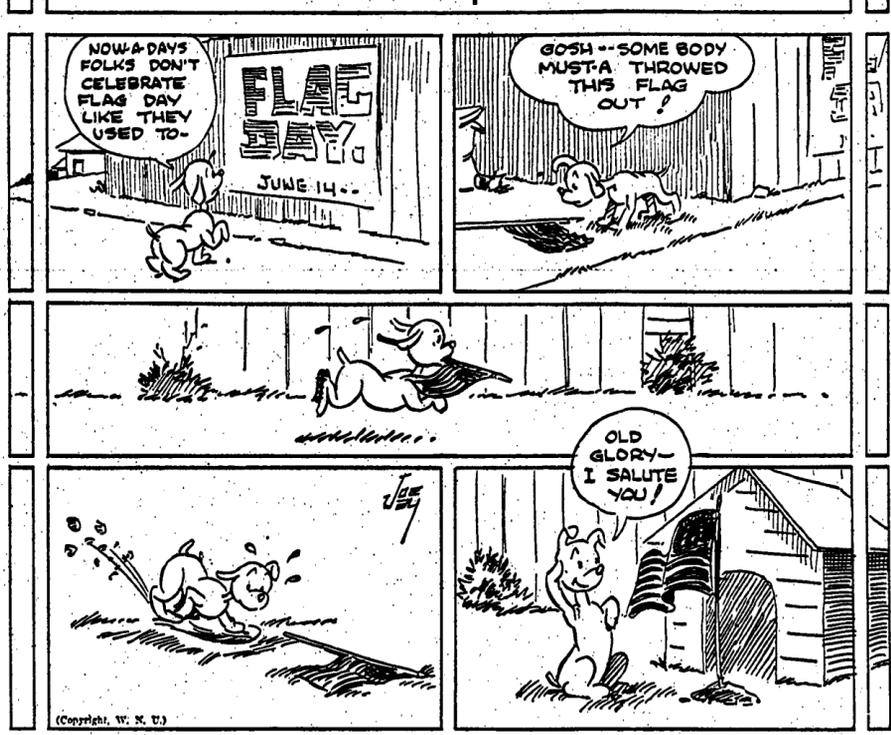

German Moose Refuge

Berlin.—More than 100,000 acres of wild forested lands have been set aside as a permanent refuge for moose. The area lies in East Prussia, near the city of Koenigsburg. It has never been cultivated, and very little timber cutting has ever been done in it.

Regulations are very strict. Not only are such obvious ill practices as lighting fires, cutting trees, and shooting game prohibited, but visitors are not even allowed to leave public roads and paths without special permit.

And It Had No Paw
During the reading of a story, a teacher paused to ask his pupils if they knew the meaning of the phrase, "the shark's hungry maw."
"Its starving mother, sir," called out a little boy promptly.

FIREWORKS IN THE DEEP

"Did it hurt when the sunfish bumped into you?"
"I'll say so. I saw starfish!"

HOW to SEW

By RUTH WYETH SPEARS

A BIT of hand embroidery for the collar and sleeves of a little girl's dress is always the smartest trimming. Quickly made stitches and interesting colors may be combined to give unusual effects.

The dress shown here is pale blue chambray. The collar and sleeves are edged with blanket stitch in a deeper blue as shown at A. Between each blanket stitch a tiny loop stitch is made in white and three larger white loop stitches at the top of every second blanket stitch as shown at B. When used on a fabric of this weight the embroidery should be rather coarse to show up well. All six strands of a six strand embroidery cotton may be used or No. 5 pearl cotton. For a dress of fine sheer material such as dimity or organdie use finer embroidery thread. Other attractive color combinations are pink material with deep rose and French blue embroidery, yellow with brown and orange or green with yellow and white. For a printed fabric, repeat two of the strongest tones in the printed design or use white collar and cuffs embroidered in the background color of the print and one of the brighter tones.

NOTE: If you wish to use these weekly articles for reference paste them in a scrapbook, as they are not included in either Sewing Book No. 1 or 2. Book 1, Sewing for the Home Decorator, covers curtains, slipcovers, dressing tables; 48 pages of fascinat-

File Squares Form Lovely Table Cloth

Pattern 1726.

Crochet these lacy companion squares in odd moments—then combine them into an exquisite cloth or spread! The rhythmic design is set off by easy K-stitch. Pattern 1726 contains charts and directions for making squares; materials required; illustrations of squares and of stitches.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York.

Rose as Rent

Henry William Stiegel, the glassmaker, erected Zion Lutheran church at Manheim, Pa., and donated it in consideration of a nominal rental, one item of which was one red rose yearly. Every second Sunday in June the ceremony of placing the rose on the altar is observed at Manheim.

ing directions. Book 2 illustrates 90 embroidery stitches with numerous applications; doll clothes and gift items. Order by number, enclosing 25 cents for each book desired. If you order both books, leaflet on making crazy quilts, with 36 stitches illustrated, will be included free. Address Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

eat a lot of rats, mice and frogs. Mr. Marshall will answer your questions. Don't forget the stamp. Let me give you a tip. If you are traveling from Portsmouth to Keene just take the detour at Williston and go up route 31 to Greenfield and then over to Peterboro. This last rain put the old mountain back years. The contractors are working over time and now it's a "carry the red flag" Sunday I went up and the roads were fine but Monday was a different day. Take my advice and go over the detour. It's a fine road via Greenfield. In a few weeks this 101 over the mountain will be one of the best in the state but just now it's the worst with a big (W).

Well I have finished my stream survey and all last week worked with the following men: J. H. Rainwater, Lemon Grove, Cal., Stuart Edmond, Amherst, Mass., Daniel R. Embold, Ithaca, N. Y., Clyde A. Goodrun, Westmoreland. We had fine luck till the last day when on a back county road we had the misfortune to run onto a stone too high for the Plymouth and as a result had an eight inch rip in the gas tank. We were lucky to get out of the four mile back road before she stopped. These men are experts and when it's all over and back in the office we will know all about our brooks and what to expect of them in the future. My lakes and ponds survey has not as yet started, the crew working with "Tim" Barnard this week.

Now is haying time and if you find a nest of pheasant eggs that have been disturbed notify the nearest Warden. Ernest Stephenson of Lyndeboro got 8 eggs out of a nest two being broken by the machine. As the place was exposed he sent for me to take the eggs which are now under a banty hen. The flushing bar is being used on all up to date farms. This gives the birds warning that the cutter bar is close by. Last year I had over 100 eggs brought to me and many a fine pheasant was saved. If the nest is not disturbed don't touch the eggs as the old bird will come back to the nest but if in the middle of a big field and all grass is cut around it she won't come back and the eggs will spoil.

We see by the paper that "Topsy" the doe owned by Mr. Baldwin of Pittsburg has another set of twins.

Mr. Baldwin now will have to add another ring to his circus. I got well acquainted with "Topsy" at the Boston Sportsman show and she would eat from my hand without fear. She and her twins last winter were the "hit" of the big show and at New York she made even a bigger hit. The N. Y. papers devoted a lot of space to her and her family.

It won't be long now to the time when our lakes and ponds will be well stocked with bass and pout from the salvage crew which are now working in the northern lakes.

Here is a fellow that's in trouble or he thinks he is. Wants to know what to do with a swamp behind his house that's a breeding place for mosquitoes. Shall he turn oil on the waters? Never turn oil onto a swamp as it will kill your ducks. Get a few black or mallard ducks and turn them loose on this swamp after clipping on wing. They will clean up that pest in no time. Mosquitoes lay their eggs in the water. Ducks love the eggs. The more ducks the less mosquitoes. Simple, hey?

Last Saturday night while on route 31 at Greenfield I came upon a doe with a very young fawn. The fawn was having a hard time to get across the road. It was very young and all legs. The old doe kept coming back to the baby and after I had got her across the road and into the woods I left them. I could have caught the fawn very easy as it was very wobbly on its legs. My wife got a big thrill out of this little road show. This little incident made me all the more determined to keep the self hunting dogs tied up. Mr. and Mrs. Arthur Hayes at Otter lake camps saw a mother and fawn drinking out of the lake one day this week.

Deer were never so plentiful as this year. Many have been seen with twins.

Are you one of those people who think that horses are nearly all gone in the United States? But you do not need to worry. There are yet 14,000,000 horses and mules in harness on American farms, with more being raised than ever before. There are 8,500 race horses, 7,500 trotting horses, and 500,000 riding horses.

The warnings of age are the weapons of youth.

Hillsboro

Leo Lafamme, Jr. of Manchester was in town for the Fourth.

Mr. and Mrs. Clarence Chickering of Manchester visited friends and relatives in town over the week-end.

Mr. and Mrs. Guy E. Walker of Schenectady, N. Y., are guests of their aunt, Mrs. Cora L. Scruton, on Henniker street.

Mr. and Mrs. John M. Tucker and son Murray of Manchester were week-end guests of his parents, Mr. and Mrs. W. T. Tucker.

Mrs. Mendel Codman, Miss Susan Forsaith, Mrs. W. T. Tucker and Mrs. B. H. Smith visited Hampton Beach and other shore resorts on Tuesday.

Mr. and Mrs. Raymond Reese and two children, John and Madeline, and Mrs. Grace Perry of Melrose, Mass., were week end guests at the home of Mr. and Mrs. Harry R. Cross.

Mr. and Mrs. R. G. Smith entertained Mr. and Mrs. Thomas Fearnside and son Bill of White Plains and Miss Katherine Tidd of New York at their camp on Long Pond, Stoddard, over the holiday.

Mr. and Mrs. William Daniels of Durham and Mr. and Mrs. Albert Vigue and two children, Joan and Charlotte, of East Jeffrey were guests of Mr. and Mrs. Burt H. Smith over the week-end.

Fred Worth, local painter, was badly injured on Thursday when he fell from a staging while painting at the home of Manuel Texeria. He was taken to the Margaret Pillsbury hospital for examination and it was found that no bones were broken although he had a badly lacerated place on his side, where the hook on the staging caught him.

FARM TOPICS

FIND GRASS TONIC FOR ANIMAL LIFE

Nature's Gift Ranks With Sunshine, Air, Water.

By G. T. Klein, Extension Poultry Specialist, Massachusetts State College, WNU Service.

Poultrymen are going back to nature as a result of recent findings in scientific laboratories. We have found that short tender grass is one of nature's greatest gifts to animal life, ranking in importance with sunshine, air and water.

Chickens and turkeys which receive a liberal quantity of finely-cut tender grass every day throughout the growing period, in addition to a well-balanced grain ration, appear to develop a resistance to certain diseases and parasites. They usually grow more rapidly and consume less grain than do birds reared on a grass-free diet.

The cultivated grasses, such as oats, barley, Sudan, wheat, and rye, when grown on fertile soil, are high in protein, contain about 15 minerals, and all the known vitamins except D. Use of oat plants as much as possible during the year is recommended since these plants are palatable, easily grown and yield a high tonnage.

Where time does not permit cutting and feeding the grass daily, the next best practice is to have the grass available for the birds to range in during the growing period. A combination of the two systems gives excellent results. The main point is to feed the grass when it is young and tender.

The growing of green feeds for poultry seems to offer a way of reducing growing costs and building healthy, vigorous bodies capable of resisting disease and giving greater performance. Because of the saving in grain feeding, good pasturage is now considered to be the most valuable feed crop grown on the poultry farm.

Perspiration Road

WNU Service.

ROLFE RUPERT CLEVERTON could flash enough charm into the eyes of his intimates, his wife included, to blind them to the shame of his joblessness and his easy acceptance of an inadequate living on the little his late parents had left behind them.

For months Rolfe had been keeping a secret until it should be ripe enough to share. That time had now come.

Madeline, his wife, had closed a fat, family magazine with emphatic energy and turned to smile at her handsome husband just entering the room. "Rolfe, once more I've had to shut up that insistent salesman who jumps out at me here, there and everywhere in this magazine. He interrupts my reading of household economy articles by showing me tempting luxuries I know I can't afford."

"Scrap the economy articles, but open your book and tell me what luxuries you see there you want," Rolfe invited graciously.

Madeline complied, laughing: "This and this and this and—" she continued turning pages.

"You may have all these and—more," her husband assured her grandly; "for I am a rich man!"

In this way came the Clevertons' good fortune. Years back, three brothers, Richard, Rupert and Rolfe, loved the charming and beautiful Miranda. Richard won her.

FRENCH FILES HOLD HISTORIC SECRETS

Papers Covering Five Centuries in Archives.

Paris.—The archives of the ministry of foreign affairs, at the Quai d'Orsay in Paris, contain the complete diplomatic history of France dating back to the beginning of the Fifteenth century and are daily used by numerous historians and students delving through the age-yellowed parchment sheets into the dark secrets of by-gone days.

The archives are divided into three sections, two of them being devoted to the library and the third to the archives proper.

The library contains more than 200,000 volumes of historical and reference books while in the archive department all diplomatic correspondence exchanged since the beginning of the Fifteenth century is stored away in chronological order.

There is another third small department attached to the archives known as the geographic section, whose business it is to supply diplomats with all the maps and charts they might need in their work.

Several of the most outstanding series of letters from the later periods of French history have been bound and one of the most interesting of these is certainly the volume containing the confidential correspondence which Talleyrand wrote to Louis XVIII during the congress of Vienna in 1815.

The interest of this magnificent volume, bound in red velvet, is further enhanced by the red silk cord bookmark on the end of which dangles a tiny gold casket containing Marie Antoinette's marriage certificate.

Another of these bound series of letters contains all the letters written by George Washington to the French government during the Revolutionary war.

SHORT SHORT STORY

Complete in This Issue

The two others went their separate ways to foreign lands to forget Miranda in piling up the dollars. Their piles grew higher and higher, but they did not forget.

In the course of time, they received photos of a little niece who had Miranda's big brown eyes. Their checks made life easy for Richard, Miranda and the little girl.

A few years later, uncles received photos of grand-nephew, Rolfe Rupert, who also had Miranda's eyes. Uncles' checks sent grand-nephew, grown to young manhood, through college.

The bachelor uncles, now old and broken in health, were living together in California, surrounded by all the comforts their wealth could buy. Rolfe Rupert, shortly before his marriage, was summoned thither to meet these relatives for the first time. Uncle Rupert was hobbling around on a cane, Uncle Rolfe was in bed.

Said Uncle Rupert: "The bulk of our possessions will go to you; we are glad to do this for Miranda's grandson."

"Miranda's eyes!" Uncle Rolfe murmured weakly, studying young Rolfe's face.

Uncle Rupert, apparently the stronger of the uncles, died soon after the young man's return home, and now young Rolfe was in full possession of a substantial legacy from him.

But, a few years later, Rolfe and Madeline could see clear through to the end of those "everlasting dollars."

"You must get a job, Rolfe," urged Madeline.

Rolfe shrugged his shoulders. "Oh, Uncle Rolfe can't last much longer."

Suddenly, out of the West, Mr. Vincent Carr, advanced in years, but powerful in personality and possessions, sprang into the activities of the eastern city where the Clevertons lived.

One day he was standing before a decadent, colonial mansion he had bought to restore. Rolfe, money all gone, his first child recently arrived, approached him for a job, just plain job, anything.

"I have an excellent opening for you in South America," Mr. Carr surprised him one day. "It will be hard at first, but it will pay you royally in the end, if you do right by it."

Rolfe studied the ground in frowning thought.

"What!" Mr. Carr shot at him. "Hoping your remaining uncle will die soon?"

Rolfe started nervously, blushed, "I—I—he—he—he suffers and wants to go, and I—"

"I know more about him than you do. Listen. He got wind of the fact that you had exceeded all decent speed laws in racing through his brother's money. 'Get me out of bed,' he commanded the best physician in the country. 'I want to spend my own hard-earned money myself, as it ought to be spent. I want the spoiling of my nephew to stop right here; I've spoiled relatives enough.' The man's will and the doctor's skill changed your uncle sick in bed to the Rolfe Vincent Carr before you now, fine and fit, and likely to make what he leaves behind look like 30 cents. As for you, Rolfe Rupert Cleverton, if you want to spend magnificently: first travel PERSPIRATION ROAD as I did. Go to South America, but DON'T keep sending me photos of my great-grandniece."

Rolfe controlled his feelings and accepted PERSPIRATION ROAD.

Hardier Wheat Results From Ten-Year Trials

Winnipeg.—Canadian research scientists see the day when farmers will be free of smut, stem rust and plant diseases that have cost them millions of dollars in the past.

Dr. Cyril H. Goulden of the Dominion research laboratory here has produced a new kind of wheat known as "Rust Laboratory 1097," which is superior in quality to other rust-resistant varieties.

Ten years ago Dr. Goulden crossed two varieties. The seeds have multiplied into 500 bushels of uniform R. L. 1097.

Rust-resistant wheats such as Thatcher Renown and Apex have certain undesirable characteristics. Desirable factors include early maturity, high yield, disease resistance, straw length, good kernel and high milling and baking quality. The new type wheat meets these requirements.

Tests of the 1937 crop were conducted by Canadian research chemists and cerealists in Canada, Great Britain and the United States.

Tea Replaces Cocktails as Pastors Acquire Club

Milwaukee.—Pastors of Milwaukee churches took over an old night club and prepared to set an example in entertainment for the city's 2,000 taverns.

With that motive, the ministerial association announced, it will run a model club for young folk. It will feature chaperones instead of hostesses and 10-cent tea instead of 50-cent cocktails.

"We are going to run the place ourselves," the Rev. Raymond Ewing said, "but have arranged for the operator of an ice cream parlor of good reputation to manage the club."

"Operation of the club will be a demonstration of our contention that liquor is not necessary to attract youth to these entertainment places."

The chaperones will keep an eye on the dancing. The tea, or soft drinks as a variety, will be used to draw the matinee trade. The night club was padlocked by Federal Judge F. A. Geiger during prohibition.

Honolulu Bird Talks to Self in Two Languages

Honolulu.—Mrs. S. Itakoa boasts of possessing the only bird on the island that can talk in two languages. It is equally fluent in Japanese and English and can throw in a few words of "pidgin" when listeners are not able to understand the two languages in their purity.

The bird, which answers to the name of Charlie, is a nymah, one of the most conspicuous birds on the island although not indigenous here. They were brought from India to aid farmers by feeding on the cut-worms of a moth.

Unlike most talking birds, the nymahs are able to talk without having their tongues slit.

It took Charlie nine years to arrive at his present linguistic achievements and his greatest and most amusing accomplishment is that of being able to carry on a bi-lingual conversation with himself.

Long Lost Knife Found

Hinsdale, Mont.—Oscar Carlson, retired farmer, lost a good pocket knife while threshing wheat 32 years ago on the prairie land near Williston. The knife was returned to Carlson the other day by a former neighbor who found it.

Commercial Printing

and All Kinds of Job Printing

Careful and Prompt Service

Our prices are as low as good workmanship, good stock, and a nice product will warrant. We have a reputation to maintain along these lines, and stand ready at all times to protect it.

Give us an opportunity to quote prices, and those who do not already know it, will learn that they are in keeping with the times. People who are anxious to have their printing done right should consult us before going elsewhere.

FREE ADVERTISING!

When this office is given the printing for plays, or other society affairs we will give a Free Reading Notice in this paper which is oftentimes more valuable than the entire cost of the posters and tickets for an entertainment or dance.
